

Contents

<i>Preface</i>	x
<i>Editorial Note</i>	xi
SESSION 1 Chairman: T. Roca Cortés	
Invited Reviews	
Atmospheric Structure and the Activity Cycle <i>H. Holweger</i>	1
Line Asymmetry and the Activity Cycle <i>W. Livingston</i>	14
Oral Presentations	
Meridional Flows and Latitudinal Dependence of the Convection <i>F. Cavallini, G. Ceppatelli, A. Righini</i>	21
The Limb Shift Effect and its Variation with the Solar Cycle <i>M. Anguera, P. L. Pallé, C. Régulo, T. Roca Cortés, G. R. Isaak, C. P. McLeod, H. B. van der Raay</i>	24
Posters	
On the Differences between Line Bisectors in Quiet and Active Sun <i>C. Marmolino, G. Roberti, G. Severino</i>	30
Center-to-Limb Variation of the Asymmetries of the K 7699 Å line in Solar Quiet and Active Regions <i>J. A. Bonet, I. Marquez, M. Vázquez, H. Wöhl</i>	32
SESSION 2 Chairman: R. Rosner	
Invited Review	
Interaction between Magnetic Fields and Convection <i>N. E. Hurlburt, N. O. Weiss</i>	35
Oral Presentations	
A 2D Study of Compressible Granular Flow and Predicted Spectroscopic Properties <i>M. Steffen</i>	47
On the Correlation of the C-Shape of the FeI-Line 5576 Å with the Brightness of Ca ⁺ K-Faculae <i>S. Immerschitt, E.-H. Schröter</i>	53
Joint Discussion on Topics of Sessions 1 and 2 <i>T. Roca Cortés, R. Rosner</i>	61

SESSION 3 Chairman: <i>J. O. Stenflo</i>	
Invited Review	
Structure of Magnetic Flux tubes as derived from Observations with Moderate Spatial Resolution	67
<i>S. K. Solanki</i>	
Oral Presentations	
FTS Measurements of Solar Line Asymmetries in Quiet and Active Regions	82
<i>P. N. Brandt, S. K. Solanki</i>	
Numerical Simulations of Umbral Stokes-V Profiles Considering Influences of Unresolved Dots	88
<i>K.-D. Pahle</i>	
SESSION 4 Chairman: <i>W. Mattig</i>	
Invited Review	
Needs and Limits of Magnetic and Velocity Field Measurements with Sub-Arcsecond Resolution	93
<i>E. Wiehr</i>	
Oral Presentations	
Properties of a Concentrated Magnetic Field Region	103
<i>S. Koutchmy, G. Stellmacher</i>	
Drift Velocities in Flux Tubes Inferred by Spatially Averaged Line Bisectors	110
<i>F. Cavallini, G. Ceppatelli, A. Righini</i>	
Joint Discussion on Topics of Sessions 3 and 4	116
<i>J. O. Stenflo, W. Mattig</i>	
SESSION 5 Chairman: <i>C. Zwaan</i>	
Invited Review	
Types of Magnetic Flux Emergence	118
<i>A. Title</i>	
Oral Presentations	
Observations of the Magnetic Fine Structure of a Facula	
<i>J. C. del Toro Iniesta, M. Semel, M. Collados</i>	
Asymmetry of Stokes Profiles across a Sunspot; Measurements	131
<i>K. S. Balasubramaniam</i>	
Posters	
Sunspot Proper Motions as a Tool for the Study of the Behaviour of Rising Magnetic Flux Tubes	136
<i>F. Mazzucconi, G. Godoli</i>	
SESSION 6 Chairman: <i>P. Maltby</i>	
Invited Review	
Established and Non-Established Properties of Umbral and Penumbral Fine Structures	140
<i>J. I. García de la Rosa</i>	
Oral Presentation	
Photospheric Fine Structure Close to a Sunspot	156
<i>O. von der Lühe</i>	
Poster	
High Resolution Spectroscopy of Sunspot Penumbrae	162
<i>E. Wiehr, M. Knölker, H. Grosser, G. Stellmacher</i>	
Joint Discussion on Topics of Sessions 5 and 6	165
<i>C. Zwaan and P. Maltby</i>	

