<b>1. Introduction</b> .....	1
<b>2. The Interaction of Radiation with Matter</b> .....	6
2.1 Introduction.....	6
2.2 Moving Charged Particles.....	7
2.3 Neutron Irradiation.....	14
2.4 Theory of Displacement Production.....	17
2.5 Replacement Collisions.....	28
2.6 Spikes.....	32
A. General.....	32
B. Plastic Deformation in Temperature Spikes.....	39
C. Displacement Spikes.....	41
2.7 Gamma Irradiation.....	45
<b>3. Basic Experiments</b> .....	56
3.1 Introduction.....	56
3.2 The Threshold Energy for Displacement.....	56
A. Theoretical Calculations.....	56
B. Experimental Determinations.....	58
3.3 Experimental Determination of the Number of Displaced Atoms.....	62
A. Metals.....	62
B. Graphite.....	67
C. Semiconductors.....	77
D. Corundum and Fused Silica.....	80
3.4 Order-Disorder Systems.....	82
A. Disordering Experiments.....	83
B. Thermal Spikes and Replacement Collisions.....	83
C. Phase Reversal and Thermal Spikes.....	84
<b>4. Nature and Properties of the Defects</b> .....	90
4.1 Introduction.....	90
4.2 Point Defects and Changes in Physical Properties.....	91
A. Electrical Properties.....	92
B. Thermal Conductivity.....	96
C. Stored Energy.....	98

	D. Elastic Properties.....	101
	E. Optical Properties.....	104
	F. Paramagnetic Resonance.....	105
	G. Effects Observable by Diffraction.....	107
	H. Diffusion.....	117
<b>5. Annealing of Defects.....</b>		<b>129</b>
5.1	Introduction.....	129
5.2	Mobility of Defects.....	130
	A. Metals.....	130
	B. Ionic Crystals.....	135
	C. Semiconductors.....	137
5.3	Theories of Annealing.....	138
	A. Diffusion.....	138
	B. Recombination of Vacancies and Interstitials.....	144
5.4	Fundamental Experiments.....	152
	A. Annealing in Metals.....	152
	B. Annealing in Nonmetals.....	166
5.5	Annealing of the Graphite in the Brookhaven Reactor.....	171
<b>6. Special Topics.....</b>		<b>182</b>
6.1	Mechanical Properties of Metals.....	182
6.2	Dimensional Stability (Uranium).....	185
	A. The Phenomenon of Radiation Growth.....	186
	B. Suggested Interpretations.....	187
6.3	Phase Transformations.....	189
6.4	Precipitation from Solid Solution.....	192
6.5	Chemical Effects.....	194
	A. Decomposition of Salts.....	195
	B. Polymerization in the Solid State.....	196
	C. Effects on Reaction Rates.....	199
<b>Author Index.....</b>		<b>208</b>
<b>Subject Index.....</b>		<b>214</b>
