

CONTENTS

| | |
|---|------|
| Color Plates | ix |
| Preface <i>L. Allamandola and A. Tielens</i> | xiii |
| SECTION I: Dust in the Diffuse Interstellar Medium | |
| Measurements of Interstellar Extinction <i>D. Massa and B. Savage</i> | 3 |
| Insights on Dust Grain Formation and Destruction Provided by Gas-Phase Element Abundances <i>E. Jenkins</i> | 23 |
| Interstellar Extinction in External Galaxies <i>E. Fitzpatrick</i> | 37 |
| Dust towards the Galactic Centre <i>D. Aitken</i> | 47 |
| Linear and Circular Polarization in the Diffuse ISM <i>P. Martin</i> | 55 |
| Diffuse Interstellar Bands <i>J. Krełowski</i> | 67 |
| Visible/UV Scattering by Interstellar Dust <i>A. Witt</i> | 87 |
| SECTION II: The Overidentified Infrared Emission Features | |
| Infrared Emission from Reflection Nebulæ <i>K. Sellgren</i> | 103 |
| Observations of HII Regions and Planetary Nebulæ: the Infrared Emission Bands <i>J. Bregman</i> | 109 |
| Aromatic Infrared Emission in Cirrus Clouds <i>J. Puget</i> | 119 |

| | |
|--|-----|
| The Infrared Emission Features and PAHs <i>L. Allamandola</i> | 129 |
| The Infrared Emission Features and HAC Particles <i>W. Duley</i> | 141 |
| Optical Properties of Carbonaceous Materials <i>E. Bussoletti and L. Colangeli</i> | 147 |
| Physical and Chemical Properties of PAHs <i>S. Leach</i> | 155 |
| The PAH Hypothesis and the Extinction Curve <i>A. Léger, L. Verstraete, L. d'Hendecourt, D. Défourneau, O. Dutuit, W. Schmidt, and J. Lauer</i> | 173 |
| A Critical Assessment of the PAH Hypothesis <i>B. Donn, J. Allen, and R. Khanna</i> | 181 |
| Chemical, Optical and Infrared Properties of QCCs <i>A. Sakata and S. Wada</i> | 191 |
| Grains, or Molecules? Thermal, or non-Thermal? <i>J. Barker and I. Cherchneff</i> | 197 |
| Infrared Emission Mechanism in Large Isolated Molecules <i>L. d'Hendecourt, A. Léger, P. Boissel, and F. Désert</i> | 207 |
| Panel Discussion on Treatments of Processes in PAH Molecules <i>S. Leach</i> | 221 |
| SECTION III: Dust in Dense Clouds | |
| The Heating of Interstellar Gas by Dust <i>D. Hollenbach</i> | 227 |
| Dust in Dense Clouds <i>A. Tielens</i> | 239 |
| Dust and the Gas Phase Composition of Dense Clouds <i>C. Walmsley</i> | 263 |
| Polarized Infrared Emission from Dust <i>R. Hildebrand</i> | 275 |

SECTION IV: Dust in Galaxies

| | |
|---|------------|
| Far Infrared Emission from Galactic and Extragalactic Dust | 285 |
| <i>G. Helou</i> | |

| | |
|--|------------|
| Observations of Infrared Emission from Galaxies | 303 |
| <i>P. Roche</i> | |

SECTION V: Optical Properties of Grains

| | |
|---|------------|
| On the Interpretation of the λ 2175 Å Feature | 313 |
| <i>B. Draine</i> | |

| | |
|--|------------|
| Pitfalls in Calculating Scattering by Small Particles | 329 |
| <i>D. Huffman</i> | |

| | |
|----------------------------|------------|
| Fractal Dust Grains | 337 |
| <i>E. Wright</i> | |

SECTION VI: Interstellar Dust Models

| | |
|--|------------|
| The Core-Mantle Model of Interstellar Grains and the Cosmic Dust Connection | 345 |
| <i>J. Greenberg</i> | |

| | |
|--------------------------------------|------------|
| Bare Carbon/Silicate Theories | 357 |
| <i>J. Mathis</i> | |

| | |
|---|------------|
| Grains in Diffuse Clouds: Carbon-Coated Silicate Cores | 367 |
| <i>D. Williams</i> | |

| | |
|---|------------|
| Open Panel Discussion on Interstellar Grain Models | 375 |
| <i>P. Martin</i> | |

SECTION VII: Interstellar Dust and the Solar System

| | |
|---|------------|
| Interstellar Molecules in Meteorites | 383 |
| <i>J. Kerridge</i> | |

| | |
|---|------------|
| Interstellar Grains in Meteorites: Diamond and Silicon Carbide | 389 |
| <i>E. Anders, R. Lewis, M. Tang, and E. Zinner</i> | |

| | |
|---|------------|
| Interstellar Dust in Collected Interplanetary Dust Particles | 403 |
| <i>S. Sandford</i> | |

| | |
|---|------------|
| Comet Dust: Connections with Interstellar Dust | 415 |
| <i>R. Knacke</i> | |

SECTION VIII: Dust Formation and Destruction

| | |
|---|------------|
| Dust Destruction in the Interstellar Medium | 431 |
| <i>C. McKee</i> | |
| Sources of Stardust in the Galaxy | 445 |
| <i>R. Gehrz</i> | |
| The Composition of Dust in Stellar Ejecta | 455 |
| <i>D. Whittet</i> | |
| Dust Condensation in Stellar Outflows | 467 |
| <i>E. Sedlmayr</i> | |
| Infrared Emission from Dust in Supernovae and Supernova Remnants | 479 |
| <i>E. Dwek</i> | |

Summary

| | |
|--|------------|
| Critical Questions for the Future | 489 |
| <i>J. Lequeux</i> | |
| Contributed Papers | 493 |
| Addresses of Participants | 505 |
| Subject Index | 517 |
| Object Index | 523 |
| Index of Molecules | 525 |
