

TABLE OF CONTENTS

PREFACE	xiii
LIST OF PARTICIPANTS	xv
LIST OF PAPERS READ, BUT NOT PUBLISHED	xviii
INTRODUCTORY REMARKS H. Eichhorn	xix

I. REDUCTION TECHNIQUE

Concepts of reference systems B. Guinot	1
Discussion of meaning and definition of UT B. X. Xu, S. Y. Zhu, and H. Zhang	13
Relativistic reduction of astrometric observations V. A. Brumberg	19
Statistical analysis of proper motion surveys R. B. Hanson	43
Statistical problems encountered in using trigonometric parallaxes T. E. Lutz	47
The search for unwanted signals: systematic trends in proper motions of fundamental stars P. Brosche and H. Schwan	53
A new technique for the analytical determination of a fundamental system of positions and proper motions H. Schwan	63
Computation of compilation catalogs T. E. Corbin	75
Brosche's method for representing systematic differences in positions and proper motions of stars V. V. Vityazev	87
Some effects of different sources of variation of latitude data on meridian circle catalogues T. J. Rafferty	95

Global reduction of fundamental astrometric data. P. Benevides-Soares and L. B. F. Clauzet	103
Application de la methode par deconvolution integree au cas des occultations d'etoiles doubles M. Froeschle and C. Meyer	113
The conversion from the B1950 FK4-based position to the J2000 position of celestial objects S. Aoki, M. Sôma, K. Nakajima, Y. Niimi, M. Fujishita and Y. Takahashi	123
The observations of the earth rotation and the stellar system K. Sato, K. Yokoyama, K. Tanikawa and Y. Goto	133

II. RADIO ASTROMETRY

The astrometric possibilities of very-long-baseline interferometry D. S. Robertson	143
The precision of J2000.0 radio source positions from Mark III VLBI C. Ma	157
The JPL/DSN J2000 radio reference frame A. E. Niell, J. L. Fanselow, K. M. Liewer, O. J. Sovers, J. B. Thomas, R. N. Treuhaft and K. S. Wallace	163
The use of the RATAN-600 radio telescope in astrometry P. M. Afanasieva, V. A. Fomin, Yu. K. Zverev, M. G. Mingaliev, V. N. L'vov and A. A. Pozhalov	169
The extragalactic optical/radio reference frame. A progress report, IAU Comm. 24 Working Group Chr. de Vegt	173
Preliminary precise radio/optical positions of selected stars D. R. Florkowski, K. J. Johnston, C. de Vegt and C.M. Wade	179

III PHOTOGRAPHIC ASTROMETRY

Can a system be defined for the new edition of the Yale parallax catalogue? W. van Altena	183
Proper motions with respect to galaxies A. R. Klemola	191
Astrometry of star clusters: problems, techniques, and opportunities K. M. Cudworth	201
Plans for the second epoch of the southern proper motion program C. E. López, J -F Lee and W. van Altena	209

Trigonometric parallaxes obtained with the UK Schmidt telescope C. A. Murray, P. M. Corben and R. W. Argyle	213
Optical counterparts of extragalactic radio sources in the southern sky: positions obtained from Schmidt plates H. G. Walter	223
A photographic astrometric telescope for Brazil L. E. da S. Machado	229
Astrometry with the Lowell PDS L. Wasserman and E. Bowell	231
Laser interferometer measurement system on the Yale PDS 2020G J -F. Lee, W -S. Tsay and W. van Altena	237
Instrument and method for determination of high-precision coordinates of geostationary artificial satellites D. P. Duma, L. N. Kizjun, N. I. Laptienko, M. A. Mel'nikov and Yu. I. Safronov	243
Variations in external parallax errors A. R. Upgren	247
Astrometry with objective prism J. Stock	253
Testing Schmidt plates for astrometric purposes J. L. Russell and C. A. Williams	259
Parallaxes with large reflectors R. S. Harrington	271
Design characteristics of the 1.56 m astrometric telescope and its usage in astrometry L. Wan, Neng-hong Zhu, Lan-juan Wang, Zheng-hua Yang and Yi-jin Zheng	275
Astrometric characteristics of the Abastumani Astrophysical Observatory 125 cm reflector (AZT-II) of Ritchey-Cretien optical system G. N. Salukvadze	289

