

CONTENTS

Introduction	1
Chapter VI. WAVE PROPAGATION AT DIFFERENT FREQUENCIES NEAR A SMOOTH AND HOMOGENEOUS GROUND SURFACE	3
§29. The Field of an Elevated Radiator ($z \neq 0$) in the Geometrical-Optics Approximation	3
29.1. Effective Regions of Space and Reflection	5
29.2. The Fresnel Reflection Coefficients	7
29.3. Electrical Properties of the Earth's Surface	12
§30. Interference (Reflection) Relations	15
30.1. Vertical Dipole	15
30.2. Horizontal Dipole	17
30.3. Range of Applicability of Interference Relations (Reduced Height)	19
§31. Exact Calculations of the Field Amplitude	20
31.1. Transmitter and Receiver at Ground Level	20
31.2. Raised Source ($z \neq 0$)	33
§32. Field Phase Structure and Velocity of the Ground Wave	38
32.1. Flat Ground Surface	38
32.2. Spherical Ground Surface	43
32.3. Some Measurements of the Phase Velocity	44
§33. The Field in the Subsurface Medium (Land or Sea)	46
Chapter VII. WAVE PROPAGATION ALONG A ROUGH AND INHOMOGENEOUS GROUND SURFACE	49
§34. Some Experimental Results	50
34.1. Medium Waves	50
34.2. Ultrashort Waves	54
34.3. The Influence of a Complex Terrain Structure on the Reflection of Microwaves	57
§35. Some Results of Theoretical Calculations	62
35.1. Random Inhomogeneities and Irregularities	62
35.2. A Piecewise Homogeneous Path	63
35.3. Gentle Slope	72
35.4. Coastal Refraction	74
Chapter VIII. THE INFLUENCE OF THE TROPOSPHERE ON WAVE PROPAGATION ALONG THE EARTH'S SURFACE	77
§36. Some Experimental Results	77

36.1. Medium Waves	77
36.2. Ultrashort Waves	79
36.3. Variability of the Microwave Field	83
36.4. Long- and Very Long-Range Microwave Propagation	86
§37. Refraction in the Troposphere	91
37.1. Normal Refraction	91
37.2. Superrefraction; Guided Propagation	96
§38. Scattering in the Troposphere	99
38.1. Turbulence of the Troposphere	101
38.2. Scattering by Hydrometeors	104
38.3. Molecular Scattering	118
§39. Scattering of Radio Waves by Various Targets	119
39.1. The Scattered Wave Field	120
39.2. Effective Target Cross Sections	123
Chapter IX. PROPAGATION IN THE EARTH-IONOSPHERE WAVEGUIDE (LONG AND VERY LONG WAVES)	129
§40. Theoretical Field Calculations	130
40.1. Spherical and Plane Waveguides with Homogeneous Boundaries (the Method of Modes)	130
40.2. Short Distances from the Source (the Skip-Distance Method)	137
40.3. The Inhomogeneous and Anisotropic Ionosphere	139
§41. Results of Some Numerical Calculations	140
41.1. The Poles	141
41.2. The Field Amplitude	141
41.3. The Additional Phase and the Phase Velocity	147
41.4. Signal Shape; Atmospheric	151
§42. Some Experimental Results	156
42.1. Distance Dependence of the Amplitude of Long Waves	156
42.2. Phase Velocity	163
42.3. Other Properties of Long Radio Waves	164
42.4. Cutoff of VLF Waves in the Waveguide	168
42.5. ELF Resonances	170
Chapter X. RAY-THEORY PROPAGATION IN THE EARTH-IONOSPHERE WAVEGUIDE (MEDIUM TO ULTRASHORT WAVES)	173
§43. Propagation of Medium Waves at Night	173
43.1. Time Fluctuations in the Field	173
43.2. Dependence of the Field Amplitude on Distance	176
§44. Interaction and Self-Interference of Medium Waves in the Ionosphere	180
§45. Some Experimental Results for Short Waves	185
45.1. Dependence on Distance and Time of Day	185
45.2. Diurnal and Other Variations in the Field	188
45.3. Disturbances of Short-Wave Communication	192
§46. Refraction of Short Waves in the Ionosphere	194
46.1. Oblique Phase and Group Paths	194
46.2. The Influence of Horizontal Inhomogeneity	200
46.3. The Influence of the Geomagnetic Field	202
§47. The Range of Short Waves	209
47.1. Wave Trajectories; Maximum Usable Frequency; Skip Distance	209
47.2. The Field Amplitude	215

§48. Round-the-World Echo Signals	216
§49. Nonstandard Propagation Paths of Short and Ultrashort Waves	220
§50. Long-Range Propagation of Ultrashort Waves by Scattering in the Ionosphere	225
Chapter XI. WAVE PROPAGATION IN THE OUTER IONOSPHERE AND MAGNETO- SPHERE	231
§51. Guiding of Waves of Different Frequencies along the Geomagnetic Field Lines	231
§52. Cutoff of Waves and their Transmission through the Ionosphere	237
§53. Refraction of Ultrashort (HF and VHF) Waves Arriving from a Remote Source	242
§54. Cosmic Echoes	247
Postscript	249
