

CONTENTS

VOL. 2 (SOL-1 to 35 — MOD-1 to 91)

		Page
SOL-1	Comparison of the Hard Solar X-Ray Burst of February 11, 1970 Observed in Balloon and Satellite Altitudes. K. OGURA, K. FROST and M. KODAMA	432
SOL-2	Energy Spectra of Solar Flare Electrons. R. P. LIN. Abstract	437
SOL-3	Observations of the Scatter-Free Solar-Flare Electrons in the Energy Range 20-1000 keV. J. R. WANG, L. A. FISK and R. P. LIN	438
SOL-4	Temporal Characteristics of Generation of Corpuscular and Electromagnetic Radiation by Solar Flares. L. E. GAINOVA, E. V. KOLOMEETS, V. I. IVANOV. Abstract	440
SOL-5	Analysis of Absolute Solar Proton Spectra on Data of Ground-Based Observations. L. I. MIROSHNICHEMKO, V. M. PETROV and A. P. TIBANOV. Abstract	445
SOL-6	Determination of Injection Spectra for Solar Flare Protons by Various Diffusion Models. L. I. MIROSHNICHEMKO. Abstract	446
SOL-7	Solar Proton, Helium, and Medium Nuclei Energy Spectra Observed from the IMP-VI Satellite. T. T. von ROSENVINGE, F. B. McDONALD and B. J. TEEGARDEN. Abstract	447
SOL-8	Intensity Ratios of Protons, Alpha Particles and C, N, O Nuclei in Solar Particle Events. J. A. VAN ALLEN, P. VENKATARANGAN and D. VENKATESAN. Abstract	448
SOL-9	Composition and Spectrum of Particles with $0.2 \leq E \leq 30$ MeV/nuc in the 25 January 1971 Solar Flare. P. B. PRICE and J. D. SULLIVAN	449
SOL-10	Charge Composition of Solar Cosmic Rays. D. L. BERTSCH, C. E. FICHEL and D. V. REAMES	455
SOL-11	Low Energy Solar Nuclear Particles: New Detection Methods and New Results. J. BORG, M. MAURETTE and B. VASSENT. Abstract	461
SOL-12	A Search for Neutrons of Solar Origin Using Balloon Borne Detectors 1967-70. C. J. EYLES, A. D. LINNEY and G. K. ROCHESTER	462
SOL-13	Storage of the Energetic Particles in the Solar Atmosphere. H. S. AHLUWALIA	468
SOL-14	Analysis of Particle Propagation from Solar Flares to the Earth. G. M. SIMNETT. Abstract	474
SOL-15	Calculations of the Seasonal Dependency of Neutron Monitors to an Anisotropic Flux of Solar Cosmic Rays Propagating in the Ecliptic Plane. M. A. SHEA and D. F. SMART	475
SOL-16	The Structure of Interplanetary Space During the March 24, 1966, Solar Event. J. KUNSTMANN and G. WIBBERENZ. Abstract	481
SOL-17	Azimuthal Diffusion of Solar Cosmic Rays. R. REINHARD and G. WIBBERENZ. Abstract	482
SOL-18	A Determination of the Spectra, Spatial Anisotropy, and Propagation Characteristics of the Relativistic Solar Cosmic-Ray Flux on November 18, 1968. D. F. SMART, M. A. SHEA and P. J. TANSKANEN	483
SOL-19	The March 30, 1969, Solar Proton Event: Directional Measurements of Solar Proton Fluxes in Interplanetary Space. A. BALOGH, C. S. DYER, A. R. ENGEL, R. J. HYNDS and J. J. QUENBY. Abstract	489
SOL-20	Data on Solar Proton Events Recorded in the Stratosphere during the 20th Solar Cycle. G. A. BAZILEVSKAYA, A. N. CHARAKHCHYAN, T. N. CHARAKHCHYAN, L. L. LAZUTIN and Yu. I. STOZHKOVA. Abstract	490

	Page
