

TABLE OF CONTENTS

FOREWORD	ix
I. MAGNETIC FIELDS IN STELLAR PHOTOSPHERES	1
Observations of Magnetic Fields on Late-type Stars	
G.W. Marcy (Invited Review)	3
Long-term Coherent Periodicities in the Mean Magnetic Field of the Sun	
V.A. Kotov and L.S. Levitsky	23
Methods and Results for Detecting Magnetic Fields on Late-type Stars	
M.S. Giampapa and S.P. Worden	29
Zeeman Effect Observations in the RS CVn Star HR 5110 and in	
Late-type Stars with Strong Ca II Emission	
W.K. Bonsack and T. Simon	35
Theory of Photospheric Magnetic Fields	
H.C. Spruit (Invited Review)	41
Solitons in Magnetic Flux Tubes	
B. Roberts	61
Self-consistent Models for Small Photospheric Flux Tubes	
W. Deinzer, G. Hensler, D. Schmitt, M. Schüssler, and E. Weisshaar	67
Time-dependent Convective Collapse of Flux Tubes	
S.S. Hasan	73
Numerical 3-D Simulations of the Collapse of Photospheric Flux Tubes	
Å. Nordlund	79
Chromospheric and Coronal Indicators of Stellar Magnetic Structure	
C. Zwaan (Invited Review)	85
II. ROTATION - ACTIVITY - CYCLE - AGE CONNECTION : OBSERVATIONS	99
The Observed Relationships between Some Solar Rotation Parameters	
and the Activity Cycle	
R. Howard and B.J. LaBonte (Invited Review)	101
The Mount Wilson Program for Stellar Activity Cycles	
A.H. Vaughan (Invited Review)	113
The Relation between Rotation and Magnetic Activity on Lower	
Main Sequence Stars as Derived from Chromospheric Indicators	
R.W. Noyes (Invited Review)	133
Magnetic Fields and Convection: New Observations	
W.C. Livingston	149
Possibilities and Attempts to Determine the Differential Rotation on	
F-type Main-sequence Stars	
H. Wöhl	155

IUE Observations of the Chromospheric Activity–Age Relation in Young Solar-type Stars	
T. Simon and A.M. Boesgaard	161
Stellar X-ray Emission as an Indicator of Stellar Magnetic Activity	
G.S. Vaiana (Invited Review)	165
Fractional Stellar Convection Zone Depth and the Generation of Magnetic Flux: An Empirical Approach	
M.S. Giampapa	187
The Coronal Rotation–Activity Relations in Late-type Stars	
F. M. Walter	193
Period–Activity Relations in Close Binary Systems	
G. Basri, R. Laurent, and F. Walter	199
Coronal Activity in F-, G-, and K-type Stars; Empirical Relations between Stellar Parameters	
R. Mewe, C.J. Schrijver, E.H.B.M. Gronenschild, and C. Zwaan	205
III. THEORY OF STELLAR MAGNETIC FIELD GENERATION	211
Stellar Dynamo Theory	
M. Schüssler (Invited Review)	213
A Molecular Weight Gradient Battery Mechanism for Stellar Magnetic Fields	
L. Mestel and D. Moss	237
Topological Magnetic Flux Pumping Revisited	
W. Arter	243
Dynamos of the Sun and Stars, and Associated Convection Zone Dynamics	
P.A. Gilman (Invited Review)	247
Helical and Non-helical Dynamos	
U. Frisch, A. Pouquet, and M. Meneguzzi	271
A Quantitative Study of Magnetic Flux Transport on the Sun	
N.R. Sheeley, Jr., J.P. Boris, T.R. Young, Jr., C.R. DeVore, and K.L. Harvey	273
On the Stellar Rotation–Activity Connection	
R. Rosner (Invited Review)	279
Amplification of Magnetic Fields by Compressible Convection	
M.R.E. Proctor	301
Periodic and Aperiodic Behaviour in Stellar Dynamos	
F. Cattaneo, C.A. Jones, and N.O. Weiss	307
IV. THE ROLE OF MAGNETIC FIELDS IN THE STRUCTURE AND ENERGY BALANCE OF STELLAR ATMOSPHERES	311
The Role of Magnetic Fields in Stellar Chromospheres and Transition Regions	
J.L. Linsky (Invited Review)	313
The Magnetic Field Configuration in Solar and Stellar Chromospheres	
U. Anzer and D.J. Galloway	339
Empirical Scaling Laws for Coronal Heating	
L. Golub (Invited Review)	345
Radio Wavelength Observations: Structure, Strength and Variability of Magnetic Fields in the Transition Region and the Solar Corona	
K.R. Lang	363

Coronal and Chromospheric Structures in AR Lac:	
I. Data and Models	
D.M. Gibson, F.M. Walter, and G.S. Basri	369
The Role of Magnetic Fields in the Heating of Stellar Atmospheres – Theory	
C. Chiuderi (Invited Review)	375
VLA Observations of Quiescent and Flare Microwave Emission from Late-type Stars: A Unique Probe of Coronal Magnetic Fields	
D.E. Gary, J.L. Linsky, and G.A. Dulk	387
Electrodynamic Coupling in Magnetically Confined Stellar X-ray Loops	
J.A. Ionson	391
A Thermal Catastrophe in a Resonantly Heated Coronal Loop	
P.C.H. Martens and M. Kuperus	397
Finite Amplitude Effects of Torsional Alfvén Waves in a Flux Tube	
Ø. Andreassen and P. Maltby	401
Observations of Alfvén Waves Simultaneously in Hα and K	
R.G. Giovanelli and J. Beckers	407
Heating of Intense Magnetic Flux Tubes by Magnetohydrodynamic Waves	
Z. Musielak and E. Bielicz	413
V. STELLAR WINDS AND SPINDOWN IN LATE-TYPE STARS	417
Stellar Winds and Spindown – Observations	
L. Hartmann (Invited Review)	419
Angular Momentum Loss and Chromospheric Activity in Late-type Dwarfs	
D.R. Soderblom	439
Magnetic Topology and the Heating of Extended Chromospheres	
R.E. Stencel	445
Stellar Winds and Spindown in Solar Type Stars	
I.W. Roxburgh (Invited Review)	449
The Remarkable Rotational Braking of G5 Giants	
D.F. Gray	461
Expulsion of Magnetized Plasmas from Coronae	
B.C. Low	467
Plasma Flow and Solar Wind Acceleration in Non-radial Coronal Magnetic Fields	
H. Biernat, N. Kömle, and H. Rucker	473
Magnetic Braking and Angular Momenta of Protostars	
T.Ch. Mouschovias	479
Closed and Open Magnetic Fields in Stellar Atmospheres: Effects on Mass Loss from Cool Giant Stars	
D.J. Mullan	487
Stellar Winds and Spindown in Red Giants	
A.S. Endal	493
VI. SUMMARY AND FUTURE DIRECTIONS	499
Observational Needs for Progress in Solar/Stellar Magnetic Activity: Overview	
R.W. Noyes	501

Observational Requirements: Ground-based	
C. Zwaan	503
Outlook for Ground-based and Space Observations	
G.S. Vaiana	505
Theoretical Problems	
M. Stix	509
Discussion	511
Relationships between Solar and Stellar Magnetic Fields	
L.E. Cram (Summary Lecture)	515
LIST OF POSTER PAPERS	533
LIST OF PARTICIPANTS	537
AUTHOR INDEX	543
SUBJECT INDEX	545
