## CHAPTER 1 INVITED PAPERS

- 3 Cosmic rays and the interplanetary field.  
**J. J. Quenby**
- 14 Measurements of the magnetic fields in interplanetary space  
and the magnetosphere.  
**N. F. Ness**
- 26 A brief outline of the development of cosmic ray modulation theory.  
**E. N. Parker**
- 35 Magnetic fields in the Galaxy as deduced from radio measurements.  
**R. D. Davies**
- 40 Earth's radiation belt.  
**S. N. Vernov, E. V. Gortchakov, S. N. Kuznetsov, Yu. I. Logatchev,  
E. N. Sosnovets, B. A. Tverskoy and A. E. Chudakov**
- 50 Preliminary results of cosmic ray study from the artificial Earth's  
satellite Proton-1.  
**N. L. Grigorov, V. E. Nesterov, I. D. Rapoport, I. A. Savenko and  
G. A. Skuridin**
- 53 Origin of cosmic rays.  
**V. L. Ginzburg and S. I. Syrovatsky**
- 61 Primary electrons and positrons in the cosmic radiation.  
**P. Meyer**
- 68 X-ray and  $\gamma$ -ray astronomy.  
**M. Oda**
- 81 Some aspects of astrophysical studies based on observations of  
isotopic changes.  
**D. Lal**
- 92 Quasi-stellar objects, radiogalaxies, and the origin of cosmic rays.  
**E. M. Burbidge and G. R. Burbidge**
- 97 11-year cosmic ray variations.  
**I. V. Dorman and L. I. Dorman**

## CHAPTER 2 ACCELERATION

- 105 ACCEL 2 Acceleration of particles in the Earth's shock transition region and  
beyond.  
**C. Y. Fan, G. Gloeckler and J. A. Simpson**
- 109 ACCEL 3 Protons and helium nuclei within interplanetary magnetic regions which  
co-rotate with the Sun.  
**C. Y. Fan, G. Gloeckler and J. A. Simpson**
- 112 ACCEL 4 The theoretical composition of cosmic rays of supernova origin.  
**S. A. Colgate**
- 116 ACCEL 5 Acceleration of cosmic ray electrons.  
**S. Hayakawa and H. Obayashi**
- 119 ACCEL 6 Observation of the energy spectrum of galactic X rays.  
**S. Hayakawa, M. Matsuoka and K. Yamashita**
- 123 ACCEL 8 Modulation of generically related galactic cosmic rays.  
**B. Hildebrand and R. Silberberg**
- 126 ACCEL 9 General dynamical effects of cosmic rays in the Galaxy.  
**E. N. Parker**
- 129 ACCEL 10 Origin of extragalactic cosmic rays.  
**K. Aizu, M. Taketani, Y. Fujimoto, H. Hasegawa and K. Kawabata**
- 132 ACCEL 11 The expansion of a relativistic gas into intergalactic space.  
**T. Gold**
- 135 ACCEL 12 Anisotropy of cosmic rays in the galactic arm.  
**S. Sakakibara**

- 138 ACCEL 14 The solar and sidereal daily variations of cosmic ray intensity at a depth of 60 m w.e. underground in London.  
**T. Thambyahpillai, J. C. Dutt, T. Mathews and F. Romero**
- 141 ACCEL 15 A two-way sidereal anisotropy versus seasonal modulation.  
**R. M. Jacklyn**
- 144 ACCEL 16 Possibilities of isolation of sidereal time cosmic ray intensity variations.  
**L. I. Dorman, O. I. Inozemtseva, E. A. Mazaryuk and Z. I. Solovieva**
- 147 ACCEL 18 Acceleration of particles in the neutral sheet of the geomagnetic tail.  
**T. W. Speiser**