SOL-21	Propagation of Low Energy Solar Protons Associated with the November 2, 1969, Solar Flare. A. BALOGH, P. C. HEDGECOCK, R. J. HYNDIS and J. SEAR. Abstract 491
SOL-22	Transport of Solar Flare Protons—Comparison of a New Analytic Model with Spacecraft Measurements. J. E. LUPTON and E. C. STONE 492
SOL-23	On the Propagation of Solar Cosmic Rays. C. K. NG and L. J. GLEESON 498
SOL-24	Energy Changes of Solar Cosmic-Ray Particles. I. H. URCH and L. J. GLEESON 504
SOL-25	Cosmic Ray Energy Losses at 1 A.U. during Solar Proton Events. I. D. PALMER. Abstract 510
SOL-26	Convection-Dominated Transport of Solar Cosmic Rays. M. A. FORMAN 511
SOL-27	Observation of Particle Fluxes over Extended Solar Longitudes during the Solar Flare Event of March 31 to April 10, 1969. R. P. BUKATA, U. R. RAO, K. G. McCRACKEN and E. P. KEATH ... 514
SOL-28	Evacuation of Solar Cosmic Rays from the Interplanetary Medium. U. R. RAO, K. G. McCRACKEN, R. P. BUKATA and E. P. KEATH 519
SOL-29	Anisotropy Characteristics of Low Energy Cosmic Ray Population of Solar Origin. U. R. RAO, K. G. McCRACKEN, F. R. ALLUM, R. A. R. PALMEIRA, W. C. BARTLEY and I. PALMER 525
SOL-30	A Comparison of Cosmic Ray Anisotropies and Interplanetary Magnetic Field Data Late in a Solar Flare Event. F. R. ALLUM, K. G. McCRACKEN, U. R. RAO, R. A. R. PALMEIRA and D. H. FAIRFIELD. Abstract 531
SOL-31	Low-Energy Proton Increases Associated with Interplanetary Shock Waves. F. R. ALLUM, R. A. R. PALMEIRA and U. R. RAO. Abstract 532
SOL-32	The Propagation of Energetic Solar Particles during Highly Anisotropic Ground Level Events. S. P. DUGGAL and M. A. POMERANTZ 533
SOL-33	Solar Cosmic Ray Observations during the September and November 1969 Events. A. J. MASLEY and P. R. SATTERBLOM. Abstract 538
SOL-34	The Flare of Solar Cosmic Rays on January 25, 1971. A. I. KUZMIN, N. P. CHIRKOV, A. I. GUSEV, G. F. KRYMSKY and G. V. SCRIPIN. Abstract 539
SOL-35	Determination of the Solar Cosmic Ray Flux Parameters on the Basis of Ionospheric Data. L. I. DORMAN and T. M. KRUPITSKAYA. Abstract 540
—————	
MOD-1	The Nature of Relativistic Electron Intensity Changes During Solar Flare Quiet Times Between 1963 and 1969. F. B. McDONALD, T. L. CLINE and G. M. SIMNETT. Abstract 541
MOD-2	Electrons in Quiet-Time Increases, Samplers of Conditions in the Outer Solar System. L. A. FISK and M. Van HOLLEBEKE 542
MOD-3	Measurements of the Primary Cosmic Ray Electron Spectrum Between 20 MeV and 20 GeV and Its Changes with Time. P. MEYER, P. J. SCHMIDT and J. L'HEUREUX 548
MOD-4	Long-Term Solar Modulation of Cosmic-Ray Electrons with Energies above 0.5 GeV. J. J. BURGER and B. N. SWANENBURG. Abstract 554
MOD-5	Low Energy Cosmic Ray Protons, He, and Neutral Particles over Syowa Station, Antarctica. E. TAMAI, T. SAKAI, N. NARITA, K. OGURA, S. KOGAMI, M. KUSUNOSE and M. KODAMA 555
