

Contents

	Problems	Solutions
Preface		v
1 Crystallography and Crystal Structures R.A.L.SULLIVAN	3	101
2 Growth of Crystals D.T.J.HURLE	9	119
3 Chemical Bonds and Lattice Energy J.L.BREBNER and E.MOOSER	11	124
4 Elasticity of Crystals J.R.DRABBLE	23	153
5 Thermal Properties of the Crystal Lattice J.A.MORRISON, D.M.T.NEWSHAM, and R.D.WEIR	31	167
6 Defects in Crystals K.H.G.ASHBEE	37	189
7 Dielectricity T.H.BEEFORTH	44	222
8 Diamagnetism and Paramagnetism A.H.MORRISH	48	233
9 Ferromagnetism, Antiferromagnetism and Ferrimagnetism A.H.MORRISH	53	257
10 Magnetic Resonance P.T.SQUIRE	61	289
11 Electron Theory of Metals P.M.LEE	68	306
12 Energy Band Structures P.M.LEE	74	325
13 Properties of Homogeneous Semiconductors J.P.McKELVEY	78	345
14 Semiconductor Junctions A.K.JONSCHER	84	392
15 Optical Properties of Solids M.CARDONA	86	409
16 Superconductivity H.J.GOLDSMID	92	436
Table of Physical Constants and Conversion Factors		459
Subject Index		461
