

Contents for subvolumes VI/2a and VI/3a

The contents of the present subvolume VI/3a is indicated in roman. Sections of the former subvolume VI/2a which have not been supplemented in the present subvolume VI/3a are referred to in italic.

		Pages in	
		VI/2a	VI/3a
1 Astronomical instruments			
1.1	Optical telescopes	<i>1</i>	-
1.1.1	<i>Introduction</i>	<i>1</i>	-
1.1.2	<i>Optics</i>	<i>1</i>	-
1.1.3	<i>Mounting</i>	<i>3</i>	-
1.1.4	<i>Drive and control</i>	<i>4</i>	-
1.1.5	<i>Building and dome</i>	<i>5</i>	-
1.1.6	<i>Future developments</i>	<i>6</i>	-
	New and future developments (R. WOLF, U. HOPP)	-	1
	References for 1.1.6	-	1
1.1.7	<i>List of large optical telescopes erected after 1960</i>	<i>6</i>	-
	Updated list of large optical telescopes erected after 1960 (R. WOLF, U. HOPP)	-	2
	References for 1.1.7	-	10
1.1.8	<i>References for 1.1.7</i>	<i>11</i>	-
1.1.9	<i>General references for 1.1</i>	<i>12</i>	-
1.2	Solar telescopes (C. J. DURRANT)	<i>13</i>	12
	References for 1.2	<i>17</i>	16
1.3	Photoelectric photometry	<i>18</i>	17
1.3.0	<i>Symbols and definitions</i>	<i>18</i>	-
1.3.1	<i>Acronyms and nomenclature</i>	<i>18</i>	-
1.3.2	<i>Photoelectric radiation detectors</i>	<i>18</i>	-
1.3.3	<i>Measuring techniques</i>	<i>21</i>	-
1.3.4	<i>High speed photometry</i>	<i>21</i>	-
1.3.5	<i>Detectors for two-dimensional (imaging) photometry</i>	<i>21</i>	-
1.3.6	<i>The measured radiant flux</i>	<i>24</i>	-
1.3.7	<i>Accuracy of measurements</i>	<i>25</i>	-
1.3.8	<i>References for 1.3</i>	<i>26</i>	-
1.3.9	Scientific charge-coupled devices (CCDs)	-	17
	1.3.9.1 Functioning of a CCD detector (U. GRASER)	-	17
	1.3.9.1.1 Technical description	-	17
	1.3.9.1.2 A single CCD pixel as a metal-oxide-semiconductor (MOS) device	-	17
	1.3.9.1.3 The read-out process of a CCD	-	19
	1.3.9.1.4 Correlated double sampling in the CCD camera electronics	-	19

1.3.9.2	Characteristic properties of modern CCD-detectors (U. GRASER) . . .	-	20
1.3.9.2.1	Nomenclature for conversion of incident photons into a digital number	-	20
1.3.9.2.2	The measured quantum efficiency QE_{eff}	-	21
1.3.9.2.3	Sensitivity [$\mu V/e^-$]	-	22
1.3.9.2.4	Read-out-noise RON [e^-/pixel]	-	22
1.3.9.2.5	Dark current at a temperature T [K] in [e^-/min] per pixel	-	23
1.3.9.2.6	Linearity and charge capacity [e^-/pixel]	-	23
1.3.9.2.7	On-chip binning, overscan, bias, cosmics, luminescence	-	23
1.3.9.2.8	CCD formats	-	24
1.3.9.2.9	Cosmetics	-	24
1.3.9.2.10	Measuring technique: the photon transfer curve	-	24
1.3.9.3	CCD systems (U. GRASER)	-	26
1.3.9.3.1	The cooling system for the CCD	-	26
1.3.9.3.2	Slow-scan scientific CCD cameras	-	26
1.3.9.3.3	The control computer	-	26
	References for 1.3.9.1-1.3.9.3	-	28
1.3.9.4	CCD data reduction (K. MEISENHEIMER, H.-J. RÖSER)	-	29
1.3.9.5	Photometry (K. MEISENHEIMER, H.-J. RÖSER)	-	31
1.3.9.5.1	List of symbols	-	31
1.3.9.5.2	Simulated aperture photometry	-	32
1.3.9.5.3	Weighted summation and profile fitting	-	32
1.3.9.5.4	Problems in using a CCD as a photometric detector	-	32
1.3.9.5.5	Software packages available for CCD data reduction	-	33
	Reference for 1.3.9.4 and 1.3.9.5	-	33
1.4	Photographic emulsions		26 -
1.4.1	Introduction	26	-
1.4.2	Definitions	27	-
1.4.3	Emulsions in use in astronomy - hypersensitization	27	-
1.4.4	Exposure and calibration	29	-
1.4.5	Processing	29	-
1.4.6	Storage	29	-
1.4.7	Measurements	29	-
1.4.8	Copying	30	-
1.4.9	Outlook	30	-
1.4.10	References for 1.4	30	-
1.5	Spectrometers and spectrographs (J. SOLF)	30	34
1.5.1	Definitions	30	-
1.5.2	Grating spectrometers	31	-
1.5.3	Fabry-Perot spectrometers	32	-
1.5.4	Fourier transform spectrometers	32	-
1.5.5	References for 1.5	32	-
1.5.6	New and future developments	-	34
	References for 1.5.6	-	35
1.6	Optical high-resolution methods	32	36
1.6.1	Michelson's stellar interferometry and related techniques	33	-
1.6.2	Intensity interferometry of Hanbury Brown and Twiss	33	-
1.6.3	Labeyrie's speckle interferometry and related techniques	33	-

