

CONTENTS

<i>Contributors</i>	v
<i>Preface</i>	vii
Section 1. <i>Fluid Properties</i>	1-1
Section 2. <i>Basic Equations of Fluid Flow</i>	2-1
Section 3. <i>One-dimensional Flow</i>	3-1
Section 4. <i>Ideal-fluid Flow</i>	4-1
Section 5. <i>Laminar Flow</i>	5-1
Section 6. <i>Transport Phenomena in Multicomponent Systems</i>	6-1
Section 7. <i>Flow of Non-Newtonian Fluids</i>	7-1
Section 8. <i>Compressible Flow</i>	8-1
Section 9. <i>Boundary-layer Theory</i>	9-1
Section 10. <i>Turbulence</i>	10-1
Section 11. <i>Separation and Stall</i>	11-1
Section 12. <i>Cavitation</i>	12-1
Section 13. <i>Motion of Immersed and Floating Bodies</i>	13-1
Section 14. <i>Flow Measurement</i>	14-1
Section 15. <i>Dimensional Analysis</i>	15-1
Section 16. <i>Flow through Porous Media</i>	16-1
Section 17. <i>Two-phase Flow</i>	17-1
Section 18. <i>Sedimentation</i>	18-1
Section 19. <i>Turbomachinery</i>	19-1
Section 20. <i>Fluid Transients in Engineering Systems</i>	20-1
Section 21. <i>Conversion, Transmission, and Control of Fluid Power</i>	21-1
Section 22. <i>Lubrication Mechanics</i>	22-1
Section 23. <i>Thermal-jet and Rocket-jet Propulsion</i>	23-1
Section 24. <i>Open-channel Flow</i>	24-1
Section 25. <i>The Digital Computer for Fluid-flow Calculations</i>	25-1
Section 26. <i>Stratified Flow</i>	26-1
Section 27. <i>Magnetohydrodynamics</i>	27-1
<i>Author Index and Subject Index follow Section 27</i>
