

Volume 2

MODULATION

CONTENTS

<u>SESSION I</u>		Page
2- 1.	Comparison of the total cosmic radiation in deep space and at the earth during the March-April 1960 events	R.L. Arnoldy J.R. Winckler R.A. Hoffman 3
2- 2.	Directional intensities of primary cosmic rays near the equator	B. Dayton P.K. Kunte 9
2- 3.	Orientation mechanism for high altitude cosmic ray research	B. Dayton P.K. Kunte 16
2- 4.	Neutron albedo measurements on polar-orbiting satellites	J.A. Lockwood J.H. Trainor 20
2- 5.	Neutron albedo flux at 45° geomagnetic latitude	G. Boella G. Degli Antoni C. Dilworth M. Panetti L. Scarsi D. Shapiro 26
 <u>SESSION II</u>		
2- 6.	Development of cosmic ray storms	S. Mori H. Ueno S. Sagasika K. Nagashima Y. Sekido 33
2- 7.	A neutron intensity increase observed at high altitude in association with an auroral zone x-ray event	N.R. Parsons J.G. Greenhill K.B. Fenton A.G. Fenton 38
2- 8.	The asymmetric interaction of the magnetosphere with solar plasma	G.L. Pai V.A. Sarabhai 43

2- 9.	Cosmic ray effects during magnetic storms	M.V. Alania G.M. Blokh Y.L. Blokh L.I. Dorman N.S. Kaminer T.V. Kebuladse V.K. Koiva E.V. Kolomeets V.G. Koridse V.T. Pluneva M.I. Tyaste A.M. Chketa	48
-------	---	--	----

SESSION III

2-10.	Cosmic ray variation	L.I. Dorman	73
2-11.	Modulation of galactic cosmic rays in the solar system	V.A. Sarabhai	117

SESSION IV

2-12.	Time variation of the primary energy spectrum	H.V. Neher	139
2-13.	The primary cosmic ray spectrum and the transition region between interplanetary and interstellar space	J.A. Simpson	155
2-14.	Cosmic ray work at Imperial College in relation to solar modulation and geomagnetic effects	H. Elliot	170

SESSION V

2-15.	Intensity variations and effective primary spectrum for mesons observed at approximately 40 m.w.e. underground at Hobart	A.G. Fenton	185
2-16.	Cosmic ray research at Hobart	A.G. Fenton	191

2-17.	Japanese works on cosmic ray intensity modulation	Y. Sekido	199
2-18.	Summary of the work done at the Laboratorio de Radiacion Cosmica, Universidad de Buenos Aires, Comision Nacional de Energia Atomica, Argentina	N. Becerra J.M. Cardoso H.S. Ghielmetti A. Godel H. Heredia L.C. Marzulli J.G. Roederer	219

SESSION VI

2-19.	Secular trend of cosmic ray intensity in the stratosphere and primary cosmic ray energy spectrum	A.N. Charakhchyan T.N. Charakhchyan	227
2-20.	Measurement of primary cosmic ray charge and energy spectra during 1963	V.K. Balasubrahmanyam F.B. McDonald	234
2-21.	Modulation of low energy galactic cosmic rays	C.E. Fichtel D.E. Guss D.A. Kniffen K.A. Neelakantan	240
2-22.	The modulation of heavy nuclei in the primary cosmic radiation	P.S. Freier C.J. Waddington	246
2-23.	The intensity of cosmic ray alpha particles at absolute solar maximum	P.S. Freier G. Greer J. Valdes C.J. Waddington	250
2-24.	On the modulation of cosmic ray nuclei with $Z \geq 2$ during their propagation	M.V.K. Appa Rao	252

SESSION VII

2-25.	Cosmic ray modulation by interplanetary magnetic field	A.I. Kuzmin G.F. Krymaky F.A. Krivoshepin G.V. Skripin N.P. Chirkov G.F. Shafer	265
-------	--	--	-----

2-26.	On the primary cosmic ray spectrum derived from the measurements of ionization on balloon ascents	N.W. Nerurkar	272
2-27.	Changes in the cosmic ray spectrum in the current solar cycle	N.W. Nerurkar	277
2-28.	The decrease of the cosmic ray intensity during 11-year cycle	O.J. Hatton P.L. Marsden	282