1.6.4	<i>References for 1.6</i>	34	-
1.6.5	New developments (G. WEIGELT)	-	36
1.6.5.1	Reconstruction of diffraction-limited images	-	36
1.6.5.2	Speckle spectroscopy	-	37
1.6.5.3	Optical long-baseline interferometry	-	37
	References for 1.6.5	-	37
1.7	X-ray and γ-ray instruments (R. STAUBERT, J. TRÜMPER)	35	38
1.7.1	<i>X-ray instruments</i>	35	-
1.7.1.1	<i>Non-focusing instruments</i>	35	-
1.7.1.1.1	<i>Non-focusing/non-imaging/non-dispersive instruments</i>	35	-
1.7.1.1.2	<i>Non-focusing/imaging instruments</i>	36	-
1.7.1.2	<i>Spectrometers and polarimeters</i>	36	-
1.7.1.3	<i>Focusing X-ray telescopes</i>	37	-
1.7.1.3.1	<i>X-ray mirror systems</i>	37	-
1.7.1.3.2	<i>X-ray imaging detectors</i>	38	-
1.7.1.3.3	<i>Focal plane spectrometers</i>	38	-
1.7.2	<i>γ-ray instruments</i>	38	-
1.7.3	X- and γ -ray satellites	39	38
	References for 1.7.3	-	40
1.7.4	<i>References for 1.7</i>	39	-
1.8	Infrared techniques (D. LEMKE)	42	41
1.8.1	Infrared detectors	42	41
1.8.1.1	Detector types	42	41
1.8.1.2	Detector parameters	43	42
1.8.1.3	<i>Low background detectors</i>	44	-
1.8.2	<i>Atmospheric transmission and emission</i>	44	-
1.8.3	Infrared telescopes	44	43
1.8.3.1	<i>Chopper</i>	45	-
1.8.3.2	Optics of the IR telescope	45	43
1.8.3.3	Telescope platforms	45	44
1.8.3.4	Adaptive optics	-	45
1.8.4	<i>Infrared photometry</i>	45	-
	Infrared photometry and imaging	-	45
1.8.4.1	<i>Photometric bands</i>	46	-
1.8.4.2	<i>Absolute calibration</i>	46	-
1.8.4.3	<i>Limiting magnitudes</i>	46	-
1.8.4.4	<i>Filters</i>	47	-
	Filters and windows	-	45
1.8.5	Infrared spectroscopy	47	46
1.8.5.1	<i>Circular variable filter CVF</i>	47	-
1.8.5.2	<i>Prism, grating</i>	47	-
1.8.5.3	<i>Fourier spectrometer</i>	47	-
1.8.5.4	<i>Fabry-Perot</i>	47	-
1.8.5.5	<i>Heterodyne spectroscopy</i>	47	-
1.8.6	Infrared polarimetry	48	46
1.8.7	<i>Spatial resolution instrumentation</i>	48	-
	High-resolution imaging	-	46
1.8.8	<i>References for 1.8</i>	48	-
	References for 1.8	-	47

