The Institution of Electrical Engineers is not, as a body, responsible for the opinions expressed by individual authors or speakers.

<i>Page No.</i>	
161	L Allais Interconnection of solar cells with the power grid using a switching inverter
73	T M Baker Electric cars and the electricity system
313	S E Batty Solar energy — alternative or complementary energy concept?
77	M A Bell Enhanced compressed air storage using low grade thermal energy
127	N W Bellamy A second generation wave energy device — the Clam concept
61	M A Bergougnou, J S M Botterill, J R Howard, D C Newey, A G Salway and Y Teoman High temperature heat storage
296	E A Bossanyi, G E Whittle, N H Lipman and P J Musgrove Wind turbine response and system integration
200	I C Broadley, R Coats and W J Hefner Development of the coal fired combined cycle and gas turbine cycle for power generation
255	W G Cartwright, J A Parise and F S Dorregaray Performance characteristics of a variable speed heat pump
273	B R Clayton and P Filby Oscillating kinetic energy converters
17	R Clayton Hybrid heating systems: low cost electricity substitution
169	P Q Collins and R Tomkins Economics of satellite solar power system operation
147	T J Coutts and R Hill Resource constraints on the large scale terrestrial exploitation of solar cells
135	J R Cure and J A Sullivan Generation and transmission of electricity from wave energy schemes
44	M G Davies The effect of building construction and ventilation on the value of solar radiation to reduce heat needs
339	M W Drew Presenting the economics of renewables
