

## TABLE OF CONTENTS

<b>FOREWORD .....</b>	<b>v</b>
<i>S.E. Woosley</i>	
<b>I. EVOLUTION OF STELLAR SYSTEMS INTO TRANSIENT SOURCES</b>	
Evolution of Binary Systems into Transient Sources .....	1
<i>Ronald E. Taam</i>	
The Evolution of Binaries of Moderate Primordial Mass ( $\leq 10 M_{\odot}$ ) and the Formation of Transient and Explosive Objects due to Accumulation Instabilities in such Binaries .....	11
<i>Icko Iben, Jr. and Alexander V. Tutukov</i>	
<b>II. RECURRENT X-RAY TRANSIENTS</b>	
The Spectra of X-Ray Transients .....	31
<i>N.E. White, J.L. Kaluzienski and J.H. Swank</i>	
A Comparison of Soft X-Ray Transients and Dwarf Novae .....	49
<i>Jan van Paradijs and Frank Verbunt</i>	
X-Ray Properties of the Galactic Bulge Sources .....	63
<i>N. Shibasaki and K. Mitsuda</i>	
Hard X-Ray Recurrent Transients.....	72
<i>N. Shibasaki</i>	
The A-1 Survey of Fast X-Ray Transients .....	73
<i>Carol Ambruster and Kent S. Wood</i>	
Ten Years of Vela X-Ray Observations .....	76
<i>James Terrell and William C. Priedhorsky</i>	
Erratic Variability in MXB 1916-05 .....	80
<i>Paul Hertz and Kent S. Wood</i>	
On the Structure, Stability and Evolution of Accretion Disks in Soft X-Ray Transient Sources.....	83
<i>D.N.C. Lin and R.E. Taam</i>	

### III. OBSERVATIONS OF X-RAY PULSARS AND X-RAY BURSTERS

Recent Observations of Transient and Variable X-Ray Sources with Satellites "HAKUCHO" and "TENMA" .....	103
<i>M. Oda</i>	
Early Results from the X-Ray Astronomy Satellite "TENMA".....	121
<i>Hajime Inoue</i>	
X-Ray Pulsars Observed with HAKUCHO and TENMA .....	131
<i>F. Nagase, N. Sato, K. Makishima, N. Kawai and K. Mitani</i>	
Discovery of Eclipses from the X-Ray Burst Source MXB 1659-29.....	139
<i>Lynn R. Cominsky and Kent S. Wood</i>	
Binary Period Decrease by Unstable Orbit.....	143
<i>N. Shibasaki, K. Makishima, H. Inoue and T. Murakami</i>	
Joint Timing Analysis of A0535+26 at 1980 Outburst .....	146
<i>N. Kawai and F. Nagase</i>	
SMC X-1: Another Tilted Precessing Accretion Disk?.....	150
<i>D.E. Gruber</i>	
The Occasional Disappearance of GX301-2 Pulses .....	154
<i>Hajime Inoue</i>	
Steady Emission from Recurrent Transient Pulsar 0535+26.....	158
<i>R.K. Manchanda, A. Bazzano, V.F. Polcaro, C.D. La Padula and P. Ubertini</i>	

### IV. THEORY OF ACCRETING MAGNETIC NEUTRON STARS

Theories of Accreting X-Ray Pulsars.....	165
<i>P. Mészáros</i>	
Accretion by Magnetic Neutron Stars.....	179
<i>F.K. Lamb</i>	
Accretion onto Magnetized Neutron Stars: Magnetospheric Structure and Stability .....	215
<i>Jonathan Arons, David J. Burnard, Richard I. Klein, Christopher F. McKee, Ralph E. Pudritz and Susan M. Lea</i>	
Two-Dimensional Gas Dynamic Models of Polar Cap Accretion onto Magnetized Neutron Stars .....	235
<i>Richard I. Klein, Jonathan Arons and Susan M. Lea</i>	

Spin-Reversed Accretion onto Neutron Stars and Period Fluctuation of X-Ray Pulsars .....	243
<i>Hajime Inoue</i>	

