

TABLE OF CONTENTS

INTRODUCTORY REMARKS	VII
THE ORGANIZING COMMITTEES	VIII
LIST OF PARTICIPANTS	IX
J. W. NEGELE / The Equation of State of Matter at Sub-Nuclear Density	1
H. A. BETHE / Equation of State at Densities Greater than Nuclear Density	27
V. R. PANDHARIPANDE / Variational Method for Dense Systems	47
J. R. BUCHLER / Properties and Synthesis of Heavy Nuclei and Properties of Neutron Star Matter	67
J. C. WHEELER / 'Statistical Bootstrap' Equation of State for Cold Ultra-Dense Matter	77
Y. C. LEUNG and C. G. WANG / A Simple Equation of State of Matter at Super-Nuclear Densities	93
R. F. SAWYER / Pions in Neutron Star Matter	105
Y. NE'EMAN / Hypercollapsed Nuclear Matter	111
M. RUDERMAN / Matter in Superstrong Magnetic Fields	117
V. CANUTO and S. M. CHITRE / Quantum Crystals in Neutron Stars	133
G. GREENSTEIN / Superfluidity in Neutron Stars	151
J. P. HANSEN, B. JANCOVICI, and D. SCHIFF / Phase Diagram of a Charged Bose Gas (Abstract Only)	167
G. KALMAN and S. T. LAI / Superluminal Sound and Ferromagnetic Transition in the Zeldovich Model	169
S. A. COLGATE / Supernovae and Neutron Stars	183
D. PINES, J. SHAHAM, and M. A. RUDERMAN / Neutron Star Structure from Pulsar Observations	189
S. TSURUTA / Cooling of Dense Stars	209
G. BÖRNER and J. M. COHEN / Pulsar Observations and Neutron Star Models	227
J. M. COHEN and G. BÖRNER / Hadron Star Models	237
H. M. VAN HORN / Differential Rotation in Degenerate Stars	251
F. K. LAMB and P. G. SUTHERLAND / Continuum Polarization in Magnetic White Dwarfs	265

R. F. O'CONNELL / Polarized Radiation from White Dwarfs and Atoms in Strong Magnetic Fields	287
R. OMNÈS / Matter-Antimatter Separation and the Antimatter Problem in Cosmology	301
Y. NE'EMAN / Quasar Counts and the Lagging Core Model ('White Holes')	319
A. G. W. CAMERON / Concluding Remarks	321