MOD-6	The Energy Spectra of Galactic Cosmic-Ray Protons and Helium Nuclei and their Modulation During 1968-1970. T. T. von ROSENVINGE, F. B. McDONALD and B. J. TEEGARDEN. Abstract 561

	Page
MOD-7	A Study of Long-Term Modulation Using Satellite and Neutron Monitor Data. T. MATHEWS, U. R. RAO, S. P. AGRAWAL. Abstract 562
MOD-8	Solar Modulation of Cosmic Ray Heavy Nuclei ($Z = 10-28$). V. S. BHATIA, S. BISWAS, V. S. CHOCHAN, N. DURGAPRASAD, S. D. PABBI and S. PARUTHI 563
MOD-9	Effects of the Interstellar Particles Upon the Interaction of Cosmic Rays with the Interplanetary Magnetic Field. E. M. WINTER and P. J. COLEMAN Jr. 568
MOD-10	The Modulation Region of Galactic Cosmic Rays. A. K. LAVRUKHINA. Abstract 574
MOD-11	The Heliocentric Radial Gradient in Cosmic-Ray Density Measured with the Lost City Meteorite. M. A. FORMAN, R. W. STOENNER and R. DAVIS Jr. 575
MOD-12	The Heliocentric Radial Density Gradient of Relativistic Cosmic Rays in 1967-68. M. BERCOVITCH. Abstract 579
MOD-13	Radial Gradients and Anisotropies of Galactic Cosmic-Rays. I. H. URCH and L. J. GLEESON 580
MOD-14	A Systematic Study of the North-South Anisotropy 1965-1968. S. LINDGREN, O. LARFORS, B. SPORRE and M. TOLBA. Abstract 586
MOD-15	Cosmic Ray Streaming Perpendicular to the Ecliptic Plane and Enhanced Daily Variation. S. LINDGREN. Abstract 587
MOD-16	Anisotropies Related to Cosmic Ray Density Gradients. D. B. SWINSON 588
MOD-17	The North-South Anisotropy and the Cosmic Ray Radial Gradient in the Vicinity of the Earth. N. IUCCI, M. STORINI. Abstract 594
MOD-18	The Equatorial Anisotropy of the Cosmic Rays and its Correlations with the Interplanetary Magnetic Field, for 1965-1966. E. BUSSOLETTI and N. IUCCI. Abstract 595
MOD-19	A Cosmic Ray Density Gradient Perpendicular to the Ecliptic Plane. A. HASHIM and M. BERCOVITCH 596
MOD-20	North-South Anisotropies Observed at Sector Boundaries. D. N. H. BARKER, W. K. GRIFFITHS, C. J. HATTON and J. B. MERCER. Abstract 602
MOD-21	Changes in the Diurnal Anisotropy Resulting from a Gradient in the Cosmic Ray Intensity Perpendicular to the Ecliptic Plane. C. J. HATTON and M. C. BARKER 603
MOD-22	Semi-Diurnal Anisotropy of Cosmic Radiation. V. A. SARABHAI and L. V. KARGATHRA. Abstract 609
MOD-23	Cosmic-Ray Density Distribution Normal to the Solar Equatorial Plane and the Semi-Diurnal Anisotropy. P. N. PATHAK. Abstract 610
MOD-24	Interplanetary Sector Field Structure and Annual Variation in the Cosmic Ray Diurnal Variation Amplitude. V. J. KISSELBACH. Abstract 611
MOD-25	Rigidity Spectrum of the Cosmic Ray Solar Diurnal Variation. J. E. HUMBLE 612
MOD-26	Spectral Characteristics of Different Types of Diurnal Variation of Cosmic Rays. R. P. KANE 618
MOD-27	Effects of Long Lived Solar Centres on the Galactic Cosmic Ray Intensity. E. ANTONUCCI, G. CINI CASTAGNOLI and M. A. DODERO 623
MOD-28	Underground Cosmic Ray Intensity Modulation and Interplanetary Structures During 1969-1970. E. ANTONUCCI, G. CINI CASTAGNOLI and M. A. DODERO 629