### CHAPTER 3 MODULATION

- 153 MOD 1 Cosmic ray changes during a solar cycle.  
**H. V. Neher and H. R. Anderson**
- 157 MOD 2 Studies of primary cosmic rays with ionization chambers.  
**S. R. Kane, J. R. Winckler and R. L. Arnoldy**
- 161 MOD 4 Solar cycle modulation of cosmic rays.  
**S. P. Duggal, K. Nagashima and M. A. Pomerantz**
- 165 MOD 5 An investigation of the modulation of the primary cosmic radiation using an airborne detector.  
**A. Bewick, R. J. Hynds and N. A. Riddle**
- 170 MOD 6 Galactic cosmic rays in the solar system.  
**V. Sarabhai and G. Subramanian**
- 173 MOD 7 The effect of cosmic ray friction on the solar wind.  
**W. I. Axford and R. C. Newman**
- 176 MOD 8 Modulation of cosmic rays by an electric field.  
**P. S. Freier and C. J. Waddington**
- 180 MOD 9 The long-term modulation of the cosmic ray intensity.  
**J. J. Quenby**
- 184 MOD 10 Rigidity spectra of primary cosmic rays in the last solar cycle.  
**N. W. Nerurkar**
- 186 MOD 12 The variation of the cosmic ray intensity during the eleven-year solar cycle.  
**D. C. Rose and J. Katzman**
- 190 MOD 13 Solar daily variation recorded at a low latitude station by east and west pointing telescopes during periods of maximum and minimum solar activity.  
**H. S. Ahluwalia, V. I. Escobar, M. Zubieta, R. Anda, M. Schreier and O. Troncoso**
- 193 MOD 14 Rigidity dependence of the intensity variation during the solar cycle.  
**C. J. Hatton, P. L. Marsden and P. V. Schefer**
- 197 MOD 15 Diffusion mechanism of cosmic ray daily variation.  
**G. F. Krinsky**
- 199 MOD 16 A simple contribution to the theory of the anisotropy of cosmic rays.  
**M. J. Houghton**
- 201 MOD 17 The solar diurnal variation of the cosmic ray intensity.  
**M. Kitamura**
- 204 MOD 18 Characteristics of anisotropy of galactic cosmic rays during the solar cycle.  
**V. Sarabhai and G. Subramanian**
- 208 MOD 19 The semi-diurnal anisotropy of the cosmic radiation.  
**J. G. Ables, K. G. McCracken and U. R. Rao**
- 213 MOD 20 A survey of the diurnal anisotropy.  
**K. G. McCracken and U. R. Rao**
- 219 MOD 21 Variation of the latitude dependence of cosmic ray diurnal variations.  
**K. Murakami and S. Kudo**
- 221 MOD 22 On the variation of the time of maximum in the diurnal variation of cosmic ray neutron intensity during IGY and IGC.  
**T. Kanno, Y. Ishida and S. Iseki**
- 224 MOD 23 Periodic cosmic ray variations and their change during the cycle of solar activity.  
**E. V. Kolomeets, G. A. Sergeeva, A. N. Nemolochnov, R. A. Chumbalova and A. G. Zusmanovich**
- 229 MOD 24 Some results of studies of the solar-diurnal variation of cosmic rays during the IGY period.  
**B. M. Vladimirovsky, A. K. Pankratov and A. A. Stepanyan**