SESSION 7 Chairman: <i>H. U. Schmidt</i>	
Invited Review	
The Subsurface Structure of Sunspots and the Origin of Solar Active Regions	167
<i>F. Moreno-Insertis</i>	
Oral Presentations	
The Wilson Effect in Sunspots	183
<i>M. Collados, J. C. del Toro Iniesta, M. Vázquez</i>	
A New Mechanism for the Evershed Effect	187
<i>F. H. Busse</i>	
Poster	
Decay Rates of Sunspot Groups from 1874 to 1939	196
<i>F. Moreno-Insertis, M. Vázquez</i>	
SESSION 8 Chairman: <i>A. Righini</i>	
Invited Review	
How is the Penumbra formed?	199
<i>H. C. Spruit</i>	
Oral Presentations	
Nonlinear Compressible Convection in Regions of Intense Magnetic Fields	210
<i>N. E. Hurlburt</i>	
The Intensity Distribution in Sunspot Penumbrae	214
<i>M. Collados, J. C. del Toro Iniesta, M. Vázquez</i>	
Joint Discussion on Topics of Sessions 7 and 8	
<i>H. U. Schmidt</i>	
SESSION 9 Chairman: <i>P. Mein</i>	
Invited Review	
Structure and Dynamics of Small Magnetic Flux Concentrations: Observation versus Theory	223
<i>M. Schüssler</i>	
Oral Presentations	
Adiabatic Longitudinal-Transverse Magnetohydrodynamic Tube Waves	243
<i>Kurt Zähringer, Peter Ulmschneider</i>	
Stability of Magnetic Arcades	248
<i>U. Anzer, A. W. Hood</i>	
Poster	
Thermal Dissipation in Slender Flux Tubes and Structured Media	250
<i>P. Edwin, B. Roberts</i>	
SESSION 10 Chairman: <i>B. Roberts</i>	
Invited Review	
Wave and Thermal Instabilities in Flux Tubes: Their Role for the Structure of the Chromosphere and Transition Region	255
<i>R. Hammer</i>	
Oral Presentations	
Non-Linear Alfvén-Waves and the Fine Structure of Magnetic Fields in the Photosphere	274
<i>E. Jensen</i>	
Poloidal Mode Coupling of Alfvén Continuum Modes in 2D Coronal Loops	272

<i>S. Poedts, M. Goossens</i>	
Radiative Relaxation in Small Scale Structures	281
<i>J. Trujillo-Bueno, F. Kneer</i>	
Poster	
Some Statistical Properties of the Magnetic Field in Prominences	289
<i>I. Kim, S. Koutchmy, G. Stellmacher, A. I. Stepanow</i>	
Joint Discussion on Topics of Sessions 9 and 10	292
<i>P. Mein, B. Roberts</i>	
SESSION 11 Chairman: W. Deinzer	
Invited Review	
Appearance and Disappearance of Magnetic Flux at the Solar surface	297
<i>E. R. Priest</i>	
Oral Presentations	
Transition Zone Flows in Sunspots	317
<i>O. Kjeldseth-Moe, N. Brynildsen, O. Engvold, P. Maltby,</i>	
<i>J.-D. F. Bartoe, G. E. Brueckner</i>	
Overshoot of the Solar Granulation	322
<i>A. Nesis</i>	
Joint Discussion on Topics of Session 11	328
<i>W. Deinzer</i>	
SESSION 12 Chairman: J. Zirker	
Solar Instrumentation	
Oral Presentations	
Cross Correlation of Images of Solar Fine Structure and Possible	
Applications – a Progress Report	330
<i>T. A. Darvann</i>	
The Swedish Fabry-Perot Echelle Scanner as a Two-Dimensional	
Universal Filter and Stokesmeter	335
<i>A. A. Wyller</i>	
Poster	
Imaging Interferometry with Non-Redundant Arrays	342
<i>J. B. Zirker</i>	
Magnetic Field Measurements with the Swedish Solar Telescope on	
La Palma	343
<i>H. Lundstedt</i>	
Joint Discussion on Topics of Session 12	348
<i>J. B. Zirker</i>	
Presentations	
The Swedish 50 cm Vacuum Solar Telescope: Concepts and Auxiliary	
Instrumentation	349
<i>G. B. Scharmer</i>	
Present and Future Facilities for the Vacuum Gregory Coudé	
Telescope at Izaña	354
<i>E. Wiehr</i>	
Present and Future Observational Facilities of the German Vacuum	
Tower Telescope	362
<i>D. Soltau</i>	

The French Polarization-Free Telescope THEMIS <i>J. Rayrole</i>	367
Other Solar Facilities at the Observatorio del Teide <i>M. Vázquez</i>	370
Round Table Discussion	
Chairmen: <i>E.-H. Schröter, M. Vázquez, A. Wyller</i>	
What can be done best, what with restrictions, and what can not be done with the presently foreseen facilities on the Canary Islands?	
What extensions of these facilities are desirable?	
What are the candidate problems for future integrated observational experiments, for which all available solar observing facilities could be used simultaneously?	
Summary of the Round Table Discussion <i>R. B. Dunn</i>	374
List of Participants	377
