Contents

Introduction vii

1. **A Tutorial on the IEEE 802 Local Network Standard,** *William Stallings* 1
2. **Channel Efficiency for LANs,** *Leonard Kleinrock* 31
3. **Mean Waiting Time for a Token Ring with Station Dependent Overheads,** *Michael J. Ferguson* 43
4. **A Programmable VLSI Controller for Standard and Prioritized Ethernet Local Networks,** *Imrich Chlamtac* 69
5. **Performance Evaluation of a Metropolitan Area Network,** *A.A. Nilsson, K.W. Hanson, and W. Chou* 93
6. **Congestion Control in Interconnected Local Area Networks,** *Takeshi Nishida, Masayuki Murata, Hideo Miyahara, and Kensuke Takashima* 107
7. **Performance Evaluation of MAGNET Protocols,** *Magda El Zarki, Aurel A. Lazar, Avshalom Patir,* **and** *Tatsuro Takahashi* 137
8. **Address-Based and Non-Address-Based Routing Schemes for Interconnected Local Area Networks,** *Daniel Avery Pitt and Kian-Bon K. Sy* 155
9. **Derivation of Asynchronous Code Division Multiple Access (CDMA) Throughput,** *Jeffrey M. Musser and John N. Daigle* 167
10. **High Performance Asynchronous Limited Sensing Algorithms for CSMA and CSMA-CD Channels,** *M. Georgiopoulos, L. Merakos, and P. Papantoni-Kazakos* 185
11. **Flow Control in Integrated Voice and Data Local Area Networks,** *Oliver C. Ibe* 215
12. **Collision Detection in Radio Channels,** *Raphael Rom* 235
13. **LAN vs. PABX,** *Israel Gitman and Benedict J. Occhiogrosso* 251
