|------------------|---|-----|
| Foreword | by Lord Robens of Woldingham | ix |
| Preface | | xi |
| Acknowledgements | | xii |
| Introduction | | 1 |
| Chapter 1. | Current Primary Energy Resources | |
| 1.1 | Coal | 4 |
| 1.2 | Gas | 9 |
| 1.3 | Oil | 12 |
| 1.4 | Nuclear Fuel | 15 |
| 1.5 | Industrial Implications of Energy Resources | 16 |
| Chapter 2. | Optimum Use of Prime Movers for Power Generation and Other Applications | |
| 2.1 | Electricity Generation by National Authorities | 19 |
| 2.2 | Generation of Power by Industry | 23 |
| 2.3 | Steam Turbines | 24 |
| 2.4 | Rankine Vapour Cycle Turbines Using Freons | 27 |
| 2.5 | Gas Turbines | 28 |
| 2.6 | Combined Cycles | 36 |
| 2.7 | Diesel and Gas Engines | 38 |
| 2.8 | Installation and Control Systems | 48 |
| 2.9 | Conclusions | 49 |
| Chapter 3. | The Energy Intensive Industries - 1 | |
| 3.1 | Iron and Steel Production | 52 |
| 3.2 | Aluminium | 59 |
| 3.3 | The Chemical Industry | 62 |
| 3.4 | Oil Refineries | 71 |
| Chapter 4. | The Energy Intensive Industries - 2 | |
| 4.1 | The Pulp and Paper Industry | 76 |
| 4.2 | The Glass Manufacturing Industry | 85 |
| 4.3 | The Food Processing Industry | 92 |
| 4.4 | The Textile Industry | 99 |
| 4.5 | Conclusions | 106 |
| Chapter 5. | Common Items of Plant - Good Housekeeping | |
| 5.1 | Air Conditioning | 110 |
| 5.2 | Air Conditioning Control Systems | 113 |
| 5.3 | Boilers | 117 |
| 5.4 | Chimneys | 118 |
| 5.5 | Combustion Systems | 119 |

| | | |
|---|---|-----|
| 5.6 | Compressed Air Systems | 124 |
| 5.7 | Cooling Towers | 125 |
| 5.8 | Dryers | 126 |
| 5.9 | Electricity Generation (In-Plant) | 130 |
| 5.10 | Electrical Equipment | 131 |
| 5.11 | Furnaces | 132 |
| 5.12 | General Process Heating | 136 |
| 5.13 | Incinerators | 138 |
| 5.14 | Lighting in Factories and Offices | 139 |
| 5.15 | Plant Buildings | 143 |
| 5.16 | Plant Domestic Hot Water Systems | 145 |
| 5.17 | Useful Aids to Energy Conservation Implementation | 145 |
| 5.18 | Steam Traps | 146 |
| 5.19 | Vats and Hot Storage Tanks | 147 |
| 5.20 | Fuel Additives | 147 |
| 5.21 | Sources of Other Data | 148 |
| | | |
| Chapter 6. Common Items of Plant - Energy Recovery | | |
| 6.1 | Air Conditioning | 152 |
| 6.2 | Boilers | 162 |
| 6.3 | Burners - Heat Recovery to Improve Efficiency | 169 |
| 6.4 | Dryers - Heat Recovery and Fluidised Bed Systems | 171 |
| 6.5 | Furnaces | 180 |
| 6.6 | Incinerators | 184 |
| 6.7 | Thermal Fluid Heaters | 191 |
| 6.8 | 'Non-Destructive' Waste Recovery Techniques | 193 |
| | | |
| Chapter 7. Waste Heat Recovery Techniques | | |
| 7.1 | Heat Pipe Heat Exchangers | 199 |
| 7.2 | Liquid-Coupled Indirect Heat Exchangers | 207 |
| 7.3 | Gas-Coupled Indirect Heat Exchangers | 211 |
| 7.4 | Rotating Regenerators | 211 |
| 7.5 | Plate Heat Exchangers | 219 |
| 7.6 | Economisers | 224 |
| 7.7 | Waste Heat Boilers | 227 |
| 7.8 | Recuperators | 232 |
| 7.9 | The Heat Pump | 238 |
| 7.10 | Other Heat Exchanger Types | 257 |
| | | |
| Chapter 8. Energy Storage | | |
| 8.1 | Thermal Storage Boilers and Accumulators | 264 |
| 8.2 | Thermal Insulation | 267 |
| 8.3 | Heat Storage Media | 270 |
| | | |
| Chapter 9. New or Specialised Processes and Plant Having Energy-Saving Potential | | |
| 9.1 | Dielectric and Microwave Heating | 276 |
| 9.2 | Electron Beam Welding | 279 |
| 9.3 | Fluidised Bed Technology | 282 |
| 9.4 | Electric Foil Heating Elements | 285 |
| 9.5 | The Laser as a Welding Tool | 286 |

Chapter 10. Alternative Sources of Energy

| | | |
|------|------------------------------|-----|
| 10.1 | Wind Power | 292 |
| 10.2 | Geothermal Energy | 294 |
| 10.3 | Wave Power | 296 |
| 10.4 | The Hydrogen Economy Concept | 298 |
| 10.5 | Solar Energy | 300 |
| 10.6 | Conclusions | 303 |

Appendices.

| | | |
|---|---|-----|
| 1 | Energy Management and the Energy Audit | 306 |
| 2 | Financial Analyses for Evaluating Benefits of Energy Conservation Equipment | 309 |
| 3 | Organisations Offering Services to Industry in the Field of Energy Conservation | 312 |
| 4 | Manufacturers of Equipment for Energy Conservation | 319 |
| 5 | Bibliography | 332 |
| 6 | Useful Conversion Factors and Fuel Properties | 342 |

| | | |
|---------------|--|-----|
| Index. | | 344 |
|---------------|--|-----|