<i>Page</i>	<i>Paper</i>	
231	MOD 25	The diurnal variation during the past solar cycle. <b>A. M. Faller and P. L. Marsden</b>
234	MOD 26	Periodical fluctuation studies of cosmic ray diurnal variations during the quiet Sun period. <b>M. Kodama</b>
235	MOD 27	Asymmetric solar wind in connection with the 27-day modulation of the intensity and anisotropy of cosmic rays. <b>M. V. Alania, L. I. Dorman and L. Kh. Shatashvili</b>
239	MOD 28	Influence of the changes in Earth's heliollatitude on the cosmic ray intensity in 1963-1964 and evaluation of the cosmic ray intensity gradient perpendicular to the ecliptic plane. <b>L. I. Dorman and S. Fischer</b>
243	MOD 29	Rigidity dependence of the cosmic ray diurnal variation during Forbush decrease. <b>H. Ueno</b>
246	MOD 30, 31	The first and second spherical harmonics of the daily variations of cosmic rays. <b>A. I. Kuzmin, G. F. Krimsky, A. M. Altukhov, P. A. Krivoshapkin, V. A. Philippov, G. V. Skripin and N. P. Chirkov</b>
249	MOD 33	27-day and other cyclic variations of cosmic ray intensity. <b>G. A. Basilevskaya and T. N. Charakhtchyan</b>
251	MOD 35	Cosmic ray rigidity during a solar rotation and solar wind velocity. <b>H. Takahashi, T. Chiba and N. Yahagi</b>
254	MOD 36	Anisotropy of Forbush-type cosmic ray intensity decrease and electromagnetic conditions in interplanetary space. <b>K. K. Fedchenko</b>
257	MOD 40	The Forbush decrease and the 27-day recurrence tendency in the cosmic ray intensity at a depth of 60 m w.e. underground in London. <b>T. Thambyahpillai and J. C. Dutt</b>
261	MOD 42	Cosmic rays and solar activity from the data of measurements in the stratosphere. <b>A. N. Charakhtchyan and T. N. Charakhtchyan</b>
267	MOD 43	Effects of cosmic rays according to the chromospheric flares and Forbush effects during solar activity minimum. <b>E. V. Kolomeets, V. J. Ivanov, V. A. Lichoded and V. T. Pivneva</b>
271	MOD 44	Solar cosmic rays recorded in the stratosphere in September 1963. <b>L. L. Lazutin</b>
274	MOD 46	Balloon studies of primary cosmic rays at solar minimum. <b>R. W. Jenkins and B. G. Wilson</b>
277	MOD 47	Changes in the cosmic ray intensity close to the zenith. <b>J. Katzman</b>
282	MOD 48	Results from the new Denver multidirectional meson telescope. <b>R. L. Chasson, M. Iona, V. J. Kisselbach and P. Baker, Jr.</b>
285	MOD 49	Anisotropy of cosmic rays in the direction parallel to the rotation axis of the Earth. <b>S. Kudo and K. Murakami</b>
288	MOD 50	Frequency distribution of sudden changes of cosmic ray intensity in connection with solar activity. <b>M. V. Alania, L. I. Dorman, V. K. Koiava, V. G. Koridze and L. Kh. Shatashvili</b>
292	MOD 51	Galactic and solar cosmic rays in interplanetary space. <b>L. I. Dorman</b>
296	MOD 52	The rigidity spectrum of primary cosmic rays. <b>H. Komori</b>
299	MOD 53	An application of convolution product theory to smoothing of neutron monitor data. <b>E. Barouch</b>
302	MOD 54	A quasi-stationary co-rotating structure in the interplanetary medium. <b>J. M. Wilcox and N. F. Ness</b>
303	MOD 55	The corpuscular ionizing radiation space in the immediate vicinity of the Earth. <b>S. N. Vernov, E. V. Gortchakov, V. L. Maduev and A. V. Kchudyakov</b>
306		Modulation I (Rapporteur paper). <b>K. G. McCracken</b>
309		Modulation II (Rapporteur paper). <b>V. Sarabhai</b>

