

Contents

The Physical Concept of Energy K.O. Thielheim (With 8 Figures)	1
Resources and Reserves of Fossil and Nuclear Fuels F. Bender and K.E. Koch (With 7 Figures)	20
Synthetic Fuels W. Peters (With 10 Figures)	32
The Carbon Dioxide Problem H. Oeschger, U. Siegenthaler, and T. Wenk (With 9 Figures)	47
Electricity and Heat from Thermal Nuclear Reactors W. Oldekop (With 18 Figures)	66
High-temperature Reactors R. Schulten (With 8 Figures)	92
Technology of Fast Breeder Reactors G. Keßler (With 12 Figures)	106
Fast Breeder Reactors in France in 1979 M. Rapin (With 18 Figures)	129
Nuclear Fuel Cycle M. Rapin (With 10 Figures)	147
Deposition of Radioactive Waste E. Albrecht (With 9 Figures)	167
Nuclear Fusion with Magnetic Containment A. Schlüter (With 7 Figures)	182
Laser-Driven Nuclear Fusion S. Witkowski (With 19 Figures)	193
Hydroelectricity D.L. Vischer (With 21 Figures)	219
Solar Power Plants H. Treiber (With 12 Figures)	252

Electricity from the Sun - Photovoltaics E.F. Schmidt (With 8 Figures)	274
Exploitation of Wind Energy by Wind Power Plants S. Helm and E. Hau (With 31 Figures)	294
Tidal Power Stations R. Bonnefille (With 10 Figures)	319
Geothermal Energy O. Kappelmeyer (With 6 Figures)	335
Demands and Resources of Energy in the Present and Future U. Lantzke and E. Meller (With 1 Figure)	346
Energy Strategies P.J. Jansen	359
Subject Index	369
