

HIGH ENERGY INTERACTIONS.

CONTENTSSESSION I

		Page
5- 1.	Some properties of very high energy inelastic processes deduced from measurements on the recoil baryon	3
	R.W. Huggett K. Mori C.O. Kim R. Levi Setti	
5- 2.	Identification of the "persisting baryon" and its application in an analysis of nuclear interactions at high energies.	9
	R.R. Daniel N. Durgaprasad P.K. Malhotra B. Vijayalakshmi	
5- 3.	Energy distribution of secondaries of proton stars in the TeV energy range	14
	U. Haber-Schaim B. Reuter G. Yekutieli	
5- 4.	The interaction mean free path of nucleons and alpha particles of high energies in nuclear emulsion	17
	R.R. Daniel N. Durgaprasad P.K. Malhotra B. Vijayalakshmi	
5- 5.	Meson emission asymmetry, inelasticity and multiplicity in ultra-high energy interactions	20
	B. Hilderbrand R. Silberberg	
5- 6.	On the role of the photonuclear mechanism in asymmetric jet formation	26
	G.T. Zatsepin A.I. Nikishov	
5- 7.	Some results from the Sydney 20 litre emulsion stack	31
	C.F. Gauld A.J. Gray C.B.A. McCusker L.S. Peak R.L.S. Woolcott	
5- 8.	The multiplicity of meson production at 3000 GeV and the cosmic ray proton energy spectrum	35
	C.B.A. McCusker L.S. Peak	
5- 9.	Dependence of multiplicity on primary energy in nucleon-nucleon and pion-nucleon collisions	40
	P.K. Malhotra	

SESSION II

- | | | | |
|-------|--|---|----|
| 5-10. | Investigation of nuclear interactions at energies 10^{13} eV by the method of controlled nuclear photo-emulsions | Kh.P. Babayan
S.I. Brikker
N.L. Grigorov
A.V. Podgurskaya
A.I. Savelyeva
V.Ya. Shestoporov | 51 |
| 5-11. | Investigation of the jets above 10^{11} eV | L.A. Sanko
Zh.S. Takibaev
P.A. Usik | 58 |
| 5-12. | Nuclear radii for interaction in emulsions | P.K. Aditya | 64 |
| 5-13. | Investigation of inelasticity at interaction of particles with heavy nuclei in 70-700 GeV energy region | S.A. Azimov
A.M. Abdullaev
V.M. Myalkovsky
T.S. Yuldashaev | 69 |
| 5-14 | Investigation of fraction of energy transferred to soft component at interactions of particles with carbon nuclei | S.A. Azimov
Yu.V. Polyak
R.S. Abdullaev | 74 |
| 5-15. | Study of nature and properties of secondary particles produced by cosmic ray nucleons at high energy | N.A. Dobrotin
N.G. Zelevinskaya
K.A. Kotelnikov
V.M. Maximenko
V.S. Puchkov
S.A. Slavatinsky
I.N. Fetisov | 79 |
| 5-16. | Momentum spectrum of fast secondaries in high energy collisions | H.H. Aly
M.F. Kaplon
M.L. Shen | 85 |

SESSION III

- | | | | |
|-------|---|----------------|-----|
| 5-17. | Theoretical aspects of high energy interactions | B.M. Udgaonkar | 93 |
| 5-18. | Particle production at GeV energies | W.O. Lock | 105 |

SESSION IV

- | | | | |
|-------|--|---|-----|
| 5-19. | Experimental investigation of nuclear interactions at energies 10^{11} to 10^{13} eV (by the data of research in USSR) | N.A. Dobrotin
N.L. Grigorov
Zh. Takibayev
G.E. Zhdanov | 141 |
| 5-20. | Possible studies on the structure of the nucleons and tests on charge symmetry from nuclear collisions at high energies | A. Subramanian | 166 |
| 5-21. | High energy cosmic ray research at Bristol | P.H. Fowler | 182 |

SESSION V

- | | | | |
|-------|---|---|-----|
| 5-22. | Asymmetry in high energy nuclear jets | J. Gierula
M. Miesowicz | 213 |
| 5-23. | Analysis of angular distributions of secondary particles in nuclear interactions of high energy in photographic emulsions | G.E. Zhdanov | 218 |
| 5-24. | The production-spectrum of particles in interactions above 1000 GeV | E. Heidebreder
K. Pinkau | 227 |
| 5-25. | Energy spectra of atmospheric γ -rays at balloon altitude and of δ -rays from interactions in graphite | P.K. Malhotra
P.G. Shukla
S.A. Stephens
B. Vijayalakshmi | 232 |
| 5-26. | Electron-photon component production resulting from nucleon-nucleus collision | V.S. Mursin | 240 |
| 5-27. | The study of "young" air showers at an altitude of 3200 M above sea level | Kh.P. Babayan
N.L. Grigorov
E.A. Mamidjanian
V.Ya. Shestoperov
Ch.A. Tretyakova | 248 |

SESSION VI

5-28.	Fast cosmic ray neutrons in the atmosphere	Serge A. Korff	255
5-29.	Ratio of pions to protons and ratio of neutral to charged interacting particles at mountain altitude of 800 gms/cm ²	S. Lal R. Raghavan T.N. Rangaswamy B.V. Sreekantan A. Subramanian	260
5-30.	The origin of pions, muons and photons of great energy	N.L. Grigorov Kotov Yu.D. I.L. Rosental	265
5-31.	Role of fluctuations of nuclear-active particle interaction characteristics in some processes observed in cosmic rays at high energies	N.L. Grigorov V.Ya. Shestoporov	268
5-32.	Energy spectra of nuclear-active particles at mountain altitude	V.I. Yakovlev	279
5-33.	Absorption of high energy nucleons in the atmosphere and generation of mesons	L.T. Baradzei V.I. Rubtsov Y.A. Smorodin M.V. Solovyov	283