1.9	<i>Radio astronomical receiver systems</i>	50	-
	Radio astronomy instrumentation (J. W. BAARS)	-	49
1.9.0	Introduction	-	49
1.9.1	<i>Radiometers (receivers)</i>	50	-
	Radio astronomy receivers	-	49
	<i>References for 1.9.1</i>	50	-
1.9.2	Radio telescopes	51	51
1.9.2.1	Radio telescopes for m wavelengths	51	51
	<i>References for 1.9.2.1</i>	53	-
1.9.2.2	<i>Radio telescopes for the lower dm and cm ranges</i>	53	-
	Radio telescopes for cm wavelengths	-	51
1.9.2.3	<i>Radio telescopes for mm wavelengths</i>	57	-
	Radio telescopes for mm and submm wavelengths	-	55
	<i>References for 1.9.2.2 and 1.9.2.3</i>	60	-
1.9.2.4	Very-long-baseline interferometers (VLBI)	61	59
	<i>References for 1.9.2.4</i>	62	-
1.9.3	Data analysis and image processing	-	64
	References for 1.9	-	65

2 Positions and time determination, astronomical constants

2.1	Determination of astronomical latitude and longitude (G. SOLTAU)	63	68
2.1.1	Introduction	63	68
2.1.2	Polar motion	63	68
2.1.3	Definition and observation of astronomical latitude and longitude	63	69
2.1.4	Definition and realization of the terrestrial reference system	64	70
	2.1.4.1 Origin of the coordinates of the pole	64	70
	2.1.4.2 Origin of longitudes	64	71
2.1.5	<i>Errors in latitude and longitude or time</i>	65	-
2.1.6	Coordinates of observatories	65	72
2.1.7	<i>Polar coordinates</i>	66	-
2.1.8	Further comments	-	72
	References for 2.1	-	72
2.2	Time determination (B. GUINOT)	70	74
2.2.0	<i>Notations in 2.2</i>	70	-
	General trend	-	74
2.2.1	<i>Systems of time measurement</i>	70	-
2.2.2	Sidereal, solar, and universal time	71	74
	2.2.2.1 <i>Definitions of sidereal and solar time, relations between their units</i>	71	-
	2.2.2.2 <i>Universal time (UT)</i>	71	-
	2.2.2.3 <i>Standard times</i>	72	-
	2.2.2.4 <i>Equation of time</i>	72	-
	2.2.2.5 <i>Julian date, modified Julian date; Greenwich sidereal date</i>	72	-
2.2.3	<i>Ephemeris time (ET)</i>	73	-
	2.2.3.1 <i>Definition of epoche and unit, and determination of ephemeris time</i>	73	-
	2.2.3.2 <i>Lengths of the year</i>	73	-
	2.2.3.3 <i>Lengths of the month</i>	74	-
2.2.4	Atomic time	74	75
	2.2.4.1 <i>Definition of the second of the International System of Units (SI)</i>	74	-

2.2.4.2	<i>International atomic time (TAI)</i>	74	-
2.2.4.3	<i>Coordinated universal time (UTC)</i>	74	-
2.2.4.4	<i>Dynamical time for ephemerides (TD)</i>	74	-
2.2.5	<i>Time signals</i>	75	-
2.2.6	<i>Long term fluctuations of the earth's rotation speed</i>	75	-
	Fluctuations of the Earth's rotation speed	-	75
2.2.7	<i>References for 2.1 and 2.2</i>	77	-
2.2.8	<i>Pulsar time</i>	-	75
2.2.9	<i>Relativity in time determination</i>	-	76
2.2.9.1	Proper time and coordinate time	-	76
2.2.9.2	Time metrology on the Earth	-	76
2.2.9.3	Solar system dynamics	-	77
2.2.10	<i>Dissemination of frequency and time</i>	-	77
	<i>References for 2.2</i>	-	77
2.3	The system of astronomical constants (J. SCHUBART)	79	78
2.3.1	<i>Introduction</i>	79	-
2.3.2	<i>Units</i>	79	-
2.3.3	<i>The IAU(1976)system of astronomical constants</i>	80	-
2.3.4	<i>Notes</i>	80	-
2.3.5	<i>References for 2.3</i>	81	-
	<i>References for 2.3</i>	-	78