IV. INTERFEROMETRY

Speckle interferometry in astrometry H. A. McAlister	293
First results from the new GSU CCD speckle camera W. I. Hartkopf	301
Infrared speckle interferometry: A sensitive technique for physical measurements of unseen companions to nearby stars D. W. McCarthy, Jr.	309

Microarcsecond astrometric interferometry	
R. D. Reasenberg	321
Present status and future plans for the two color astrometric	
interferometer project	
M. Shao, M. Colavita, D. Staelin, R. Simon and K. Johnston	331

V. SMALL FIELD PHOTOELECTRIC ASTROMETRY

A new astrometric system	
G. Gatewood, J. Stein, J. Kiewiet de Jonge, C. DiFatta and	
L. Breakiron	341
Moving-image astrometry with the multi-anode microchannel array	
(MAMA) detector	
J. D. Scargle	353
Vidicon photometry and astrometry applied to objects of the solar	
system	
J.-E. Arlot and W. Thuillot	369
Photoelectric astrolabe and astrolabe star catalogues	
Ding-jiang Luo and Dong-ming Li	375
The oscillating slit micrometer of the meridian circle PMC 190	
Tokyo	
C. Kihne, M. Miyamoto and M. Yoshizawa	379

VI. TRANSIT CIRCLES AND ASTROLABES

A new astrolabe	
G. Billaud	389
Timing and data acquisition system for a field astrolabe	
C. F. Lukac, P. J. Wheeler, R. E. Keating and R. T. Clarke	397
The photoelectric meridian circle of the Pulkovo	
V. N. Ershov, V. E. Pliss, and Yu. S. Streletsy	407
The glass meridian circle	
E. Hög	413
Design for a large transit circle with reflecting optics	
Ningsheng Hu	421
A proposal for scanning meridian circle	
A. S. Kharin	427
Impersonal techniques of transit circle observations. "The Carlsberg	
automatic meridian circle"	
L. Helmer	429

The Bordeaux automatic transit circle: First catalogues, current and future programs Y. Requière and J. M. Mazurier	435
Current work with the photoelectric transit instrument at the observatory of Torino G. Chiumiento, M. G. Fracastoro and M. Sarasso	443
The design of modern meridian circles for the observation of faint objects M. Yoshizawa and M. Miyamoto	449
Automatic horizontal meridian circle at Pulkovo R. I. Gumerov, V. B. Kapkov and G. I. Pinigin	459
Automation and software of the Wanschaff vertical circle at Goloseevo A. S. Kharin, L. A. Kukharskij, P. F. Lazorenko, N. F. Minyajlo and M. L. Tsesis	463
The use of photographic positions in determining azimuth of a meridian circle C. Fabricius	465
The use of astrometric instruments in vacuum chambers Ningsheng Hu	469
The seven-inch transit circle and its New Zealand program J. A. Hughes, M. D. Robinson, F. S. Gauss and R. C. Stone	483
Carlsberg automatic transit circle: first two test catalogues and the programme for La Palma L. V. Morrison and P. Gibbs	497
The refurbished six-inch transit circle B. L. Klock	507
The transit instrument under optimum conditions G. M. Petrov	517
Vacuum meridian marks of the Belgrade large transit instrument L. A. Mitic and I. Pakvor	525
The vacuum mires of the transit instrument at Nikolaev G. M. Petrov, R. T. Fedorova and P. N. Fedorov	529
Internal refraction in meridian circles E. Hög	533
Determination of the division corrections of the Bordeaux declination circle by the Benevides-Boczko method Y. Requière and M. Rapaport	543
A new method of determining absolute azimuth and latitude and suggestion for a new type of meridian circle Wei Mao, Zhi-ming Li, Yu Fan, Shiao-Shun Hu, Ming-Huei Du	551