SESSION VIII

2-29.	Changes in the rigidity spectrum of cosmic rays associated with geomagnetic disturbances	H. Takahashi	291
2-30.	The rigidity dependence of the long and short term variations in cosmic radiation	J.A. Lockwood H. Razdan	295
2-31.	The response of meson and neutron detectors to anisotropy of cosmic rays	G. Subramanian	302
2-32.	The nature of the daily variation of cosmic ray intensity during the period 1958-1962	V.A. Sarabhai G. Subramanian	307

SESSION IX

2-33.	Phase anticipation in trains of diurnal variations of cosmic rays	M. Galli F. Palmonari P. Randi	317
2-34.	A 27-day recurrence tendency in cosmic ray diurnal variation with inverse phase	H. Ueno S. Sagasika S. Mori K. Nagashima	322
2-35.	The atmospheric contribution to the diurnal variation of the hard component at Deep River	M. Bercovitch J.F. Steljes H. Carmichael	327
2-36.	Variability of the energy dependence of the cosmic ray anisotropy	M. Bercovitch	332

2-37.	Diurnal variation in cosmic ray meson intensity in east and west directions measured at Makerere	D.M. Thomson T. Mathews	338
-------	--	----------------------------	-----

SESSION X

2-38.	Evidence for a genuine sidereal daily variation of cosmic ray intensity at 40 m.w.e. underground at Hobart in 1961	R.M. Jacklyn	345
2-39.	A comparison of several methods of correcting cosmic ray meson intensity for atmospheric temperature variations	H. Carmichael M. Bercovitch J.F. Steljes	350
2-40.	A study of periodical and quasiperiodical cosmic ray variation according to the data of the worldwide network of stations and using crossed telescopes	L.I. Dorman V.I. Ivanov Q.I. Inozemtseva I.E. Koshkarev E.V. Kolomeets L.I. Mirkin V.T. Pivneva G.A. Sergeeva L.Kh. Shatashvili R.A. Chumbalova	356
2-41.	On the relation between worldwide distribution of the diurnal variation of the cosmic ray neutron intensity and the sunspot numbers	T. Kannó	370
2-42.	Diurnal variation of cosmic rays near the geomagnetic poles	S.P. Duggal M.A. Pomerants	375

SESSION XI

2-43.	Changes in the primary cosmic ray rigidity spectrum over a solar cycle as derived from latitude effect	I. Kondo M. Kodama T. Makino	383
2-44.	Cosmic ray threshold rigidities determined from trajectory calculations	I. Kondo M. Kodama T. Makino	386

2-45.	Rigidity dependence of the 11-year variation	C.J. Hatton P.L. Maraden	391
2-46.	A study of vertical cut-off rigidities using a sixth degree simulation of the geomagnetic field	M.A. Shea	396
2-47.	On cosmic ray cut offs	E.C. Ray	401
2-48.	Modulation of galactic cosmic rays by interplanetary plasma	V.A.Sarabhai G.Subramanian	405
2-49.	Latitude survey of cosmic ray intensity by Explorer VII, October 1959 to February 1961	W.C. Lin D. Venkatesan J.A. Van Allen	411

SCRIV - IQSY I

2-50.	Main recommendations concerning the cosmic ray programme for the IQSY	M.A. Pomerants	415
2-51.	Remarks on the IQSY programme	H. Elliot	417

SCRIV - IQSY II

2-52.	Corrections to be applied to the data	R.M. Jacklyn	423
2-53.	Data exchange in SCRIV network	Y. Sekido	426

SESSION XII

General discussion	429
--------------------	-----

PAPERS NOT READ

2-54.	Rigidity and energy spectra of primary cosmic rays	H. Komori	437
-------	--	-----------	-----

2-55.	Sea level cosmic ray intensity and threshold rigidity around the South African Magnetic Anomaly	N.F. du Plooy G.F. Kuhn J.P. Maree P.H. Stoker A.J. Van der Walt	441
2-56.	Main features of Forbush type decrease and small cosmic ray flares during intensity recovery	B.M. Vladimirovsky A.A. Stepanyan	444
2-57.	Forbush effect and disturbances of interplanetary magnetic field	G.F. Krymsky A.I. Kuzmin G.V. Shafer	454
2-58.	Energy and space characteristics of cosmic ray anisotropy	A.I. Kuzmin G.F. Krymsky G.V. Skripin	460
2-59.	Asymmetry of cosmic ray variations and structure of interplanetary magnetic field	N.P. Chirkov A.I. Kuzmin G.F. Krymsky	462
