

## TABLE OF CONTENTS

PREFACE	VII
LIST OF PARTICIPANTS	IX

### PART I / SPHERICAL SYSTEMS

L. SPITZER, JR. / Dynamical Theory of Spherical Stellar Systems with Large $N$ ( <i>Invited Paper</i> )	3
D. LYNDEN-BELL / Homology in the Evolution of Cluster Cores	27
L. COHEN / Correlation Functions for the Gravitational Force	33
G. SEVERNE and A. KUSZELL / Vibrations of Non-Uniform Spherical Systems	47
D. W. KEENAN and K. A. INNANEN / Tidal Effects on Spherical Stellar Systems	53
S. J. AARSETH / $N$ -Body Simulations ( <i>Invited Paper</i> )	57
G. JANIN and M. J. HAGGERTY / The Simulation of Non-Isolated Expanding Gravitational Systems	61
R. H. MILLER / Numerical Experiments on the Tensor Virial in $N$ -Body Systems	65
D. C. HEGGIE / The Dynamical Evolution of Binaries in Clusters	73
R. H. MILLER / Binary Evolution in Stellar Systems	95
I. R. KING / The Structure of Round Stellar Systems: Observation and Theory ( <i>Invited Paper</i> )	99
R. WIELEN / Dynamics of Star Clusters: Comparison of Theory with Observations and Simulations ( <i>Invited Paper</i> )	119
M. HÉNON / Two Recent Developments Concerning the Monte Carlo Method	133
G. ILLINGWORTH / Dynamical Masses and Mass-to-Light Ratios for Globular Clusters	151
G. PELS, J. H. OORT, and Mrs H. A. PELS-KLUYVER / Structure of the Hyades Cluster	159
M. LECAR / Dynamical Friction in the Coma Cluster	161
S. M. ALLADIN, A. POTDAR, and K. S. SASTRY / Formation of Double Galaxies by Tidal Capture	167

### PART II / FLATTENED SYSTEMS

M. R. FEIX / Crossfertilization Between Plasma, Stellar Dynamics and Hydrodynamics	179
C. HUNTER / Ellipsoidal Stellar Systems	195
T. S. VAN ALBADA / A Method for Solving Poisson's Equation for Systems with Axial Symmetry	205

C. P. WILSON / Dynamical Models of Elliptical Galaxies	207
G. CONTOPOULOS / Integrals of Motion ( <i>Invited Paper</i> )	209
L. MARTINET / On the Sensitivity of the Behaviour of Stellar Orbits to the Parameters of Simple Galactic Mass Models	227
P. O. VANDERVOORT / Resonant Stellar Orbits in Spiral Galaxies	237
P. PIŞMIŞ / Is There a Third Integral of Motion?	245
R. B. LARSON / The Collapse and Formation of Galaxies ( <i>Invited Paper</i> )	247
J. R. GOTT III / On the Formation of Elliptical Galaxies	271
A. BRAHIC / Numerical Study of a Gravitating System of Colliding Particles; Formation and Dynamics of Discs	287
J. M. BARDEEN / Global Instabilities of Discs ( <i>Invited Paper</i> )	297
P. BIERMANN / Theoretical Limits on the Properties of Low-Velocity M-Dwarfs	321
M. SCHMIDT / Problems Associated with the M-Dwarf Population	325
M. S. ROBERTS / The Rotation Curves of Galaxies	331
J. E. BALDWIN / $M/L$ Ratios in Galactic Disks	341
F. HOHL / $N$ -Body Simulations of Discs ( <i>Invited Paper</i> )	349
K. C. FREEMAN / Comparison with Observations of Disk Galaxies ( <i>Invited Paper</i> )	367
F. BERTOLA and M. CAPACCIOLI / Dynamics of Early Type Galaxies	373

### PART III / NUCLEI

W. C. SASLAW / Galactic Nuclei and Compact Supermassive Objects ( <i>Invited Paper</i> )	379
M. J. VALTONEN / Symmetric Ejection of Massive Objects from Galactic Nuclei	395
S. CLAIREMIDI et A. HAYLI / Expériences numériques sur l'éjection de masses depuis le centre d'un disque d'étoiles	405

### PART IV / RELATIVISTIC STELLAR DYNAMICS

J. R. IPSER / Dynamics of Relativistic Stellar Systems ( <i>Invited Paper</i> )	423
E. D. FACKERELL / The Concentric Shell Method for Relativistic Star Clusters	433

### PART V / GENERAL CONCLUSION AND FINAL DISCUSSION

D. LYNDEN-BELL / Do Stellar Systems Agree with the Singular Evolution of $N$ -Body Systems?	443
FINAL DISCUSSION	447
INDEX OF NAMES	
INDEX OF SUBJECTS	457