	Page
MOD-29	Underground Cosmic Ray Observations at an Equatorial Station. D. M. THOMSON and D. J. SUMNER 635
MOD-30	A Secular Variation of the Limiting Primary Rigidity of the Solar Diurnal Anisotropy of Cosmic Rays. H. S. AHLUWALIA 641
MOD-31	Comparison of Long-Term Variation of Diurnal Anisotropy Observed between Meson and Neutron Monitors during the period 1965-1969. S. P. AGRAWAL, A. G. ANANTH and U. R. RAO 646
MOD-32	Diurnal Variation of Cosmic Radiation in the Energy Range 1-100 GeV on Day-to-Day Basis. A. G. ANANTH, S. P. AGRAWAL and U. R. RAO 651
MOD-33	The Diurnal Anisotropy and East-West Asymmetry Variations. G. WEBB 657
MOD-34	Cosmic Ray Anisotropy in Interplanetary Space. I. Origin of Solar Semi- diurnal Variation. K. NAGASHIMA, K. FUJIMOTO, Z. FUJII, H. UENO and I. KONDO 661
MOD-35	Cosmic Ray Anisotropy in Interplanetary Space. II. Loss Cone Model. Z. FUJII, K. NAGASHIMA, K. FUJIMOTO, H. UENO and I. KONDO 666
MOD-36	Cosmic Ray Anisotropy in Interplanetary Space. III. Daily Variation Third Harmonic. K. FUJIMOTO, K. NAGASHIMA, Z. FUJII, H. UENO and I. KONDO Abstract 672
MOD-37	The Daily-Variation Third Harmonic of the Cosmic Radiation. S. MORI, S. I. YASUE and M. ICHINOSE 673
MOD-38	Spectra of Primary Cosmic Rays During Days of Enhanced Daily Vari- ations. S. KUDO and M. WADA 679
MOD-39	The Variability of the Cosmic Ray Streaming Studied by Power Spectrum Technique. S. T. LINDGREN, N. J. MARTINIC and M. F. TOLBA 685
MOD-40	On Large Amplitude Diurnal Wave Trains 1966-1968. M. F. TOLBA and S. T. LINDGREN 690
MOD-41	A Periodic Component of Sudden Changes in Cosmic Ray Intensity. A. A. NASH. Abstract 696
MOD-42	Anomalous Diurnal Variation of Cosmic Rays with Maximum Along the Garden Hose Direction. H. RAZDAN and M. M. BEMALKHEDKAR 697
MOD-43	Short Term Variations of the Cosmic-Ray Proton and Electron Intensities in 1968 and 1969. C. BAIXERAS-AIGUABELLA. Abstract 703
MOD-44	Some Characteristics of Forbush Decreases Observed in the Time Interval 1957-1965. N. IUCCI and G. VILLORESI. Abstract 704
MOD-45	Two Classes of Forbush Decreases. H. J. VERSCHELL, R. B. MENDELL, S. A. KORFF and E. C. ROELOF 705
MOD-46	Some Properties of Mean Multiplicity Measured in the NM64 Neutron Monitor. M. KODAMA 711
MOD-47	Transient North-South Anisotropies in the Cosmic Ray Intensity. J. B. MERCER, D. N. H. BARKER, W. K. GRIFFITHS and C. J. HATTON 717
MOD-48	Cosmic Ray Anisotropies Perpendicular to the Equatorial Plane. S. P. DUGGAL and M. A. POMERANTZ 723
MOD-49	Variation of Particle Density during Forbush Decreases. A. E. SANDSTROM. Abstract 729
MOD-50	The Mechanism for the Forbush Decrease, in particular for the Event of February 26, 1969. J. J. QUENBY 730
MOD-51	Sounding of Strong Shock Waves Causing Geomagnetic Storms Cosmic Rays. L. I. DORMAN, N. S. KAMINER, E. A. KUSMICHEVA. Abstract 736

	Page