## CHAPTER 4 SPECTRAL COMPOSITION

- 315 SPEC 1 Intergalactic photon density.  
**G. Garmire**
- 317 SPEC 2 Observations of cosmic X rays from balloons.  
**G. W. Clark**
- 318 SPEC 3 Flux limits for high-energy  $\gamma$  rays from quasars and other possible cosmic ray sources.  
**C. D. Long, B. McBreen, N. A. Porter and T. C. Weekes**
- 321 SPEC 5 The flux and energy spectrum of primary cosmic ray electrons.  
**J. L'Heureux and P. Meyer**
- 324 SPEC 6 Measurements of cosmic ray electron intensity.  
**V. I. Rubtsov**
- 327 SPEC 7 A balloon observation of high energy electrons.  
**J. A. M. Bleeker, J. J. Burger, A. Scheepmaker, B. N. Swanenburg and Y. Tanaka**
- 331 SPEC 8 The flux and East-West asymmetry of primary electrons at a geomagnetic rigidity cut-off of about 4.5 GV.  
**B. Agrinier, Y. Koechlin, B. Parlier, J. Vasseur, C. J. Bland, G. Boella, G. Degli Antoni, C. Dilworth, L. Scarsi and G. Sironi**
- 335 SPEC 9 The electron component of the primary cosmic radiation at energies  $\geq 15$  GeV.  
**R. R. Daniel and S. A. Stephens**
- 339 SPEC 10 Electrons, hydrogen and helium nuclei of the cosmic radiation as observed in 1963 and 1964.  
**C. J. Waddington and P. S. Freier**
- 342 SPEC 11 Cosmic ray flux variation with height in the stratosphere.  
**B. S. Chow, K. K. Wu, N. Simpson, S. Ames and V. D. Hopper**
- 345 SPEC 12 Solar modulation of protons and helium nuclei during the period 1963-1965.  
**W. R. Webber**
- 349 SPEC 13 Measurements of the primary proton and helium spectra and their modulations using a balloon-borne Cerenkov-scintillation counter.  
**J. F. Ormes and W. R. Webber**
- 355 SPEC 14 Fast neutron intensity above Fort Churchill, Canada.  
**G. A. Baird and B. G. Wilson**
- 358 SPEC 15 Fast neutrons of solar origin.  
**M. V. K. Apparao, R. R. Daniel, B. Vijayalakshmi and V. L. Bhatt**
- 360 SPEC 16A The flux of helium nuclei at Hyderabad, India ( $\lambda = 7.6$  N).  
**P. G. Shukla**
- 362 SPEC 16B Energy spectrum of primary helium nuclei at energies greater than 6 GeV.  
**K. C. Anand, R. R. Daniel, S. A. Stephens, B. Bhowmik, C. S. Krishna, P. C. Mathur, P. K. Aditya and R. K. Puri**
- 365 SPEC 17 Energy spectrum of alpha particles below 600 MeV/nucleon at solar minimum.  
**K. A. Neelakantan**
- 368 SPEC 18 On the abundance of  $^3\text{He}$  nuclei in the primary cosmic radiation.  
**S. Biswas, P. J. Lavakare, S. Ramadurai and N. Sreenivasan**
- 371 SPEC 19 1961-1964 balloon observations of cosmic rays.  
**C. E. Fichtel, N. Durgaprasad and D. E. Guss**
- 375 SPEC 20 The low rigidity end of the differential spectra of the proton and helium components of the primary cosmic radiation.  
**M. V. K. Apparao and S. Ramadurai**
- 377 SPEC 21 Measurement of the primary cosmic ray hydrogen and helium nuclei at Kiruna, Sweden.  
**G. M. Courtier and A. D. Linney**
- 380 SPEC 22 Solar modulation of the galactic helium spectrum above 30 MeV per nucleon.  
**C. Y. Fan, G. Gloeckler and J. A. Simpson**
- 383 SPEC 23 Abundances and energy spectra for nuclei of galactic origin above 20 MeV per nucleon.  
