

CONTENTS

Chapter 1	INTRODUCTORY	1
Chapter 2	THE ELECTRICAL PROPERTIES OF SOLID MATERIALS	3
2.1.	Structure of the atom	3
2.2.	Structure of solid materials.	7
2.3.	Conductors, insulators and semi-conductors	8
2.3.1.	<i>Insulators</i>	9
2.3.2.	<i>Conductors</i>	10
2.3.3.	<i>Semi-conductors</i>	11
2.4.	Energy transformation effects.	11
Chapter 3	PHOTO-ELECTRIC EFFECTS	15
3.1.	Photo-emission	15
3.1.1.	<i>Vacuum cells</i>	17
3.1.2.	<i>Gas-filled cells</i>	18
3.1.3.	<i>Photo multipliers</i>	19
3.2.	Photo-conductivity	20
3.2.1.	<i>Cadmium sulphide and lead sulphide cells</i>	21
3.2.2.	<i>The p-n junction photo-diode</i>	22
3.2.3.	<i>The transistor</i>	26
3.3.	The photo-voltaic effect	30
3.4.	The photo-magnetic effect	32
Chapter 4	PHOTOMETRY CONCEPTS, DEFINITIONS AND UNITS	33
Chapter 5	PROPERTIES AND CHARACTERISTICS OF PHOTO-SENSITIVE DEVICES	40
5.1.	No-signal conditions	40
5.2.	The signal	40
5.3.	Thermal conditions	41
5.4.	Spectral response	41
5.5.	Sensitivity	43
5.6.	Frequency response	49
5.7.	Temperature dependence.	52

Chapter 6 CONSTRUCTION OF PHOTO-SENSITIVE DEVICES	55
6.1. Photo-emissive cells	55
6.2. Cadmium sulphide cells	56
6.3. Lead sulphide cells	58
6.4. Photo-transistors	58
6.5. Germanium photo-diodes	62
Chapter 7 APPLICATIONS OF PHOTO-SENSITIVE DEVICES	63
7.1. On-off applications	63
7.2. Operation with varying optical signals	65
7.3. Detection of weak signals	66
Chapter 8 ILLUMINATION OF PHOTO-SENSITIVE DEVICES	68
Chapter 9 APPLICATIONS	82
<i>Call system for hotels, hospitals, etc.</i>	88
<i>Infra-red burglar alarm</i>	90
<i>Noise-free voltage divider with remote control</i>	90
<i>Automatic muting</i>	91
<i>Light-sensitive relay operated by a cadmium sulphide cell</i>	91
<i>Relay controlled by radiant heat</i>	94
<i>Relay controlled by a photo-diode</i>	95
<i>Relay controlled by a photo-transistor</i>	96
<i>Light-operated relay employing a photo-voltaic cell</i>	97
<i>A model to demonstrate automatic photo-electric control</i>	98
<i>Automatic control in industry</i>	100
<i>Dosage apparatus</i>	102
<i>Flashing lights for decorative or advertising purposes</i>	102
<i>“Crawling” light effect for electric advertising signs</i>	104
<i>Monitoring car lights</i>	105
<i>Lamp memory</i>	106
<i>Selective heart-beat amplifier</i>	107
<i>Automatic brightness and contrast control in television receivers</i>	108
<i>Light-operated motion detector</i>	110
<i>Photo-electric pick-up for a tachometer</i>	111
<i>Perforated-tape reader</i>	112
<i>Programme control of oven temperature</i>	115

<i>Light-controlled audio tone generator for monitoring telephone switchboard lights</i>	116
<i>Measurement of differences in illumination I</i>	117
<i>Measurement of differences in illumination II</i>	118
<i>Control of colour density and brightness</i>	119
<i>A controlled light source of constant intensity</i>	120
<i>Measurement of photo-device characteristics</i>	123
<i>Pyrometer incorporating a photo-transistor</i>	123
<i>Dew-point meter</i>	125
APPENDIX Table of tungsten radiation	127
INDEX	129
