TABLE OF CONTENTS

INTRODUCTION xi

CHAPTER I. Almost Periodic Function and Mean Motion 1

1. Almost periodic functions 1
2. The mean month and year 14
3. The motion of the sun 18
4. The motion of the moon 24
5. The planets 34

APPENDIX : CHAPTER I . Mean Motion , the Ergodic Theorem and the Bohr Approximation Theorem 36

1. The problem of mean motion 36
2. Wintner's formula 39
3. Weyl's argument 46
4. The ergodic theorem 55
5. Examples of ergodic transformations 64
6. Almost period functions and compact groups 65
7. The mean ergodic theorem and the Haar integral. 68
8. The Peter-Weyl theorem 78
9. The Bohr approximation theorem 86

CHAPTER II . Kepler and After 94

1. Kepler 94
2. Elliptic motion 100
3. Newtonian mechanics 104
4. The three body problem 105
5. The method of Lagrange 108
6. Hill's lunar theory and the restricted three body problem 117
7. The general theory of relativity 129