**G. M. Comstock, C. Y. Fan and J. A. Simpson**
- 387 SPEC 24 Low energy multiply charged nuclei in the cosmic radiation.  
**P. S. Freier, J. S. Rno and C. J. Waddington**
- 390 SPEC 25 Very heavy low energy cosmic ray nuclei.  
**C. J. Waddington and P. S. Freier**
- 393 SPEC 26 Solar cosmic ray heavy nuclei and the 18th July 1961 event.  
**S. Biswas, C. E. Fichtel and D. E. Guss**

- 396 SPEC 27 Heavy nuclei in the primary cosmic rays in June 1963 at Fort Churchill.  
**K. C. Anand, S. Biswas, P. J. Lavakare, S. Ramadurai and N. Sreenivasan**
- 400 SPEC 28 An experimental examination of low energy cosmic ray heavy nuclei.  
**C. E. Fichtel, D. E. Guss, K. A. Neelakantan and D. V. Reames**
- 403 SPEC 29 Some implications of the relative spectra of the different charge components in the primary radiation.  
**W. R. Webber**
- 407 SPEC 30 Measurements of the energy spectrum of nuclei with  $Z \geq 3$  in the primary radiation using a balloon-borne Cerenkov-scintillation counter.  
**W. R. Webber, J. F. Ormes and T. von Rosenvinge**
- 412 SPEC 33  $^3\text{He}$ - $^4\text{He}$  in the primary cosmic radiation at Fort Churchill 1963.  
**F. W. O'Dell, M. M. Shapiro, R. Silberberg and B. Stiller**
- 415 SPEC 34 Separation of isotopic nuclei of the primary cosmic rays with nuclear emulsions.  
**G. Alvial**
- 417 SPEC 35 Estimation of the relative abundance of the carbon isotopes of the primary cosmic rays.  
**G. Alvial, E. Silva, S. Stantic and J. Riquelme**
- 419 SPEC 36 Use of semiconductor telescopes in charge and energy spectrometry of cosmic particles.  
**J. Engelmann, L. Koch and J. P. Meyer**
- 423 SPEC 37 Gamma ray generation in the high atmosphere.  
**R. Rocchia, J. Labeyrie, G. Ducros and D. Boclet**
- 426 SPEC 38 Heavy cosmic ions recorded in nuclear emulsions exposed in a polar satellite.  
**R. Schmitt, G. Baumann, R. Kaiser, H. Annoni, M. Jung and P. Cüer**
- 427 SPEC 39 Galactic cosmic rays at solar minimum, 1965  
**V. K. Balasubrahmanyam, D. E. Hagge, G. H. Ludwig and F. B. McDonald**
- 437 SPEC 40 Measurements of the isotopic composition of helium nuclei in the primary cosmic radiation in the energy interval 80-150 MeV/nucleon.  
**D. J. Hofmann and J. R. Winckler**
- 440 SPEC 41 A spark chamber experiment on cosmic gamma rays.  
**R. Cobb, J. G. Duthie and J. Stewart**
- 444 SPEC 42 Charge ratio of cosmic ray electrons.  
**F. C. Jones**
- 446 SPEC 43 The energy spectrum of primary galactic X rays between 20 and 50 keV.  
**R. Rothenflug, R. Rocchia and L. Koch**
- 449 SPEC 44 A celestial source of X rays in the energy range 20 to 58 keV.  
**K. G. McCracken**
- 453 SPEC 45 (ISOT 1) Use of a gas Cerenkov counter for the study of the isotopic composition of helium nuclei in primary cosmic radiation.  
**P. C. Agrawal, S. V. Damle, G. S. Gokhale, G. Joseph and M. G. K. Menon**
- 457 SPEC 46 (ISOT 2) Flux of primary protons and helium nuclei and East-West and North-South asymmetries near the geomagnetic equator.  
**P. C. Agrawal, S. V. Damle, G. S. Gokhale, G. Joseph, P. K. Kunte, M. G. K. Menon and R. Sunderrajan**
- 462 Spectral composition (Rapporteur paper).  
**C. J. Waddington**

