Session Officials	xv

BREEDER REACTOR OVERVIEW

The Impact of Management Analysis on the Nuclear Energy Alternative <i>H. A. Kurstedt, Jr., J. A. Nachlas, and P. S. Kurstedt</i>	1965
The Role of the Breeder Reactor in Our Energy Future <i>D. J. Rop</i>	1993
On the Road to Energy Independence—The Breeder Reactor <i>J. C. Anderson</i>	2003
Meeting U.S. Electrical Needs—Is the Breeder Urgent? <i>T. C. Osborne, R. S. Palmer, and H. L. Wyckoff</i>	2013
The LMFBR: Logic and Technology <i>W. W. Little</i>	2023
Personal Decision Making, the Nuclear Dilemma, and the Demonstration of Power <i>H. A. Kurstedt, Jr., and J. A. Nachlas</i>	2043

BREEDER REACTOR TECHNOLOGY

Methodology for Comparative Evaluation of Nuclear Fuel Reprocessing Techniques for Advanced Low Proliferation Risk Fuel Cycles <i>M. K. Goldstein</i>	2065
The Gas Core Reactor—An Alternative to Existing Reactor Concepts <i>B. G. Schnitzler and R. T. Schneider</i>	2091
Alternative Fuel Cycles for Breeder Reactors <i>D. E. Bartine, T. J. Burns, J. R. White, J. M. Kallfelz, and D. M. Rowland</i>	2119

Breeding with Thorium Fuel Cycles in Heavy Water Moderated Reactors
S. Banerjee 2147

Thorium Fuel Cycles and Safeguards
W. A. Higinbotham and C. M. Newstead 2163

Low Proliferation Risk Breeder Reactor Fuel Cycle
M. K. Goldstein 2185

Linear Accelerator Driven (LADR) and Regenerative Reactors (LARR)
for Nuclear Non-proliferation
Meyer Steinberg, H. Takahashi, J. R. Powell, and H. J. C. Kouts
2211

Materials for Advanced Nuclear Energy Systems
L. E. Steele 2229

Materials Technology for Accelerator Production of Fissile Isotopes
J. A. Horak 2257

Thermal Analysis of a Variable Geometry Multi-region Nuclear Fuel Rod
M. D. Almond and H. Wolf 2277

Inherent Emergency Cooling of Liquid Metal Fast Breeder Reactors by
Natural Circulation
R. M. Singer and D. Mohr 2305

EBR-II Experience on Fission-product Releases from Sodium-bonded
Fuel Elements
B. Y. C. So and J. D. B. Lambert 2325

Reactor Scram Experience for Reliability Analysis of LMFBR Shutdown
Systems
M. T. Gerstner and G. E. Edison 2349

Energy Cycles: Their Cost Interrelationships for Power Generation
S. Baron, Sr. 2367

THERMONUCLEAR ENERGY

Fusion Energy: The Iceberg beneath the Tip
J. M. Williams, J. R. Airey, S. L. Bogart, and H. S. Cullingford 2389

Report on a Simple Fusion Reactor Model that Is Already in Operation
D. R. Wells, J. Davidson, P. Ziajka, L. Phadke, and J. Tunstall 2411

- Fusion Power Demonstration Study at ORNL
A. T. Mense and D. Steiner **2431**
- The ELMO Bumpy Torus—An Alternative Fusion Reactor Concept
N. A. Uckan **2439**
- System Studies for a Tokamak Fusion Power Plant
R. L. Reid and Don Steiner **2455**
- Plasma-wall Interaction and the Tokamak Fusion Reactor
D. L. Styris, M. T. Thomas, D. R. Baer, and J. Woo **2477**
- Prospects of Generating Power with Particle-Beam-Drive Inertial Confinement Fusion
S. G. Varnado and J. L. Mitchiner **2499**
- A Waste Management Strategy for Nuclear Fusion Power Systems from a Regulatory Perspective
R. A. Heckman **2521**
- Conceptual Design Study of a Doublet Fusion Ignition Test Reactor
P. Sager **2541**
- Production of Synthetic Fuels: An Important Civilian Application of Laser Fusion
W. W. Meinke and H. J. Gomberg **2563**
