

P A R T O N E

T H E D E C I S I O N S

I	PERSPECTIVE	2
	Petroleum and the physical economics prerequisite. The bastions of the defense. The democratic dilemma. The environmentalists and the confu- sion of fact as to the remaining resource.	9
II	THE LITERATURE	
III	OIL	11
	The givens. The source of confusion. The remain- ing oil resource. Summation of historic petroleum production parameters and projections. The signifi- cance of the petroleum imports requirement.	
IV	GAS	21
	The U. S. natural gas forecast. The gas economy squeeze.	
V	ATOMIC ENERGY, SOLAR ENERGY AND COAL	29
	Nuclear power today. Solar energy. Coal and the Kaiparowits experience.	
VI	THE ENERGY BALANCE FOR THE NEXT TEN YEARS	39
	World petroleum available to the United States.	

VII	THE CRITICAL DECISIONS	46
	The energy decision dilemma. The gas price decision. The petroleum substitution non-decision probability. Federal financing of new energy resources. States' rights. Individual rights. Energy organization.	

VIII	THE POLITICAL-ECONOMIC FUTURE	58
------	-------------------------------	----

P A R T T W O

T H E O I L A N D G A S F I G U R E S

IX	THE PETROLEUM FIGURES	63
----	-----------------------	----

The consensus as to the remaining petroleum resource.
The U.S.G.S. geological estimates of remaining oil.
Dr. M. King Hubbert's forecast method. Short term
forecast and identification of liquid hydrocarbons.
The proved reserves and their contribution to forecast
methodology. Proved reserve withdrawal rate.
Total remaining resource withdrawal rate. The petro-
leum production forecast. The significance of gas
liquids. Economic influences - supply and demand
versus price. Domestic demand. Federal Energy
Administration - Project Independence. U. S. Depart-
ment of the Interior and M. King Hubbert petroleum pro-
duction expectancy. Historic perspective on world
petroleum supply.

X	NATURAL GAS AND ITS SUBSTITUTES	105
---	---------------------------------	-----

Gas production and discovery history. Comparative gas
forecast. The first alternative to natural gas,
petroleum substitution. Liquefied natural gas, LNG.
SNG, synthetic or substitute natural gas. The gas
economy squeeze. Potential future gas.

XI	CONCLUSION	124
	Postscript.	

P A R T T H R E E

T H E S H A P E O F T H E F U T U R E

XII	THE GENERALS	129
XIII	THE INDUSTRY SPECIFICS	131
	Electric power. Gas. Transportation and oil. Atomic power. Solar, wind, shale, and geophysical. Agriculture.	
XIV	THE FUTURE FOR THE INDIVIDUAL	140
	Consumer attitudes and expectancies. Home heating. Transportation. Food. Recreation. Population.	
XV	A BEGINNING FOR CHANGE	149
	Truth. Education.	
XVI	A POTENTIAL ENERGY POLICY	154
	The resistance. Inventory of attitudes in the social structure. The national constituency necessity. The elements of an energy policy. The desirable but improbable energy authority. Possible legislation.	

XVII	THE ECONOMIC FICTIONS AND REALITY	169
	The reality of the earth. The special nature of energy and waste. The fiction of money and capital. The reality of inflation and its measure. The inflation fictions. The void in the nation's balance sheet and the fiction of the Gross National Product. Labor, capital, and the inflation syndrome.	
XVIII	THE SOCIAL CONTRACT AND THE LEADERSHIP DECISION	180
	The decision. Time and the two economic disciplines. The conflict between the free economy and the free society. The probability for survival and the significance of the national constituency imperative.
