

CONTENTS

Introduction	5
Definitions	6
Table 1. Nuclear power reactors in operation and under construction, 31 December 1991 ...	8
Table 2. Reactor types and net electrical power, reactors connected to the grid, 31 December 1991	10
Table 3. Reactor types and net electrical power, reactors under construction, 31 December 1991	11
Table 4. Construction starts during 1991	12
Table 5. Connections to the grid during 1991	12
Table 6. Scheduled connections to the grid during 1992	13
Table 7. Reactor years experience, up to 31 December 1991	14
Table 8. Reactor units and net electrical power, 1960 to 1992	16
Table 9. Reactor suspensions and cancellations during 1991	18
Table 10. Reactors connected to the grid, 31 December 1991	19
Table 11. Reactors under construction, 31 December 1991	35
Table 12. Reactors shut down, 31 December 1991 .	38
Table 13. Annual construction starts and connections to the grid, 1955 to 1991	41
Table 14. Average construction time span	42
Table 15. Cumulative performance factors for non-prototype reactors up to 1990	44
Table 16. Average full outage statistics for non-prototype reactors during 1990	45
Table 17. Causes of unavailability during 1990 for non-prototype reactors	46

Table 18.	Causes of unavailability, 1971 to 1990, for non-prototype reactors	47
Table 19.	Abbreviations and summary	48
Figure 1.	Reactors in operation and net electrical power (as of 31 December 1991)	61
Figure 2.	Reactors under construction and net electrical power (as of 31 December 1991)	62
Figure 3.	Nuclear share of electricity generation (as of 31 December 1991)	63
Figure 4.	Average construction time span (as of 31 December 1991)	64
Figure 5.	Number of reactors in operation by age (as of 31 December 1991)	65
Figure 6.	Annual construction starts and grid connections (1955–1991)	66
