FOREWORD	ix
WORKSHOP PARTICIPANTS, ASSOCIATES, AND STAFF	xiii
ACKNOWLEDGMENTS	xvii
Institutions and Sponsors	xvii
This Report	xviii
The Work Program of WAES	xx
Other Contributors	xx
INTRODUCTION	xxiii
PART I: GLOBAL ENERGY FUTURES	3
Conclusions	3
Mapping the Future	6
The Critical Problems: Gaps Between Supply and Demand	7
The Decline of the Oil Era	17
Demand	22
Conservation	26
Coal	27
Natural Gas	31
Nuclear Energy	34
Hydroelectricity	37
Other Fossil Fuels	38
Geothermal	39
Solar and Other Renewables	39
Energy Pricing	40
Environment and Climate	41
Uncertainties	43
National and International Issues	43
Conclusion	46
PART II: FRAMEWORK FOR THE ENERGY DIALOGUE	
CHAPTER 1: MAPPING THE FUTURE: THE WAES APPROACH	49
The Challenges of Forecasting	49
The Overall Framework	51
The Scenario Variables	57
World Energy Price	57

	Page
World Economic Growth	58
National Policy Response	59
Oil Discoveries and Production Limits	63
Principal Replacement Fuel	65
Selecting Useful Scenarios	65
Analytical Methods: Energy Demand	67
Analytical Methods: Energy Supply	69
Analytical Methods: Energy Supply-Demand Integration (Balancing)	71
Unconstrained Integrations	72
Constrained Integrations	74
 CHAPTER 2: ENERGY DEMAND AND CONSERVATION	 79
Some Input Assumptions	83
Economic Growth Assumptions	83
Energy Price Assumptions	84
Energy Policy Assumptions	88
Energy Demand Totals and Growth Rates	88
Some Important Factors	91
Is Zero Energy Growth Possible?	93
Developing Countries' Demand	94
Energy Demand by Sector	97
Fuels Demand	100
Priority Uses of Oil	102
Energy Conservation	104
Approach and Background	105
Energy Conservation in Sectors	106
Implementation of Conservation Measures	108
 CHAPTER 3: OIL	 111
Producing Oil	112
Factors That Determine Oil Supply	115
Proven Reserves at the End of 1975	117
Additions to Proven Oil Reserves 1950-1975	119
Future Gross Additions to Reserves	122
Genuine New Discoveries	122
Additions to Reserves in Fields Discovered Before 1975	123
WAES Assumptions for Gross Additions to Reserves	125
Oil Demand	127
Coupling of Oil Demand and Oil Discovery Rates	127
The Real World	131
OPEC and Non-OPEC	131
Non-OPEC Production 1975-2000	133

TABLE OF CONTENTS

	Page
Non-OPEC Production 2000-2025	134
OPEC Production 1975-2000	135
OPEC Production 2000-2025	139
Total World Outside Communist Areas' Oil Production	139
World Outside Communist Areas' Oil Supply/Demand Balance in 1985 and 2000	142
A More Optimistic Future?	142
Conclusion	145
 CHAPTER 4: NATURAL GAS	 147
Producing Gas	148
Proven Reserves	149
Ultimately Recoverable Reserves	150
Natural Gas Supply and Demand 1950-1972	151
Natural Gas Supply and Demand 1972-2000	153
Method of Analysis	153
North America	153
Western Europe	154
Japan	156
OPEC	156
Rest of WOCA (non-OPEC)	157
Required Gas Imports in 1985 and 2000	157
Potential Natural Gas Trade	159
Exports from the U.S.S.R.	159
LNG Imports from OPEC Countries	160
Pipeline Gas from OPEC	160
Balancing Natural Gas Supply and Demand in 1985	161
Balancing Supply and Demand in 2000	162
Methanol	164
Coal Gasification	165
Reducing Demand	165
Conclusions	165
 CHAPTER 5: COAL	 167
Coal Today	168
The Resource Base	169
Demand	174
Coal Supply Potential	175
WOCA Coal Production Estimates	175
The United States as a Potential Coal Producer and Exporter	178
Infrastructure Requirements for Coal Development	181
Policy Issues in the Development of Coal Production	183

	Page
Synthetic Oil and Gas from Coal	184
Implications for Action	186
 CHAPTER 6: NUCLEAR ENERGY	 189
Editor's Note	189
The WAES Approach	189
The WAES Scenario Estimates of Future-Installed Nuclear Capacity	191
Some Special Characteristics of the Nuclear Safety Debate	193
Nuclear Fuel Cycles	196
Reactor Types	196
Reactor Design Factors	196
The Light Water Reactor—LWR	198
The Heavy Water Reactor—HWR (CANDU-type)	200
The Fast Breeder Reactor—FBR	201
The High Temperature Reactor—HTR	202
The WAES Nuclear Assessment	202
WAES Scenario Estimates of Future-Installed Nuclear Capacity	202
Uranium Resources	202
Enrichment Capacity	207
Reprocessing Capacity	209
Other Parts of the Fuel Cycle	210
Fast Breeder Reactors	210
Stages of Nuclear Choice	211
Three Stages of Choice	211
Stage #1—Single Use of Uranium	212
Stage #2—Reprocessing and Plutonium Recycle	212
Stage #3—The Fast Breeder	213
Projections to the Year 2000	213
Choice in WAES Scenarios	213
Some Implications of Single Use	213
Implications of Uncertainty of the Nuclear Industry	214
Nuclear Fusion	215
The Task of WAES	215
 CHAPTER 7: OTHER FOSSIL FUELS AND RENEWABLES	 217
Oil Sands	217
Heavy Oil	219
Oil Shale	219
Hydroelectricity	221
Geothermal	222
Solar	223

TABLE OF CONTENTS

	Page
Solar Uses for Hot Water and Space Heating and Cooling	225
Electricity from the Sun	226
Solar Energy from the Seas	227
Bioconversion	228
Wind Power	228
Solar: In Conclusion	229
Other Sources: Conclusions	229

CHAPTER 8: CRITICAL PROBLEMS: ENERGY DEMANDS AND SUPPLIES MISMATCHED

Energy Balancing	231
WAES Supply-Demand Integrations	232
Overview: The Integrated Energy Picture, 1972-1985-2000	235
Oil Imports	236
Gas and Coal Imports and Exports	240
Regional Energy Balances	242
Fuel Switching for Energy Balancing	244
Implications	247
Energy Balances and Imbalances in 1985	248
Lessons from 1985	248
Supply-Demand Integrations, 1985	249
Energy Balances and Imbalances in 2000	251
Lessons from 2000	251
Supply-Demand Integrations, 2000	252
A Case Example	255
Other Cases	259
Other Uncertainties	264
Conclusions	265

APPENDIX 1: ENERGY AND ECONOMIC GROWTH PROS- PECTS FOR THE DEVELOPING COUNTRIES: 1960-2000

Preface	267
Introduction	268
Developing Country Coverage	270
Population Trends	271
WAES Scenario Assumptions	272
Methodology	272
Demand for Energy	274
Economic Growth Rate Assumptions: 1960-2000	274
Historical Growth in Energy Consumption: 1960-72	275
Economic Growth and Energy Growth	276
Estimated Developing Country Energy Consumption: 1972-2000	280

TABLE OF CONTENTS

	Page
Supply of Energy	280
Estimated Developing Country Energy Supplies: 1972-2000	280
Oil	281
Natural Gas	283
Solid Fuels	284
Electrical Generation	284
Energy Supply-Demand Integration	286
Imports and Exports	288
