

# CONTENTS

<b>List of Figures</b>	<b>xiv</b>
<b>List of Tables</b>	<b>xvi</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 Survey of Ultrahigh Energy Cosmic Rays</b>	<b>4</b>
2.1 Introduction . . . . .	4
2.2 Present Knowledge of Cosmic Rays . . . . .	5
2.2.1 Chemical Composition . . . . .	6
2.2.2 Spectrum . . . . .	7
2.3 Candidate Sources . . . . .	9
2.4 Acceleration Models . . . . .	10
2.5 Propagation . . . . .	11
2.6 Direct Measurement Techniques . . . . .	14
2.7 Indirect Detection Through EAS . . . . .	15
2.7.1 Ground Array Experiments . . . . .	16
2.7.2 Atmospheric Light Emission Experiments . . . . .	17
<b>Bibliography</b>	<b>18</b>
<b>3 The Extensive Air Shower</b>	<b>19</b>
3.1 Introduction . . . . .	19
3.2 The Electromagnetic Cascade . . . . .	20
3.3 Electromagnetic Longitudinal Shower Development . . .	21
3.4 Hadronic Shower Development . . . . .	24
3.5 Modeling Hadronic EAS . . . . .	25
3.6 The Elongation Rate . . . . .	27

3.7	The Lateral Distribution Function . . . . .	28
3.8	Muon Lateral Distribution Function . . . . .	29
	<b>Bibliography</b>	<b>34</b>
<b>4</b>	<b>Experimental Techniques—Ground Arrays</b>	<b>36</b>
4.1	Introduction . . . . .	36
4.2	Use of Scintillation Counters . . . . .	37
4.3	Energy Threshold and Angular Resolution of Arrays . . . . .	39
4.4	Arrays Studying $> .1$ EeV Cosmic Ray Flux . . . . .	40
4.4.1	Haverah Park . . . . .	40
4.4.2	Yakutsk . . . . .	44
4.4.3	Akeno . . . . .	47
4.4.4	Sydney . . . . .	47
	<b>Bibliography</b>	<b>49</b>
<b>5</b>	<b>Experimental Techniques: Cherenkov Light</b>	<b>50</b>
5.1	Properties of Cherenkov Radiation . . . . .	50
5.2	The Angular Distribution of Cherenkov Light . . . . .	51
5.3	History of Experimental Detection . . . . .	52
5.4	Primary Particle Energy . . . . .	54
5.5	Cherenkov Light: The Lateral Distribution . . . . .	55
5.6	Extraction of Longitudinal Development . . . . .	56
5.7	The Cherenkov Pulse Shape . . . . .	58
	<b>Bibliography</b>	<b>63</b>
<b>6</b>	<b>Experimental Techniques: Air Fluorescence</b>	<b>65</b>
6.1	Introduction . . . . .	65
6.2	The “Fly’s Eye” . . . . .	66
6.2.1	Signal-To-Noise Considerations . . . . .	67
6.2.2	Triggering . . . . .	69
6.2.3	The Event Plane . . . . .	69
6.2.4	The Time Fit . . . . .	71
6.2.5	New Stereoscopic Method . . . . .	72
6.3	Longitudinal Shower Size Determination . . . . .	74
6.4	Determining the Shower Energy . . . . .	76
6.5	Undetected Energy Corrections . . . . .	77
6.6	Calculating the Differential Cosmic Ray Spectrum . . . . .	78
6.7	Measuring Cherenkov Light Angular Distribution . . . . .	79

6.8 Proposed Improvements . . . . .	80
<b>Bibliography</b>	<b>82</b>
<b>7 The Cosmic Ray Spectrum</b>	<b>84</b>
7.1 Introduction . . . . .	84
7.2 Age of Galactic Cosmic Rays . . . . .	85
7.3 The “Leaky Box” Model . . . . .	86
7.4 Experimental Data Above .1 EeV . . . . .	87
7.5 Speculation on Cosmic Rays Above 10 EeV . . . . .	89
7.6 Acceleration Mechanisms . . . . .	90
7.6.1 Fermi Statistical Acceleration . . . . .	90
7.6.2 Candidate Statistical Acceleration Regions . . . . .	92
7.6.3 Direct Acceleration Models . . . . .	93
7.6.4 Acceleration Models Above 10 EeV . . . . .	95
<b>Bibliography</b>	<b>101</b>
<b>8 Anisotropy</b>	<b>103</b>
8.1 Introduction . . . . .	103
8.2 Experimental Problems . . . . .	104
8.3 Right Ascension And Declination . . . . .	104
8.4 Harmonic Analysis . . . . .	106
8.5 Galactic Coordinates . . . . .	107
8.6 Ground Array Data . . . . .	110
8.7 “Fly’s Eye” Data . . . . .	111
<b>Bibliography</b>	<b>114</b>
<b>9 Composition: Direct Methods</b>	<b>115</b>
9.1 Introduction . . . . .	115
9.2 The “Low Energy Composition” . . . . .	116
9.3 Steepening of the Primary Spectrum . . . . .	116
9.4 The JACEE Experiment . . . . .	118
9.5 The University of Chicago “Egg” . . . . .	121
9.6 The UHN Detector . . . . .	123
9.7 Space Station Experiments . . . . .	125
<b>Bibliography</b>	<b>127</b>

