<i>Preface</i> . . . . .	ix
<i>Acknowledgments</i> . . . . .	xi
<i>Contents of Part B</i> . . . . .	xiii

## Chapter 1. General Introduction

1.1 Atmospheric Regions . . . . .	1
1.2 Atmospheric Density . . . . .	6
1.3 Temperature . . . . .	9
1.4 Molecular Mass . . . . .	11
1.5 The Ionosphere . . . . .	12
References . . . . .	17

## Chapter 2. The Composition of the Homosphere

2.1 Introduction . . . . .	18
2.2 Principal Permanent Constituents . . . . .	18
2.3 The Noble Gases . . . . .	20
2.4 Molecular Composition . . . . .	24
2.5 Isotopic Composition . . . . .	26
References . . . . .	31

## Chapter 3. Physical Conditions of the Homosphere

3.1 Introduction . . . . .	33
3.2 Numerical Values between 15 and 100 km . . . . .	36
3.3 Lower Thermosphere . . . . .	45
References . . . . .	47

**Chapter 4. The Transition from the Homosphere to the Heterosphere**

4.1	Introduction . . . . .	49
4.2	The Theoretical Problem . . . . .	50
4.3	Ozone Formation . . . . .	51
4.4	Lifetime of Atomic Oxygen . . . . .	53
4.5	Atomic Oxygen at 100 km . . . . .	56
	References . . . . .	64

**Chapter 5. Temperature Gradient in the Thermosphere**

5.1	Introduction . . . . .	66
5.2	Conditions at 200 km . . . . .	68
5.3	Conditions above 250 km . . . . .	75
5.4	Energies in the Thermosphere . . . . .	77
	References . . . . .	78

**Chapter 6. Photoabsorption**

6.1	Introduction . . . . .	79
6.2	Absorption of x Rays between 1 and 10 Å . . . . .	81
6.3	Absorption of x Rays between 10 and 100 Å . . . . .	85
6.4	Absorption of Ultraviolet Radiation Shorter than 1000 Å . . . . .	88
6.5	Absorption of Ultraviolet Radiation Longer than 1000 Å . . . . .	121
	References . . . . .	128

**Chapter 7. Solar Radiation and Photoionization**

7.1	Introduction . . . . .	131
7.2	Blackbody Emissions and Solar Data . . . . .	134
7.3	x Rays . . . . .	144
7.4	Ultraviolet Radiation at Wavelengths Shorter than 1050 Å . . . . .	151
7.5	Lyman $\alpha$ and Lyman $\beta$ . . . . .	160
7.6	Variation of Solar Emission . . . . .	162
	References . . . . .	165

**Chapter 8. Photodissociation**

8.1	Molecular Oxygen . . . . .	167
8.2	Ozone . . . . .	174
8.3	Molecular Nitrogen . . . . .	176
8.4	Water Vapor . . . . .	176
8.5	Other Constituents . . . . .	178
	References . . . . .	183

**Chapter 9. Collision Processes**

9.1	Introduction . . . . .	184
9.2	Collision Processes . . . . .	184
9.3	Cross Sections Which Depend upon Velocity . . . . .	189
9.4	Elastic Collisions of Electrons with Neutral Particles . . . . .	192
9.5	Inelastic Electron Collisions with Neutral Particles . . . . .	198
9.6	Collisions between Ions and Neutral Particles . . . . .	217
9.7	Charged Particle Collisions . . . . .	232
	References . . . . .	237

**Chapter 10. Aeronomic Reactions**

10.1	Introduction . . . . .	240
10.2	Radiative Recombination of Atoms . . . . .	240
10.3	Recombination of Atoms by Three-Body Collisions . . . . .	243
10.4	Atom Interchange . . . . .	249
10.5	Radiative Recombination of Atomic Ions . . . . .	252
10.6	Dissociative Recombination of Ions . . . . .	253
10.7	Ion-Neutral Reactions . . . . .	256
10.8	Cluster Reactions of Positive Ions . . . . .	272
10.9	Negative Ions . . . . .	278
	References . . . . .	289

**Chapter 11. Oxygen and Ozone**

11.1	Introduction . . . . .	294
11.2	Dissociation of Oxygen . . . . .	294
11.3	Ozone Distribution and Optical Depth . . . . .	299
11.4	Products of the Ozone Photodissociation . . . . .	304
11.5	Concentration of Excited Atoms and Molecules . . . . .	306
	References . . . . .	314

**Chapter 12. Nitrogen and Nitrogen Oxides**

12.1	Introduction . . . . .	315
12.2	Dissociation of Molecular Nitrogen . . . . .	315
12.3	Production of Atomic Nitrogen . . . . .	317
12.4	Formation of Nitric Oxide . . . . .	319
12.5	Reactions Involving Atomic Hydrogen . . . . .	336
12.6	Ionospheric Production of N and NO . . . . .	340
12.7	Effect of Excited Nitrogen Atoms . . . . .	346
	References . . . . .	351

**Chapter 13. Hydrogen Compounds and Their Effects in the Chemosphere**

13.1	Introduction . . . . .	354
13.2	Dissociation and Oxidation of Hydrogen Compounds . . . . .	354
13.3	Water Vapor and Methane in the Stratosphere and Mesosphere . . . . .	362
13.4	Vertical Transport in the Stratosphere and Mesosphere . . . . .	364
13.5	Reactions Involving a Single Hydrogen Atom . . . . .	370
13.6	Effect of Hydrogen on the Distributions of O and O <sub>3</sub> . . . . .	372
13.7	Rates of Change for the Hydrogen Compounds . . . . .	380
	References . . . . .	398
 <b>Appendix A. A Guide to Reactions and Reaction Rate Coefficients</b>		<b>401</b>
 <i>Author Index for Part A</i> . . . . .		<i>411</i>
<i>Subject Index for Parts A and B</i> . . . . .		<i>422</i>
