## **PART 1 DATABASE SYSTEM ARCHITECTURE**

---

### **CHAPTER 1 BASIC CONCEPTS**

1.1	What Is a Database System?.....	3
1.2	Operational Data.....	7
1.3	Why Database?.....	9
1.4	Data Independence.....	12
1.5	An Architecture for a Database System.....	17
1.6	Distributed Databases.....	28
	Exercises.....	28
	References and Bibliography.....	29

### **CHAPTER 2 STORAGE STRUCTURES**

2.1	Introduction.....	33
2.2	Possible Representations for Some Sample Data.....	36
2.3	The Physical Record Interface: Indexing Techniques.....	44
2.4	General Indexing Techniques.....	50
	Exercises.....	53
	References and Bibliography.....	55

**CHAPTER 3  
DATA STRUCTURES AND CORRESPONDING OPERATORS**

3.1	Introduction.....	63
3.2	The Relational Approach.....	64
3.3	The Hierarchical Approach.....	67
3.4	The Network Approach.....	70
3.5	Higher-Level Operators.....	73
3.6	Summary.....	78
	Exercises.....	79
	References and Bibliography.....	80

**PART 2  
THE RELATIONAL APPROACH**

---

**CHAPTER 4  
RELATIONAL DATA STRUCTURE**

4.1	Relations.....	83
4.2	Domains and Attributes.....	85
4.3	Keys.....	87
4.4	Extensions and Intensions.....	90
4.5	Summary.....	91
	Exercises.....	93
	References and Bibliography.....	94

**CHAPTER 5  
THE ARCHITECTURE OF SYSTEM R**

5.1	Background.....	97
5.2	Architecture.....	99
	References and Bibliography.....	104

**CHAPTER 6  
SYSTEM R DATA STRUCTURE**

6.1	Introduction.....	107
6.2	Base Tables.....	108
6.3	Indexes.....	110
6.4	Discussion.....	111
	Exercises.....	114
	References and Bibliography.....	115

**CHAPTER 7  
SYSTEM R DATA MANIPULATION**

7.1	Introduction.....	117
7.2	Retrieval Operations.....	117
7.3	Built-in Functions.....	131
7.4	Update Operations.....	135
7.5	The System R Dictionary.....	137
7.6	Discussion .....	139
	Exercises.....	140
	References and Bibliography.....	142

**CHAPTER 8  
EMBEDDED SQL**

8.1	Introduction.....	145
8.2	Operations Not Involving Cursors.....	147
8.3	Operations Involving Cursors.....	148
8.4	Dynamic Statements.....	153
8.5	Discussion .....	156
	Exercises.....	157
	References and Bibliography.....	158

**CHAPTER 9  
THE EXTERNAL LEVEL OF SYSTEM R**

9.1	Introduction.....	159
9.2	Views .....	159
9.3	DML Operations on Views.....	162
9.4	Views and Data Independence.....	166
9.5	Summary .....	167
	Exercises.....	168
	References and Bibliography.....	169

**CHAPTER 10  
THE INTERNAL LEVEL OF SYSTEM R**

10.1	The Research Storage System.....	171
10.2	Segments and Pages.....	172
10.3	Files and Records.....	173
10.4	Access Paths.....	174
10.5	An Example.....	177
10.6	The RSS Directory.....	179
	References and Bibliography.....	179

## CHAPTER 11

### QUERY BY EXAMPLE

11.1	Introduction . . . . .	181
11.2	Retrieval Operations . . . . .	183
11.3	Retrieval Operations on Tree-Structured Relations . . . . .	187
11.4	Built-in Functions . . . . .	191
11.5	Update Operations . . . . .	193
11.6	The QBE Dictionary . . . . .	195
11.7	Discussion . . . . .	199
	Exercises . . . . .	201
	References and Bibliography . . . . .	201

## CHAPTER 12

### RELATIONAL ALGEBRA

12.1	Introduction . . . . .	203
12.2	Traditional Set Operations . . . . .	205
12.3	Attribute-Names for Derived Relations . . . . .	206
12.4	Special Relational Operations . . . . .	208
12.5	Examples . . . . .	212
12.6	Discussion . . . . .	213
	Exercises . . . . .	215
	References and Bibliography . . . . .	215

## CHAPTER 13

### RELATIONAL CALCULUS

13.1	Introduction . . . . .	223
13.2	Tuple-Oriented Relational Calculus . . . . .	224
13.3	Domain-Oriented Relational Calculus . . . . .	230
	Exercises . . . . .	233
	References and Bibliography . . . . .	234

## CHAPTER 14

### FURTHER NORMALIZATION

14.1	Introduction . . . . .	237
14.2	Functional Dependence . . . . .	240
14.3	First, Second, and Third Normal Forms . . . . .	242
14.4	Relations With More Than One Candidate Key . . . . .	249
14.5	Good and Bad Decompositions . . . . .	253
14.6	Fourth Normal Form . . . . .	255
14.7	Fifth Normal Form . . . . .	260
14.8	Summary . . . . .	264
	Exercises . . . . .	266
	References and Bibliography . . . . .	268

**PART 3  
THE HIERARCHICAL APPROACH**

---

**CHAPTER 15  
THE ARCHITECTURE OF AN IMS SYSTEM**

15.1	Background .....	275
15.2	Architecture .....	276
	References and Bibliography .....	277

**CHAPTER 16  
IMS DATA STRUCTURE**

16.1	Physical Databases .....	279
16.2	The Database Description .....	282
16.3	Hierarchical Sequence .....	285
16.4	Some Remarks on the Education Database .....	285
	Exercises .....	287
	References and Bibliography .....	288