MOD-52	Modulation of Angular Distribution of Cosmic Rays by the Solar Wind in October-November 1968. G. F. KRYMSKY, A. M. ALTUKHOV, P. A. KRIVOSHAPKIN, A. I. KUZMIN, V. P. MAMRUKOVA, G. V. SCRIPIN, I. S. SAMSONOV, I. A. TRANSKY and N. P. CHIRKOV. Abstract 737
MOD-53	On Recurrent Effects in the Galactic Cosmic Ray Intensity Modulation during the Last Solar Cycle of Activity. K. S. SIGVARD RUTHBERG. Abstract 738
MOD-54	Characteristic Features of the Coupling of the Cosmic Ray Quasi-Periodic Variations with Solar Activity. M. V. ALANIA. Abstract 739
MOD-55	The 27-Day Variations of Cosmic Ray Anisotropy by the Neutron Component Data for the I.G.Y. Period. L. Kh. SHATASHVILI and A. K. PANKRATOV. Abstract 740
MOD-56	Isotropic and Anisotropic Flux Variations with 12-34 day Quasi-Periods. R. A. CHUMBALOVA, G. A. CONCHAR and E. V. KOLOMEETS. Abstract 741
MOD-57	The Dynamic of Fast Streams of Solar Wind Plasma and Forbush-Effects in Cosmic Ray Intensity. E. V. KOLOMEETS, M. A. MUSABAEV and A. G. KUSMANOVICH. Abstract 742
MOD-58	Cosmic Ray Intensity in the Initial Phase of Decrease in the 20th Solar Activity Cycle. S. N. VEROV and G. P. LYUBIMOV. Abstract 743
MOD-59	Steplike Nature of the 11 Year Modulation in Solar Cycle 19. H. CARMICHAEL and J. KATZMAN. Abstract 744
MOD-60	Cosmic Ray Intensity Large-Period Modulation During 1961-70. N. J. MARTINIC 745
MOD-61	Observations of the Cosmic Ray Modulation from Neutron Measurements at the High Latitude Transition Maximum. H. J. VERSCHELL, R. B. MENDELL and S. A. KORFF 752
MOD-62	Solar Cycle Variations in the Polar Atmospheric Neutron Flux at Balloon Altitudes. J. G. GREENHILL, A. G. FENTON and K. B. FENTON 758
MOD-63	Implications of a Long-Lived Recovery of Cosmic Ray Intensity. E. C. ROELOF, H. J. VERSCHELL and R. B. MENDELL 764
MOD-64	Interplanetary Magnetic Field Fluctuation Measurements and the Long Term Modulation. J. J. QUENBY and J. F. SEAR 771
MOD-65	The Energy Spectrum of Galactic Cosmic Rays out of the Modulation Region. E. V. KOLOMEETS, A. G. ZUSMANOVICH. Abstract 777
MOD-66	The Cosmic Ray Spectral Modulation Above 2GV during the Descending Phase of Solar Cycle 19. F. BACHELET, N. IUCCI and G. VILLORESI. Abstract 778
MOD-67	Comments on the Absolute Ionization of Cosmic Radiation at Balloon Altitudes Covering Four Solar Maxima. H. CARMICHAEL 779
MOD-68	Electromagnetic Conditions in the Vicinity of the Earth's Orbit According to Observations of Three-Dimensional Cosmic Ray Anisotropy on the Earth. L. I. DORMAN, E. A. EROSHENKO and O. I. INOZEMTSEVA. Abstract 785
MOD-69	The Study of Yearly and 11-Year Cosmic Ray Variations on the Basis of the Method of the Solar Activity HL-Index. L. I. DORMAN, R. T. GUSCHINA, N. S. KAMINER and I. A. PIMENOV. Abstract 786
MOD-70	Modulation of Galactic Cosmic Rays and Solar Activity. E. V. KOLOMEETS, V. A. LIKHODED, Yu. A. SHAKHOVA and A. G. ZUSMANOVICH. Abstract 787