3 The solar system

3.1	The sun	82	79
3.1.1	<i>The quiet sun</i>	82	79
3.1.1.1	<i>Solar global parameters (C. J. DURRANT)</i>	82	79
	<i>References for 3.1.1.1</i>	83	79
3.1.1.2	<i>Solar interior (C. J. DURRANT)</i>	83	79
3.1.1.2.1	Standard models	83	79
3.1.1.2.2	Non-standard models	84	80
3.1.1.2.3	Solar neutrinos	84	80
3.1.1.2.4	Global oscillations	85	80
3.1.1.2.5	Convection zone	86	82
3.1.1.2.6	Solar rotation	86	83
3.1.1.2.6a	Large-scale flow pattern	-	84
3.1.1.2.7	General magnetic field	87	84
3.1.1.2.8	<i>References for 3.1.1.2</i>	87	-
	<i>References for 3.1.1.2</i>	-	84
3.1.1.3	<i>Solar energy spectrum (C. J. DURRANT)</i>	89	86
3.1.1.3.1	Absolute energy distribution	89	86
3.1.1.3.2	Relative energy distribution	91	87
3.1.1.3.3	Limb polarization	94	87
3.1.1.3.4	<i>References for 3.1.1.3</i>	94	-
	<i>References for 3.1.1.3</i>	-	87
3.1.1.4	<i>Solar photosphere and chromosphere (C. J. DURRANT)</i>	96	89
3.1.1.4.1	Models	96	89
3.1.1.4.2	NLTE studies	98	89
3.1.1.4.3	Morphology of the solar photosphere and chromosphere	99	89
3.1.1.4.3.1	Granulation	99	89

	3.1.1.4.3.2	Supergranulation and network	99	90
	3.1.1.4.3.3	Oscillations	99	90
	3.1.1.4.3.4	Network elements	99	90
	3.1.1.4.4	<i>References for 3.1.1.4</i>	100	-
		References for 3.1.1.4	-	90
3.1.1.5		Solar transition region and quiet corona (C. J. DURRANT)	102	91
	3.1.1.5.1	Models	102	91
	3.1.1.5.2	Physical parameters	102	91
	3.1.1.5.3	Diagnostics	103	92
	3.1.1.5.4	Morphology	103	92
	3.1.1.5.5	<i>References for 3.1.1.5</i>	103	-
		References for 3.1.1.5	-	92
3.1.1.6		Radio emission of the quiet sun (R. STEWART)	105	93
	3.1.1.6.1	Flux density of the quiet sun	105	93
		<i>References for 3.1.1.6.1</i>	106	-
	3.1.1.6.2	The brightness distribution across the solar disk	107	93
		<i>References for 3.1.1.6.2</i>	111	-
		References for 3.1.1.6	-	94
3.1.2		Solar activity	112	94
3.1.2.1		Active regions (C. J. DURRANT)	112	94
	3.1.2.1.1	Features of active regions	112	94
	3.1.2.1.2	Active region development	112	94
	3.1.2.1.3	Spotgroups	112	95
	3.1.2.1.4	Activity indices, global data (daily values)	112	95
	3.1.2.1.5	<i>References for 3.1.2.1</i>	112	-
		References for 3.1.2.1	-	95
3.1.2.2		11-year solar cycle (C. J. DURRANT)	113	96
		References for 3.1.2.2	113	97
3.1.2.3		Sunspots (C. J. DURRANT)	113	98
	3.1.2.3.1	General characteristics	113	98
	3.1.2.3.2	Magnetic field	114	98
	3.1.2.3.3	Spot umbra	114	98
	3.1.2.3.4	Spot penumbra	116	98
	3.1.2.3.5	<i>Sunspot energy</i>	116	-
	3.1.2.3.6	<i>References for 3.1.2.3</i>	116	-
		References for 3.1.2.3	-	99
3.1.2.4		Faculae and plages (C. J. DURRANT)	118	100
	3.1.2.4.1	Continuum	118	100
	3.1.2.4.2	Facula models	118	100
	3.1.2.4.3	Chromospheric plage	119	100
	3.1.2.4.4	<i>References for 3.1.2.4</i>	119	-
		References for 3.1.2.4	-	100
3.1.2.5		Prominences and ejecta (C. J. DURRANT)	120	101
	3.1.2.5.1	<i>General characteristics</i>	120	-
	3.1.2.5.2	Prominence spectrum	120	101
	3.1.2.5.3	Physical characteristics of quiescent prominences	120	101
	3.1.2.5.4	Ejections	121	101
	3.1.2.5.5	Interface prominence - corona	121	101
	3.1.2.5.6	<i>References for 3.1.2.5</i>	122	-