**CHAPTER 17  
THE EXTERNAL LEVEL OF IMS**

17.1	Logical Databases .....	289
17.2	The Program Communication Block .....	291
	Exercise .....	294
	References and Bibliography .....	294

**CHAPTER 18  
IMS DATA MANIPULATION**

18.1	Defining the Program Communication Block (PCB) .....	295
18.2	The DL/I Operations .....	297
18.3	DL/I Examples .....	299
18.4	Constructing the Segment Search Argument (SSA) .....	304
18.5	SSA Command Codes .....	304
18.6	Using More Than One PCB .....	308
	Exercises .....	309
	References and Bibliography .....	309

**CHAPTER 19  
THE INTERNAL LEVEL OF IMS**

19.1	Introduction .....	311
19.2	HSAM .....	313
19.3	HISAM .....	314
19.4	HD Structures: Pointers .....	319

19.5	HDAM .....	321
19.6	HIDAM .....	324
19.7	Secondary Data Set Groups .....	325
19.8	The Mapping Definition .....	329
19.9	Reorganization .....	333
19.10	Data Independence .....	334
19.11	Summary .....	336
	Exercises .....	337
	References and Bibliography .....	337

## **CHAPTER 20**

### **IMS LOGICAL DATABASES**

20.1	Logical Databases (LDBs) .....	339
20.2	An Example .....	340
20.3	Terminology .....	343
20.4	The Database Descriptions (DBDs) .....	344
20.5	Loading the Logical Database .....	347
20.6	Processing the Logical Database .....	348
20.7	Bidirectional Logical Relationships .....	350
20.8	A Note on the Storage Structure .....	356
20.9	Logical Databases Involving a Single Physical Database .....	356
20.10	Some Rules and Restrictions .....	359
20.11	Summary .....	360
	Exercises .....	361
	References and Bibliography .....	362

## **CHAPTER 21**

### **IMS SECONDARY INDEXING**

21.1	Introduction .....	363
21.2	Indexing the Root on a Field Not the Sequence Field .....	365
21.3	Indexing the Root on a Field in a Dependent .....	368
21.4	Indexing a Dependent on a Field in That Dependent .....	371
21.5	Indexing a Dependent on a Field in a Lower-Level Dependent .....	373
21.6	Additional Features .....	374
21.7	Summary .....	374
	Exercises .....	376
	References and Bibliography .....	376

## **CHAPTER 22**

### **IMS FAST PATH DATABASES**

22.1	The Fast Path Feature .....	377
22.2	Main Storage Databases .....	378
22.3	Data Entry Databases .....	384
	References and Bibliography .....	386

**PART 4  
THE NETWORK APPROACH**

---

**CHAPTER 23  
THE ARCHITECTURE OF A DBTG SYSTEM**

23.1	Background .....	389
23.2	Architecture .....	390
	References and Bibliography .....	392

**CHAPTER 24  
DBTG DATA STRUCTURE**

24.1	Introduction .....	395
24.2	The Set Construct: Hierarchical Examples .....	395
24.3	The Set Construct: Network Examples .....	403
24.4	Singular Sets .....	406
24.5	A Sample Schema .....	407
24.6	Membership Class .....	412
24.7	Set Selection .....	415
	Exercises .....	417
	References and Bibliography .....	418

**CHAPTER 25  
THE EXTERNAL LEVEL OF DBTG**

25.1	Introduction .....	421
25.2	Differences Between the Subschema and Schema .....	421
25.3	A Sample Subschema .....	422
	Exercise .....	424
	References and Bibliography .....	424

**CHAPTER 26  
DBTG DATA MANIPULATION**

26.1	Introduction .....	425
26.2	Currency .....	425
26.3	Exception Handling .....	428
26.4	GET .....	429
26.5	STORE .....	430
26.6	ERASE .....	431
26.7	MODIFY .....	432
26.8	CONNECT .....	433
26.9	DISCONNECT .....	434
26.10	RECONNECT .....	434
26.11	FIND .....	435
26.12	Keep Lists .....	441

26.13	Miscellaneous Statements.....	444
	Exercises.....	445
	References and Bibliography.....	446

**PART 5**  
**THE THREE APPROACHES REVISITED**

---

**CHAPTER 27**  
**THE UNIFIED DATABASE LANGUAGE**

27.1	Introduction.....	449
27.2	The Approach to Commonality.....	449
27.3	Declarative Language.....	452
27.4	Manipulative Language.....	457
27.5	Additional Features.....	464
27.6	Conclusion.....	468
	Exercises.....	468
	References and Bibliography.....	470

**CHAPTER 28**  
**A COMPARISON OF THE RELATIONAL AND NETWORK APPROACHES**

28.1	Introduction.....	473
28.2	The Conceptual Level.....	473
28.3	Some Criteria for the Conceptual Schema.....	475
28.4	The Relational Approach.....	478
28.5	The Network Approach.....	479
28.6	Conclusion.....	487
	References and Bibliography.....	487

	<b>Answers to Selected Exercises.....</b>	<b>491</b>
	<b>List of Acronyms.....</b>	<b>559</b>
	<b>Index.....</b>	<b>561</b>
