		<u>page</u>
0	<u>Summary of Findings and Conclusions</u>	5
1	<u>Preface</u>	9
2	<u>The Basic Situation</u>	10
3	<u>Problems and Targets</u>	13
4	<u>Conduct of the Study</u>	16
	4.1 Analysis of the relevant literature	16
	4.2 The questionnaire campaign	16
	4.3 Personal talks	17
	4.4 Executive Council of the World Energy Conference; Meetings of the Conservation Commission	17
	4.5 Review Board	17
	4.6 Bases of the report	18
5	<u>Estimation of the World's Resources and Reserves of Coal</u>	19
	5.1 Problems of differentiating between coal resources and coal reserves	19
	5.2 Evaluation criteria	20
	5.3 Estimates of the coal resources and coal reserves	22
6	<u>The Availability of the Coal Reserves</u>	44
	6.1 Aspects of availability	44
	6.2 Investigations into the availability of coal in the main coal-producing countries	45
	6.3 Estimated possible trend in coal production up to year 2020	104
	6.4 Global availability (export availability)	122
7	<u>Economic-Statistical Estimation of the Possible Trend in Production, based on Different Reserves Data until 2020</u>	129
8	<u>Possibilities of an Increased Coal Output</u>	131
9	<u>List of References</u>	134