Self-Consistent Description of Axially Symmetric Magnetospheres of Accreting Neutron Stars .....	246
<i>H. Herold and H. Ruder</i>	

## V. THEORY AND PHYSICS OF X-RAY BURSTS

Some Remarks about X-Ray Burst Sources .....	249
<i>Walter H.G. Lewin</i>	
A Precursor in a Large X-Ray Burst and the Expanding Envelope of the Neutron Star .....	257
<i>Y. Tawara, T. Kii and S. Hayakawa</i>	
The Thermonuclear Flash Model for X-Ray Bursts .....	263
<i>Ronald E. Taam</i>	
Repeated Thermonuclear Flashes on an Accreting Neutron Star.....	273
<i>S.E. Woosley and Thomas A. Weaver</i>	
A Theoretical Calculation of Rapid X-Ray Transients and Radius Expansion .....	298
<i>Sumner Starrfield, Warren Sparks, James Truran and Scott Kenyon</i>	
Shell Flashes Interacting with the Core of Neutron Stars.....	302
<i>Masayuki Y. Fujimoto, Tomoyuki Hanawa, Icko Iben, Jr., and M.B. Richardson</i>	
Globular Cluster Origin of X-Ray Bursters .....	306
<i>Jonathan E. Grindlay</i>	
Nuclear Physics Problems for Accreting Neutron Stars.....	319
<i>R.K. Wallace and S.E. Woosley</i>	
Emission Region of X-Ray Bursters .....	325
<i>R. Hoshi</i>	
Quasi-Static Winds from Neutron Stars.....	330
<i>F. Melia and P.C. Joss</i>	

## VI. OBSERVATIONS OF GAMMA-RAY BURSTS

<b>Gamma-Ray Bursts: A 1983 Overview .....</b>	<b>333</b>
<i>T.L. Cline</i>	
<b>Gamma-Ray Bursts: Recent Soviet and Franco-Soviet Results, and Observational Overview .....</b>	<b>343</b>
<i>K. Hurley</i>	
<b>The Spectral Properties of Gamma-Ray Bursts: A Review of Recent Developments .....</b>	<b>352</b>
<i>B.J. Teegarden</i>	
<b>Frequency of Fast, Narrow Gamma-Ray Bursts and Burst Classification .....</b>	<b>367</b>
<i>J.P. Norris, T.L. Cline, U.D. Desai and B.J. Teegarden</i>	
<b>Observation of an Absorption Feature in a Gamma-Ray Burst Spectrum .....</b>	<b>373</b>
<i>Geoffrey J. Hueter</i>	
<b>3-10 keV and 0.1 to 2 MeV Observations of Four Gamma-Ray Bursts .....</b>	<b>378</b>
<i>J.G. Laros, W.D. Evans, E.E. Fenimore, R.W. Klebesadel, S. Shulman and G. Fritz</i>	
<b>Observation of a Cosmic Gamma-Ray Burst on HAKUCHO .....</b>	<b>390</b>
<i>M. Katoh, T. Murakami, J. Nishimura, T. Yamagami, M. Fujii and M. Itoh</i>	
<b>High-Energy Emission from Gamma-Ray Bursts .....</b>	<b>399</b>
<i>P.L. Nolan, G.H. Share, S. Matz, E.L. Chupp, D.J. Forrest and E. Rieger</i>	
<b>Are There Nuclear Contributions to Gamma-Ray Burst Spectra?.....</b>	<b>403</b>
<i>S.M. Matz, E.L. Chupp, D.J. Forrest, G.H. Share, P.L. Nolan and E. Rieger</i>	
<b>Implications of the Three GRB Optical Flashes.....</b>	<b>406</b>
<i>B.E. Schaefer</i>	
<b>Periodicities in Gamma-Ray Bursts .....</b>	<b>409</b>
<i>Kent S. Wood</i>	
<b>The Gamma-Ray Burst Spatial Distribution Log N(&gt;S) vs Log S and N(&gt;S,1<sup>II</sup>, b<sup>II</sup>) vs S .....</b>	<b>412</b>
<i>Mark C. Jennings</i>	
<b>Measurement of the Rate of Weak Gamma-Ray Bursts .....</b>	<b>422</b>
<i>C.A. Meegan, G.J. Fishman and R.B. Wilson</i>	

