

## *Contents*

Foreword	
List of Authors	
Introduction	
B. S. P. Shen	1
Chapter 1.	
High Energy Nuclear Reactions	
J. M. Miller	19
Chapter 2.	
Fragmentation of "Heavy" Cosmic Rays in the Galaxy	
Maurice M. Shapiro and Rein Silberberg	37
Chapter 3.	
Origin of the Rare Light Nuclides	
Henri E. Mitler	59
Chapter 4.	
Stellar Observations of Rare Light Elements	
I. J. Danziger	81
Chapter 5.	
High Energy Nuclear Reactions in Solar Flares	
R. E. Lingenfelter and R. Ramaty	99
Chapter 6.	
Neutron Production by Cosmic Rays in the Atmosphere	
S. A. Korff and R. B. Mendell	159
Chapter 7.	
Nuclide Production by Cosmic Rays in Meteorites and on the Moon	
Truman P. Kohman and Michael L. Bender	169
Chapter 8.	
Production of Li, Be, and B Isotopes in C, N, and O	
Elie Gradsztajn	247
Chapter 9.	
Survey of Experimental Cross Sections for Proton Induced Spallation Reactions in He <sup>4</sup> , C <sup>12</sup> , N <sup>14</sup> , and O <sup>16</sup>	
Jean Audouze, Marcelle Epherre, and Hubert Reeves	255
Chapter 10.	
Nuclear Cross Sections Required in Studies of Cosmic Rays	
D. V. Reames	273
