

# CONTENTS

## 1. Introduction

## 2. Methods of Preparation of Thin Films

2.1 Chemical and Electrochemical Methods . . . . .	14
2.2 Cathode Sputtering . . . . .	18
2.2.1 Principle of Diode Sputtering . . . . .	18
2.2.2 Some Special Systems of Cathode Sputtering . . . . .	23
2.2.3 Low-Pressure Methods of Cathode Sputtering . . . . .	26
2.3 Vacuum Evaporation . . . . .	28
2.3.1 Physical Foundations . . . . .	28
2.3.2 Experimental Techniques . . . . .	33
2.3.2.1 Evaporation Apparatus . . . . .	33
2.3.2.2 Substrates and Their Preparation . . . . .	38
2.3.2.3 The Most Important Materials for Evaporation . . . . .	42
2.3.2.4 Evaporation Sources . . . . .	45
2.3.2.5 Special Evaporation Techniques . . . . .	46
2.3.2.6 Masking Techniques . . . . .	49

## 3. Thin Film Thickness and Deposition Rate Measurement Methods

3.1 Balance Methods . . . . .	53
3.1.1 Microbalance Method . . . . .	53
3.1.2 Vibrating Quartz Method . . . . .	54
3.2 Electrical Methods . . . . .	57
3.2.1 Electric Resistivity Measurement . . . . .	57
3.2.2 Measurement of Capacitance . . . . .	57
3.2.3 Measurement of Q-factor Change . . . . .	58
3.2.4 Ionization Methods . . . . .	59
3.3 Optical Methods . . . . .	60
3.3.1 Method Based on Measurements of Light Absorption Coefficient . . . . .	60
3.3.2 Interference Methods . . . . .	61
3.3.3 Polarimetric (Ellipsometric) Method . . . . .	67
3.4 Deposition Rate Monitoring Using Transfer of Momentum . . . . .	68
3.5 Special Thickness Monitoring Methods . . . . .	69
3.5.1 Stylus Method . . . . .	69

3.5.2 Radiation-absorption and Radiation-emission Methods . . . . .	70
3.5.3 Work-function Change Method . . . . .	71

#### 4. Mechanism of Film Formation

4.1 Formation Stages of Thin Films . . . . .	72
4.2 Nucleation . . . . .	73
4.2.1 Capillarity Theory of Nucleation . . . . .	76
4.2.2 Statistical (Atomistic) Theory of Nucleation . . . . .	81
4.2.3 Influence of Individual Factors on Nucleation Process . . . . .	86
4.2.4 Some Experiments for Verification of Nucleation Theories . . . . .	91
4.3 Growth and Coalescence of Islands . . . . .	93
4.4 Influence of Various Factors on Final Structure of Film . . . . .	97
4.4.1 Special Properties of Films Deposited by Cathode Sputtering . . . . .	98
4.5 Crystallographic Structure of Thin Films . . . . .	102
4.6 Epitaxial Films . . . . .	110

#### 5. Composition, Morphology and Structure of Thin Films

5.1 Methods for Determination of Chemical Composition of Films . . . . .	115
5.2 Electron Microscopy of Thin Films . . . . .	118
5.2.1 Transmission Electron Microscopy . . . . .	118
5.2.2 Electron-microscopic Examination of Surface by Replica Method . . . . .	128
5.2.3 Special Types of Electron Microscopes for Direct Image-forming of Film Surface . . . . .	130
5.2.31 Scanning Microscope . . . . .	130
5.2.32 Reflection Microscope . . . . .	131
5.2.33 Emission Microscopes . . . . .	132
5.2.4 Tunnel Emission and Field Ionization . . . . .	133
5.2.41 Field Electron Microscope . . . . .	135
5.2.42 Field Ion Microscope . . . . .	138
5.3 Diffraction of Electrons . . . . .	139
5.3.1 Diffraction of High-Energy Electrons in Transmission and in Reflection . . . . .	140
5.3.2 Low-Energy Electron Diffraction (LEED) . . . . .	144
5.4 X-ray Methods . . . . .	147
5.4.1 X-ray Diffraction . . . . .	147
5.4.2 X-ray Microscopy . . . . .	147
5.5 Auger Spectroscopy . . . . .	148

#### 6. Properties of Thin Films

6.1 Mechanical Properties . . . . .	151
6.1.1 Experimental Methods for Measurement of Mechanical Properties of Thin Films . . . . .	152
6.1.2 Stress in Thin Films . . . . .	155
6.1.3 Mechanical Constants of Thin Films . . . . .	157
6.1.4 Adhesion of Thin Films . . . . .	158
6.1.5 Rayleigh Surface Waves . . . . .	160

6.2 Electrical and Magnetic Properties of Thin Films . . . . .	162
6.2.1 Conductivity of Continuous Metal Films . . . . .	163
6.2.2 Conductivity of Discontinuous Metal Films . . . . .	170
6.2.3 Electrical Properties of Semiconducting Thin Films . . . . .	176
6.2.4 Galvanomagnetic Effects in Thin Films . . . . .	180
6.2.5 Superconductivity in Thin Films . . . . .	184
6.2.6 Conductivity of Thin Dielectric Films . . . . .	196
6.2.7 Dielectric Properties of Thin Films . . . . .	209
6.2.8 Ferromagnetic Properties of Thin Films . . . . .	213
6.3 Optical Properties of Thin Films . . . . .	221

## 7. Application of This Films

7.1 Optical Applications . . . . .	224
7.2 Applications in Electronics . . . . .	227
7.2.1 Electric Contacts, Connections and Resistors . . . . .	228
7.2.2 Capacitors and Inductances . . . . .	230
7.2.3 Applications of Ferromagnetic and Superconducting Films . . . . .	231
7.2.4 Active Electronic Elements . . . . .	236
7.2.5 Microacoustic Elements Using Surface Waves . . . . .	238
7.2.6 Integrated Circuits (IC) . . . . .	240
7.2.7 Thin Films in Optoelectronics and Integrated Optics . . . . .	242
7.2.8 Further Applications . . . . .	245
References . . . . .	246
Index . . . . .	248