The Intrinsic Gamma Ray Burst Luminosity Function from Observational Data Analysis .....	426
<i>B.M. Belli</i>	
Log N-Log S is Inconclusive .....	429
<i>R.W. Klebesadel, E.E. Fenimore and J.G. Laros</i>	
VII. CATALOG AND BIBLIOGRAPHY OF GAMMA RAY BURSTS..	434
<i>W.A. Baity, G.J. Hueter and R.E. Lingenfelter</i>	
VIII. THEORY AND PHYSICS OF GAMMA-RAY BURSTS	
The Theory of Gamma-Ray Bursts .....	485
<i>S.E. Woosley</i>	
Physics of Gamma-Ray Burst Spectra .....	512
<i>D.Q. Lamb</i>	
Gamma Burst Emission from Neutron Star Accretion .....	548
<i>Stirling A. Colgate, Albert G. Petschek and Robert Sarracino</i>	
The Formation of Planetesimals in Highly Compact Binary Stellar Systems and the Nature of Cosmic Gamma-Ray Bursts .....	555
<i>P.C. Joss and S. Rappaport</i>	
Gamma Ray Burst Emission: A Jet and Fireball Model .....	558
<i>Richard E. Lingenfelter and Geoffrey J. Hueter</i>	
Size-Frequency Distribution of Gamma Ray Bursts from Thermonuclear Runaway on Neutron Stars Accreting Interstellar Gas .....	568
<i>J.C. Higdon and R.E. Lingenfelter</i>	
Gamma-Ray Bursts - The Roundabout Way? .....	578
<i>Peter Kafka and Friedrich Meyer</i>	
Theory of Optical Flashes .....	581
<i>Richard A. London</i>	
Inverse Comptonization vs. Thermal Synchrotron .....	590
<i>E.E. Fenimore, R.W. Klebesadel and J.G. Laros</i>	
Physics of the Synchrotron Model of Cosmic Gamma Ray Bursts .....	597
<i>E.P. Liang</i>	
Spectral Models of Bursting Neutron Stars .....	605
<i>R.Z. Yahel and A. Braun</i>	

- Non-Thermal Synchrotron Radiation in a Strong Magnetic Field.....611  
*R. W. Bussard*

- Equilibria in Strongly Magnetized Pair Plasmas.....615  
*Alice K. Harding*

## IX. SOLAR HIGH ENERGY TRANSIENTS

- Measurements of Solar Hard X-Ray Bursts with High Spectral Resolution and Sensitivity.....619  
*R.P. Lin*

- Neutrons and Gamma Rays from Solar Flares .....628  
*R. Ramaty and R.J. Murphy*

- High Energy Transients from the Sun.....641  
*E.L. Chupp*

## X. INSTRUMENTATION OF THE FUTURE

- The X-Ray Timing Explorer .....642  
*J.E. McClintock and A.M. Levine*

- BATSE/GRO Observational Capabilities .....651  
*G.J. Fishman, C.A. Meegan, T.A. Parnell, R.B. Wilson and W. Paciesas*

- Monte Carlo Simulation of Atmospheric Gamma-Ray Scattering .....665  
*D.J. Morris*

- The Explosive Transient Camera (ETC): An Instrument for the Detection of Gamma-Ray Burst Optical Counterparts.....669  
*G.R. Ricker, J.P. Doty, J.V. Vallerga and R.K. Vanderspek*

- The Rapidly Moving Telescope: An Instrument for the Precise Study of Optical Transients.....687  
*B.J. Teegarden, T.T. von Rosenvinge, T.L. Cline and R. Kaipa*

- All Sky High Resolution Cameras for Hard and Soft X-Rays.....694  
*Paul Gorenstein and Christopher W. Mauche*

- XI. THE HIGH ENERGY TRANSIENT EXPLORER (HETE) .....709  
*S.E. Woosley et al.*