<b>10 Composition: Muon and Hadron Detectors</b>	<b>128</b>
10.1 Introduction . . . . .	128
10.2 Muons in the EAS . . . . .	128
10.3 The Muon Lateral Distribution . . . . .	129
10.4 High Energy Muons . . . . .	130
10.5 The Decoherence Function . . . . .	131
10.6 Muon Multiplicity Depends on Composition . . . . .	132
10.7 Composition Determined from Muon Multiplicity . . . . .	134
10.8 Conflicting Experimental Results . . . . .	134
10.9 Other Techniques for Studying Composition . . . . .	137
10.9.1 Delayed Hadron Technique . . . . .	137
10.9.2 “ $\gamma$ -Ray Family” Technique . . . . .	138
<b>Bibliography</b>	<b>141</b>
<b>11 Ultrahigh Energy Cosmic Ray Composition</b>	<b>143</b>
11.1 Introduction . . . . .	143
11.2 The $X_{max}$ Technique . . . . .	144
11.3 Cherenkov Experiments at $< 10$ PeV . . . . .	145
11.4 Results for $> 10$ PeV . . . . .	146
11.5 The “Fly’s Eye” Results . . . . .	147
11.6 Scaling Violation . . . . .	149
11.7 Future Directions . . . . .	151
<b>Bibliography</b>	<b>156</b>
<b>12 The Greisen Cutoff</b>	<b>158</b>
12.1 General Discussion . . . . .	158
12.2 The Cosmic Ray Spectrum at the Earth . . . . .	159
12.3 The Associated Neutrino Flux . . . . .	161
12.4 “Fly’s Eye” Detection of the Neutrino Flux . . . . .	161
12.5 Detection of Neutrino Flux by DUMAND . . . . .	164
<b>Bibliography</b>	<b>167</b>
<b>13 The Inelastic Total Cross Section</b>	<b>169</b>
13.1 Introduction . . . . .	169
13.2 Relation between Inelastic and Total Cross Sections . . . . .	170
13.3 Measurement Techniques . . . . .	171
13.3.1 The $X_{max}$ Attenuation Method . . . . .	171
13.3.2 The Fluctuation Method . . . . .	175

---

13.3.3 The Zenith Angle Attenuation Technique . . . . .	175
13.4 Glauber Model Calculation . . . . .	177
<b>Bibliography</b>	<b>180</b>
<b>14 Point Sources of <math>\gamma</math>-Rays</b>	<b>181</b>
14.1 Introduction . . . . .	181
14.2 Detection of Sources . . . . .	182
14.3 Cygnus X-3 Observations . . . . .	183
14.4 The Acceleration Mechanism . . . . .	189
14.5 Hercules X-1 Observation . . . . .	191
14.6 Techniques for Increasing Sensitivity . . . . .	193
14.7 Deep Underground Observations . . . . .	194
14.8 Implications of Short Term Variability . . . . .	195
<b>Bibliography</b>	<b>196</b>
<b>15 Appendix: The Atmosphere</b>	<b>198</b>
15.1 EAS Development in the Atmosphere . . . . .	198
15.1.1 The Troposphere . . . . .	198
15.1.2 The Isothermal Atmosphere Approximation . . .	199
15.1.3 Atmospheric Slant Depth . . . . .	200
15.2 Atmospheric Absorption . . . . .	200
15.2.1 Rayleigh Scattering . . . . .	200
15.2.2 Aerosol Scattering . . . . .	201
<b>Bibliography</b>	<b>203</b>
<b>Index</b>	<b>204</b>