A new method for zenith distance determination in meridian observations M. Miyamoto and M. Yoshizawa	557
On the implementation of absolute meridian observations in low latitude stations Dong-ming Li	567
A multislit photoelectric star micrometer for the meridian circle of the Nikolayev Astronomical Observatory V. V. Konin and A. D. Pogonij	569
Comparison of Tokyo PZT Catalogues with AGK3 and with three other independent catalogues S. Sadžakov, M. Dačić and V. A. Fomin	571

VII. SPACE ASTRONOMY

HIPPARCOS satellite and the organization of the project J. Kovalevsky	581
HIPPARCOS data reductions L. Lindegren	593
Preparation of the HIPPARCOS input catalogue. Astrometric programs for HIPPARCOS. Preliminary astrometric observations C. Turon-Lacarrieu and Y. Réquière	605
The use of Space Telescope to tie the HIPPARCOS reference frame to an extragalactic reference frame P. D. Hemenway and R. L. Duncombe	613
Tycho astrometry and photometry E. Høg	625
Software for space telescope astrometry W. H. Jefferys and J. Feo	637
Space telescope motion limitations for fine guidance sensor astrometry A. Fresneau	643

VIII. OBJECTS

The new index catalog of visual double stars-WDS C. E. Worley and G. G. Douglass	649
Astrometric desiderata for nearby stars W. Gliese	653

On desiderata for star catalogs for the remainder of the twentieth century: A report on catalog work now in progress at the U. S. Naval Observatory C. Smith	669
On the reference frame of the planetary ephemerides E. M. Standish, Jr.	677
Comparison of instruments and methods of positional observations of the sun and major planets A. S. Kharin	685
On the SRS catalogue M. Z. Zverev, D. D. Polozhentsev, E. A. Stepanova, E. V. Khrutskaya, L. I. Yagudin and A. D. Polozhentsev	691
The establishment of an astrometric standard region — A description of the method with reference to the astrometric standard region in Praesepe (M44) J. L. Russell	697
Objets accessibles aux astrolabes de haute precision: etoiles et radioetoiles brillantes, planetes, soleil F. Chollet and S. Débarbat	705
Astrolabe observations of radio stars at the southern hemisphere F. Noël	715
The guide star selection system and the guide star catalog for Space Telescope J. L. Russell	721

IX. ADMINISTRATION AND DISTRIBUTION

Astrometry in China Shu-hua Ye	729
The IAU numbering system of radio sources B. Elsmore	737
The preparation and distribution of machine-readable astrometric data W. H. Warren, Jr.	739

X. CONNECTIONS BETWEEN THE VARIOUS TECHNIQUES

The need for better co-operation and intercomparison in fundamental astrometry G. Teleki	749
---	-----

The reconciliation of optical and radio positions A. N. Argue	757
On the feasibility of a star coordinate determination in the radio astrometry reference system V. S. Gubanov	765
Connection between the HIPPARCOS catalogue and the FK5 S. Röser	773
Results of VLBI observations of radio stars and their potential for linking the HIPPARCOS and extragalactic reference frames J -F. Lestrade, R. A. Preston, A. E. Niell, R. L. Mutel and R. B. Phillips	779
Relating the JPL VLBI reference frame and the planetary ephemerides X. X. Newhall, R. A. Preston and P. B. Esposito	789
A fully-automated system of astrometric data collection and processing V. I. Sergienko, A. G. Radchuk, B. A. Pavlov and V. S. Kudeeva	795
 CONCLUDING REMARKS	
G. Westerhout	799
 APPENDIX	
A. Excerpts from a general discussion on coordinates and time	805
B. The status of the plates taken for the charts and the catalogue of the Carte du Ciel (astrographic catalogue)	807
C. Pictures taken during the Symposium	811
 AUTHOR INDEX	825
 SUBJECT INDEX	829