## CHAPTER 5 GEOPHYSICAL EFFECTS

- 471 GEO 1 Barometric correction anomaly and nucleonic component time variations during IQSY.  
**V. J. Kisselbach and R. E. Chasson**
- 475 GEO 2 Studies of the barometric coefficients of IGY and NM-64 neutron monitors.  
**W. K. Griffiths, C. V. Harman, C. J. Hatton and P. Ryder**
- 478 GEO 3 On the multiplicity effect in an IGY neutron monitor.  
**E. Dyring and B. Sporre**
- 481 GEO 4 Some properties of the radiation recorded by the IGY neutron monitors in the lower atmosphere.  
**F. Bachelet, P. Balata and N. Iucci**
- 483 GEO 5 Daily latitude curves of the cosmic ray nucleonic component obtained in 1963 between 1 and 6.4 GV.  
**F. Bachelet, P. Balata, E. Dyring and N. Iucci**

<i>Page</i>	<i>Paper</i>	
486	GEO 6	Temperature effect of the cosmic ray neutron component. <b>N. S. Kaminer, S. F. Ilgatch and T. S. Khadakhanova</b>
489	GEO 7	Meteorological factors affecting the counting rate of neutron monitors. <b>M. Bercovitch and B. C. Robertson</b>
492	GEO 8	Introduction of meteorological corrections into meson monitor data. <b>H. Carmichael, M. Bercovitch and J. F. Steljes</b>
495	GEO 9	The day by day correction of the meson diurnal variation for atmospheric effects. <b>M. Bercovitch</b>
498	GEO 10	The atmospheric temperature effects on the diurnal variation of cosmic ray intensity. <b>S. Mori, H. Ueno and K. Nagashima</b>
501	GEO 11	Investigation of cosmic ray distribution using the method of daily variations. <b>A. I. Kuzmin, G. R. Krimsky, A. M. Altukhov, P. A. Krivoschapkin V. A. Philippov, G. V. Skripin and N. P. Chirkov</b>
503	GEO 12	Angular dependence of coupling coefficients of the muon component of cosmic rays. <b>G. F. Krimsky, P. A. Krivoschapkin and G. V. Skripin</b>
506	GEO 14	Problems of methods of investigation of cosmic ray variations. <b>L. I. Dorman</b>
512	GEO 15	Some results of the comparison of cosmic ray intensity variations with the H component of the Earth's geomagnetic field during IGY and IGC. <b>A. M. Chkhetia, L. I. Dorman and V. K. Koiava</b>
517	GEO 16	Cosmic ray intensities in the stratosphere over Antarctica and Murmansk. <b>S. N. Vernov, A. N. Charakhtchyan, V. K. Babarykin, V. V. Bayarevitch, Yu. I. Stozkov and T. N. Charakhtchyan</b>
520	GEO 17	Energetic electron spikes in and beyond the transition region. <b>K. A. Anderson</b>
528	GEO 18	The boundary of the trapped radiation and the Earth's magnetic field. <b>P. Rothwell</b>
529	GEO 19	Low energy particle fluxes inside the magnetosphere from the data of the electrostatic analysers of the Electron-2 satellite. <b>S. N. Vernov, V. V. Melnikov, I. A. Savenko and B. I. Savin</b>
532	GEO 20	Investigation of the outer proton belt. <b>S. N. Vernov, I. A. Savenko, M. V. Teltsov and P. I. Shavrin</b>
534	GEO 21	Coulomb interaction of electrons with energy of 1 MeV in the region of a magnetic anomaly. <b>E. V. Gortchakov, A. V. Gurevitch and G. A. Timofeev</b>
536	GEO 22	Penetration of the outer radiation belt particles into low altitudes of atmosphere. <b>A. N. Charakhtchyan, A. E. Golenkov and T. N. Charakhtchyan</b>
538	GEO 23	The neutron flux in the upper atmosphere during the 1964 solar minimum. <b>J. G. Greenhill, J. Phillips, K. B. Fenton, A. G. Fenton and M. Bowthorpe</b>
542	GEO 24	On the absolute field of the equatorial ring current. <b>S. E. Forbush</b>
543	GEO 25	Hypothesis of origin and formation of radiation belts as a result of particle drift into the depth of the magnetosphere. <b>A. I. Yerzhkovitch, V. P. Shabansky and A. E. Antonova</b>
546	GEO 26	On the Earth's radiation belt theory. <b>B. A. Tverskoy</b>
548	GEO 28	Intensity distributions of cosmic ray components at 307 g cm <sup>-2</sup> atmospheric depth in the South African magnetic anomaly. <b>A. J. Van der Walt, P. H. Stoker, J. P. Maree and W. F. Coetzee</b>
553	GEO 29	Latitude survey in North America. <b>H. Carmichael, M. Bercovitch, J. F. Steljes and M. Magidin</b>
557	GEO 30	On the relation of L derived cut-offs to the results of numerical integrations. <b>E. C. Ray</b>
558	GEO 31	Geographic distribution of vertical cosmic ray threshold rigidities. <b>I. Kondo and M. Kodama</b>
564	GEO 32	Modulation of cosmic ray threshold rigidity due to geomagnetic cavity field. <b>T. Makino and I. Kondo</b>
568	GEO 33	The influence of the magnetopause on cosmic ray particle trajectories. <b>H. S. Ahluwalia and K. G. McCracken</b>

571	GEO 34	The influence of outer sources of geomagnetic field upon the cut-off rigidities and position of impact zones. <b>V. S. Smirnov</b>
573	GEO 35	Measurements of neutrons produced by the cosmic radiation. <b>S. A. Korff, R. B. Mendell and S. S. Holt</b>
577	GEO 36	Some results of the investigation of the primary cosmic ray nuclei on the artificial satellite 'Electron-2' <b>M. I. Fradkin, L. V. Kurnosova, L. A. Razorenov and A. A. Suslov</b>
580	GEO 38	Neutron albedo measurements on rocket flights. <b>J. A. Lockwood, L. Friling and T. Wilson</b>
586		Magnetospheric phenomena (Rapporteur paper). <b>J. G. Roederer</b>

#### **CHAPTER 6 ISOTOPIC DISTRIBUTION**

597	ISOT 3	Variation of $^{14}\text{C}$ content in the atmosphere during the past two thousand years. <b>K. Kigoshi, H. Hasegawa, K. Yamakoshi, S. Shibata, H. Kuroya, T. Miwa, S. Mitani and T. Oshio</b>
601	ISOT 4	Production of radioisotopes on the Earth by cosmic ray nucleons, muons and photons. <b>N. Bhandari and D. Lal</b>
602	ISOT 5	Cosmic ray produced lithium and calcium in iron meteorites. <b>H. Hintenberger, H. Voshage and H. Sarkar</b>
605	ISOT 6	The implications of the terrestrial abundance of $^{26}\text{Al}$ and $^{14}\text{C}$ to astrophysical and geophysical quantities. <b>D. Lal and S. Venkatavaradan</b>
