

## CONTENTS

Preface .....	v
Acknowledgments .....	vii
COSPAR Working Group IV .....	ix

### PART I

#### INTRODUCTION

Background .....	1
Organization of the Report .....	3
Procedure .....	3
Discussion of the CIRA Tables .....	9

### PART II

#### TABLES OF PHYSICAL PROPERTIES OF THE ATMOSPHERE

TABLE I: Average Values Sea Level to 800 km .....	12
TABLE II: Average Maximum Values 200 to 800 km.....	28
TABLE III: Average Minimum Values 170 to 800 km .....	32
Constants and Sea-Level Values .....	44
Comparison of Temperature Curves .....	46

### PART III

#### CONTRIBUTED DATA

Region Sea Level to 90 km	
Data submitted by R. L. F. Boyd and G. V. Groves, London .....	49
Data submitted by T. Hatanaka, Tokyo .....	51
Data submitted by L. M. Jones and J. W. Peterson, Ann Arbor .....	54
Data submitted by W. Nordberg, Washington .....	56
Region 130 km to 1600 km	
Data submitted by H. A. Martin and W. Priester, Bonn .....	59
Data submitted by D. G. King-Hele, Farnborough .....	67
Data submitted by G. V. Groves, London .....	69
Data submitted by H. K. Paetzold and H. Zschörner, München.....	74
Data submitted by M. Römer, Bonn .....	84

<b>Proposals to the U.S.A. Committee on Extension to the Standard Atmosphere</b>	
Region Sea Level to 90 km .....	87
Region 90 to 200 km .....	90
Region 200 to 800 km .....	93
<b>Tentative U.S.S.R. Standard Atmosphere (TSA 60)</b>	
Introduction .....	103
Tables, (TSA 60) Region —2 km to Sea Level; Sea Level to 200 km .....	115
Tables, Region 225 km to 500 km .....	153

## PART IV

### ICAO STANDARD ATMOSPHERE, EXCERPTS FROM NACA REPORT 1235

Introductory Matter .....	157
ICAO Standard Atmosphere - Table in Metric Units (Region — 5 km to Sea Level; Sea Level to 20 km) .....	163
Standard Atmosphere - Summary of Basic Data .....	176
Standard Atmosphere - Conversion Factors .....	177
Symbols .....	177
References .....	177
