

CONTENTS

Preface *xi*

1 **What Is Data Base?** 1

Introduction 1
What Is a Data Base? 2
Value of Data 4

2 **Productivity and Flexibility** 7

Introduction 7
Multiple Usage of Data 8
Problems with File Systems 8
Maintenance 11
Data-Base Management Systems 13
Are You Data-Independent? 13
Ad Hoc Requests 14
Constant Change 16
Failure 16
Delusions 17
Infrastructure 18
Incremental Growth 18

3	Who Does What?	21
	<i>Introduction</i>	21
	<i>Levels of Data Sharing</i>	21
	<i>Data-Item Definition</i>	22
	<i>Data Modeling</i>	25
	<i>Data Administrator</i>	25
	<i>Data-Base Designer</i>	26
	<i>Logical and Physical Data</i>	26
	<i>The Design Process</i>	28
	<i>Subject Data Bases</i>	28
	<i>The View from the Top</i>	32
	<i>Politics</i>	34
	<i>A Long Journey</i>	34
4	What Are Data?	37
	<i>Bubble Charts</i>	37
	<i>Data Items</i>	37
	<i>Associations Between Data Items</i>	38
	<i>Single-Head and Double-Head Arrows</i>	38
	<i>Many Occurrences of Data Items</i>	40
	<i>Reverse Associations</i>	40
	<i>Data-Item Groups</i>	41
	<i>Keys and Attributes</i>	42
	<i>Data-Item Groups</i>	43
	<i>Entities</i>	43
	<i>Concatenated Keys</i>	44
	<i>Multiple Associations Between Data Items</i>	47
5	Data Modeling	49
	<i>Logical Design</i>	49
	<i>Data Administration</i>	50
	<i>End-User Iterations</i>	52
	<i>Clear Representation</i>	52
	<i>Synthesis</i>	53
	<i>Synthesis Illustration</i>	53
6	Design Tools for End Users	57
	<i>Introduction</i>	57
	<i>Data Dictionary</i>	57
	<i>Data-Modeling Tool</i>	61
	<i>Application Pressure</i>	61
	<i>Coding the Bubble Charts</i>	62

7 How to Succeed with Data Modeling 65

<i>Stability</i>	65
<i>Thinking About the Future</i>	65
<i>Additional Attributes</i>	66
<i>Hidden Keys</i>	66
<i>Dictionary Check</i>	67
<i>Caution with Concatenated Keys</i>	68
<i>Reverse Mapping Between Keys</i>	69
<i>Dependence on the Whole Key</i>	69
<i>Avoidance of Hidden Primary Keys</i>	70
<i>Concatenated Keys</i>	71
<i>How Large Should User Views Be?</i>	71
<i>Conversion and Compatibility</i>	73
<i>Distributed Data</i>	74
<i>A Small Step at a Time</i>	74

8 Data-Base Languages for End Users 75

<i>Introduction</i>	75
<i>Interactive? On-Line?</i>	75
<i>Spontaneity</i>	77
<i>Capabilities</i>	78
<i>Distributed Files</i>	78
<i>Multiple Languages</i>	78
<i>Forms-Oriented Language</i>	79
<i>GIS</i>	80
<i>Easy-to-Use Data-Base Languages</i>	86
<i>QUERY-BY-EXAMPLE</i>	86
<i>Unknowledgeable Beginners</i>	89
<i>Updates</i>	89
<i>Arithmetic</i>	90
<i>Examples</i>	90
<i>More Complex Queries</i>	91
<i>Implicit AND and OR</i>	92
<i>Links Between Tables</i>	93
<i>Functions</i>	95
<i>Use of a Condition Box</i>	96
<i>Insertions and Deletions</i>	96
<i>Users' Own Tables</i>	97
<i>Comparison with COBOL</i>	98
<i>Distributed Data Bases</i>	102

9 Ownership Of Data, and Privacy 105

- Ownership of Data 105*
- Security 107*
- Twelve Essentials 108*
- Layers of Protection 109*
- Types of Security Exposure 111*
- Three-Level Attack 114*
- Two Categories of Data Damage 114*
- Professional Approach 114*

10 Considerations Which Affect Machine Performance 115

- Introduction 115*
- Data-Base Queries 115*
- Dedicated Machines 116*
- Expense 116*
- Categories of Data Systems 117*
- Physical Data-Base Design 118*
- Scheduling and Response-Time Problems 119*

11 Separate End-User Systems 121

- Centralization vs. Decentralization 121*
- Users Keeping Their Own Data 121*
- User Initiative 122*
- Separate Data Entry 125*
- Minicomputer Data Bases 125*
- Problems of Rapid Growth 126*
- Separate Information Systems 127*
- Get Involved 131*

Appendix

I The Procedure for Canonical Data-Base Design 133

Appendix

II Class Questions 135