SESSION VII

5-34.	Recent large stack investigations of high energy jets	M. Koshiha	293
5-35.	Emulsion chamber project of Japan-Brazil collaboration	Y. Fujimoto	326

SESSION VIII

- 5-36. Analysis of experimental data on interaction of nucleons with atom nuclei at high energies
V.V. Guseva 349
S.A. Dubrovina
A.M. Lebedev
A.E. Morozov
L.A. Sanko
V.V. Sokolovsky
S.A. Slavatskiy
B.V. Tolkachev
- 5-37. Nuclear-active particles of cosmic rays at mountain altitudes and characteristics of their interaction with various atomic nuclei
K.I. Alekseeva 356
N.L. Grigorov
I.N. Erofeeva
L.G. Mistchenko
V.S. Mursin
I.D. Rapoport
L.I. Sarytscheva
V.A. Sobinyakov
A.F. Titenkov
- 5-38. Fluctuations in the angular distribution of secondaries emitted in high energy (≥ 30 GeV) nuclear collisions in carbon
S. Lal 363
R. Raghavan
T.N. Rangaswamy
B.V. Sreekantan
A. Subramanian
S.C. Tonwar
R.H. Vatcha
- 5-39. Extremely collimated nuclear interactions in carbon induced by cosmic ray particles in the energy region of about 20 - 100 GeV
S. Lal 368
R. Raghavan
T.N. Rangaswamy
B.V. Sreekantan
A. Subramanian
S.D. Verma
- 5-40. Transverse momentum of γ -rays resulting from high energy nuclear interactions
S. Lal 373
A. Subramanian
- 5-41. A comparison of the average characteristics of nuclear collisions produced by cosmic ray particles in carbon and in brass at energies ~ 50 GeV
S. Lal 377
R. Raghavan
T.N. Rangaswamy
A. Subramanian
S.C. Tonwar
R.H. Vatcha

5-42.	Composition of the secondary particles produced in nuclear interaction at $\sim 10^{12}$ eV	C.O. Kim	382
5-43.	A new approach to the analysis of very high energy interaction	R.W. Huggett K. Mori	387
 <u>SESSION IX</u>			
5-44.	Cosmic rays and the theory of strong interactions	D.S. Chernavsky E.L. Feinberg	395
5-45.	Meson production at high energy and secondary cosmic radiation	B. Peters	423
 <u>SESSION X</u>			
5-46.	Secondary cosmic radiation and meson production at high energies	Yash Pal	445
5-47.	High energy cosmic ray cascade in the atmosphere	S. Dagan G. Yekutieli	460
 <u>SESSION XI</u>			
	General discussion (Isobar Models)		467
 <u>SESSION XII</u>			
5-48.	A study of four-momentum transfer in jets employing a Monte Carlo calculation	R.D. Settles	487

5-49.	A phenomenological study of very high energy interactions	O. Czyzewski A. Krzywicki	492
5-50.	Some new mathematical features in cascade theory	A. Ramakrishnan R. Vasudevan S.K. Srinivasan	498
5-51.	Fluctuation problem in electromagnetic cascades	S.K. Srinivasan K.S.S. Iyer N.V. Koteswara Rao	502
5-52.	A system of the elementary particles	A. Ehmert	506

SESSION XIII

5-53.	Track spark chamber for observation of high energy nuclear interactions	G.E. Chikovani V.A. Mikhailov V.N. Roinishvili	517
5-54.	A new gas-discharge track device - streamer chamber	B.A. Dolgoshein B.I. Luchkov	530
5-55.	A study of characteristics of spark chambers	V.N. Bolotov M.I. Dayon M.I. Devishev G.F. Klimanova B.I. Luchkov A.P. Shmelevs	534
5-56.	Two electrode spark chamber with large discharge gap in a magnetic field and the momentum measurement of charged particles	A.I. Alikhanyan T.L. Asatiani V.M. Krishtchyan E.M. Matevosyan R.C. Sharkhatunyan	540
5-57.	Spark-emulsion chamber for balloon flights	K. Pinkau U. Pollvogt C. Reppin	548
5-58.	Direct measurement of shower electrons with "glass-metal" spark chambers	Ryoichi Kajikawa	552

5-59.	Limitations to the usual method employed to determine the energy of electromagnetic cascades in dense stacks	K. Pinkau	555
-------	--	-----------	-----

SESSION XIV

	General discussion on high energy interactions		561
--	--	--	-----

Papers not read at the Conference:

5-80.	Linked heavy particle model and multiple particle production	Tetsuro Kobayashi Mikio Namiki Ichiro Ohba	569
5-81.	Nucleon-nucleon and pion-nucleon interactions at very high energies	I.A. Kuchin P.A. Usik	573
5-82.	Preliminary results on the analysis of some high energy jets by the Lobahevsky's velocity-plot	E.G. Bubelev	577
5-83.	On the passing of the high energy electrons and photons through condensed media	A.A. Pomansky	581
5-84.	On the identification of the secondary particles with the energy $\leq 2 \times 10^{10}$ eV by the emulsion method and the results on (P-N) and (π^- -N) interactions	E.G. Boos V.A. Botvin A.Kh. Vinitzky Zh.S. Takibayev I.Ja. Chasnikov	585
5-85.	Construction and performance of large-area liquid scintillation counters and large-area multi-wire spark chambers	J.W. Koen M.A. Meyer N.S. Wolmarans	590

	Author Index		593
