<i>List of contributors</i>	ix
<i>Preface</i>	xi
I Introduction	1
1 Robert Hanbury Brown	1
A.C.B. LOVELL	
2 Interferometers and aperture synthesis	11
F. GRAHAM SMITH	
II High angular radio resolution	17
3 Aperture synthesis and the microwave background	17
A. HEWISH	
4 VLBI from ground and space	23
R.T. SCHILIZZI	
5 Radio-linked interferometers	51
J.G. DAVIES	
6 Millimetre interferometry	57
D. DOWNES	
7 Radio image processing	71
A.C.S. READHEAD	
III High angular optical resolution	91
8 Quantum effects in high angular resolution astronomy	91
J.C. DAINTY	
9 The Sydney stellar interferometry programme	101
J. DAVIS	
10 Speckle masking, speckle spectroscopy and optical aperture synthesis	113
G. WEIGELT	

11	Optical aperture synthesis	123
	J.E. BALDWIN	
12	High resolution imaging on La Palma	135
	J.E. NOORDAN	
	IV Developments in optical telescopes	143
13	Large mirrors	143
	J.R.P. ANGEL	
14	Wide field telescopes and high redshift QSO surveys	157
	C. HAZARD	
15	The ESO 16 m VLT	207
	L. WOLTJER	
16	The Hubble Space Telescope	211
	G. ILLINGWORTH	
	V Developments in optical instrumentation	235
17	The low dispersion survey spectrograph	235
	K. TAYLOR	
18	Correction of atmospheric dispersion	241
	C.G. WYNNE and S.P. WORSWICK	
19	Image photon counting	249
	A. BOKSENBERG	
20	Developments in solid state detectors	265
	C.D. MACKAY	
21	The use of CCDs on optical telescopes	271
	P.R. JORDEN	
22	On-line data handling	287
	P.T. WALLACE	
	VI Conclusion	303
23	Modern technology and its influence on astronomers	303
	V. RADHAKRISHNAN	
24	Concluding remarks	317
	R.H. BROWN	
	<i>Index</i>	319
