

Contents

List of Contributors	v
Preface	vii
F. A. Robinson	
Society's Future Energy Needs	1
Sir Samuel Curran	
Energy Resources: Problems and Opportunities	17
J. K. Hambling	
Energy – Transmission, Storage and Management	33
I. Fells	
Energy-efficient Processes for the Chemical Industry	49
H. L. Roberts	
A Chemical Challenge in Nuclear Energy	59
J. S. Broadley	
Human Energy Levels, Limits and Needs	73
L. E. Reece and R. M. Kenedi	
Can Human Energy Needs be met?	83
C. R. W. Spedding	
Possible Effects of Human Activity on World Climate	97
J. S. Sawyer	
Crops and Fertilizers: Overall Energy Budgets	119
J. A. Tatchell	
Energy Conservation in Biology	137
R. J. P. Williams	
Ideas and Ideals for the Education of Chemists at Universities.	163
C. Kemball	

Nature's Assets – an Elementary View	177
P. F. Corbett	
Fresh Air	195
J. E. Lovelock	
Mineral Recycling: a Down-to-Earth Approach	205
A. K. Barbour	
Fire, Flames, and Energy	217
G. R. Bainbridge	
The Thirst for Water	237
R. S. Silver