MOD-71	The Annual Variations of Cosmic Ray Intensity. E. V. KOLOMEETS and Yu. A. SHAKHOVA. Abstract 788

		Page
MOD-72	Long-Time Periodical Variations of Chemical Composition of Relative Particles of Cosmic Rays. R. B. SALIMZIBAROV and Yr. G. SCHAFER. Abstract	789
MOD-73	Interaction of Solar Wind with Interstellar Medium by Primary Cosmic Ray Variations. R. B. SALIMZIBAROV. Abstract	790
MOD-74	Investigation of Solar Wind According to the Data of 11-Year Cosmic Ray Modulation. A. N. CHARAKHCHYAN and T. N. CHARAKHCHYAN. Abstract	791
MOD-75	Investigation of a Solar Wind by Means of Jupiter Radiobursts. V. A. KOVALENKO and V. N. MALYSHKIN. Abstract	792
MOD-76	Source Spectrum of Cosmic Ray Nuclei and The Spectra of Proton and Helium Nuclei near the Earth. S. RAMADURAI and S. BISWAS	793
MOD-77	Energy Loss of Cosmic Rays in the Interplanetary Medium. L. A. FISK, R. RAMATY and M. L. GOLDSTEIN. Abstract	799
MOD-78	The Fokker-Planck Equation with Convection and Nonsymmetrical Scattering of Cosmic Ray Particles. V. F. ZACHARCHENKO. Abstract	800
MOD-79	Cosmic Ray Modulation in the Presence of Near Region with Anisotropic Diffusion (Radius of Several A.U.) and Remote Region with Isotropic Diffusion. L. I. DORMAN and Z. KOBYLINSKY. Abstract	802
MOD-80	The Study of Cosmic Ray Propagation in the Interplanetary Magnetic Field on the basis of Kinetic Equation. L. I. DORMAN and M. E. KATS. Abstract	803
MOD-81	Cosmic Ray Intensity Near Moving Magnetic Mirror (Forbush-Effect). A. V. BELOV, L. I. DORMAN, B. A. SHAKHOV. Abstract	804
MOD-82	Millisecond-Time-Scale Atmospheric Light Pulses Induced by Solar Activity. H. ÖGELMAN, A. FISHER and D. BERTSCH	805
MOD-82a	Short Time-Scale Optical Pulsations in the Night-Sky Background. D. L. BERTSCH, A. FISHER and H. ÖGELMAN	811
MOD-83	Anisotropies and the Uneven Illumination by Solar Cosmic Rays. R. GALL, S. BRAVO and A. OROZCO. Abstract	817
MOD-84	The Arrival of Solar Protons over the Polar Caps and Magnetospheric Field Models. G. E. MORFILL and J. J. QUENBY	818
MOD-85	Calculations of Charged Particle Entry into the Polar Regions. A. J. MASLEY, W. P. OLSON and K. A. PFITZER. Abstract	824
MOD-86	North-South Asymmetry in Polar Cap Regions. V. DOMINGO and D. E. PAGE. Abstract	825
MOD-87	Diurnal, Seasonal and Kp Variations in the Position of the High Latitude Electron Trapping Boundary. D. E. PAGE and M. L. SHAW	826
MOD-88	Energy Spectrum and Angular Distribution of Atmospheric Albedo Neutrons. C. REPPIN, V. SCHÖNFELDER, G. KANBACH and K. PINKAU	834
MOD-89	The Energy Distribution and Flux of Earth Albedo Neutrons. R. S. WHITE, R. A. MELENDES and G. M. SIMNETT. Abstract	840
MOD-90	Blow-Off of the Earth's Atmosphere, Population of the Van Allen Belt. L. M. LIBBY. Abstract	841
MOD-91	Surplus Radiation on the Altitudes of 200-500 Km. L. V. KURNOSOVA, S. S. KONYAKHINA, V. I. LOGACHEV, L. A. RAZORENOV, V. G. SINITSINA, V. A. TYASTO and M. I. FRADKIN. Abstract	842
