

## TABLE OF CONTENTS

|  |     |
|--|-----|
| INTRODUCTION   | xi  |
| CHAPTER III. Small Divisors                              |     |
| 1. Differential equations on the torus                   | 1   |
| 2. Linearizing the flow                                  | 11  |
| 3. Linear difference equation in angular variables       | 15  |
| 4. The rotation number                                   | 26  |
| 5. The implicit function problem                         | 34  |
| 6. Newton's method                                       | 37  |
| 7. The Kolmogorov-Arnold-Moser implicit function theorem | 56  |
| 8. The circle problem                                    | 84  |
| 9. The Siegel center theorem                             | 92  |
| 10. The circle problem again                             | 103 |
| 11. The Moser twist theorem                              | 111 |
| 12. The Kolmogorov-Arnold theorem                        | 120 |
| 13. The differentiable case                              | 130 |
| 14. Vector fields near a torus                           | 171 |
| 15. The Birkhoff fixed point theorem                     | 188 |
| 16. The billiard ball problem                            | 199 |

|  |     |
|--|-----|
| APPENDIX I: The transversal cycle                              | 206 |
| APPENDIX II: The Nash embedding theorem                        | 213 |
| CHAPTER IV. The three body problem                             |     |
| 1. Hamiltonian mechanics                                       | 225 |
| 2. The Hamilton-Jacobi method                                  | 238 |
| 3. Kepler motion   | 241 |
| 4. The restricted three body problem                           | 249 |
| 5. Poincare variables and periodic orbits of<br>the first kind | 257 |
| 6. Behavior near the periodic solutions of the<br>first kind   | 266 |
| 7. Periodic solutions of the second kind                       | 274 |
| 8. The Jacobi reduction of the three body<br>problem           | 279 |
| 9. Elimination of the nodes                                    | 292 |
| REFERENCES   | 294 |
