Preface	xv
Acknowledgments	xvii
Chapter 1 Introduction to Technical Databases	1
1.1 Introduction	1
1.2 Technical Database Management	1
1.2.1 Definition of database	1
1.2.2 Database management systems	2
1.2.3 Personal computing	3
1.3 Why Discuss Technical Database Management?	3
1.4 Previous Work on Technical Database Management	4
1.5 The Users of Technical Database Management	5
1.6 The Organization of this Book	5
Chapter 2 The Nature of Technical Data	8
2.1 Basic Considerations	8
2.2 Types of Technical Data	8
2.3 Examples from Tribology	9
2.4 Features of Technical Data that Impact Access	13
2.5 The Classification of Technical Data	18
2.5.1 Support data	19
2.5.2 Generated data	20
2.6 Other Classification Schemes for Technical Data	21
2.7 Technical Data and Metadata	22
2.8 Data Thesaurus	23
2.9 Summary	27
Chapter 3 Types of Technical Databases	28
3.1 Introduction	28
3.2 The Flow of Technical Information	28

3.3	Data Measurement and Laboratory Notebook Databases	30
3.4	Data Analysis and Report Databases	31
3.5	Data Aggregation and Handbook Databases	34
3.6	Data Applications and Applications Databases	38
3.7	Databases and the Flow of Technical Information — A Summary	40
3.8	Classification of Technical Databases by Types of Users	41
3.9	Mature Databases	43
3.10	Barriers to Building Technical Databases	43
3.11	Summary	45
Chapter 4 The Use of Technical Databases		46
4.1	Introduction	46
4.2	Searching for Data Values	46
4.2.1	Searching for chemicals, engineering materials, and other substances	49
4.2.2	Types of property data	52
4.2.3	Searching for property data	52
4.3	Data Transfer and Downloading	58
4.3.1	Downloading	59
4.3.2	Data exchange formats and standards	60
4.3.3	Use of many databases	61
4.4	Data Display	62
4.4.1	Graphics	62
4.4.2	Tables	63
4.4.3	Text	63
4.5	Publication	64
4.6	Data Exhibits	66
4.7	Summary	67
Chapter 5 User Interfaces		69
5.1	Introduction	69
5.2	Components of an Interface	69
5.3	The Design of Good User Interfaces	78
5.4	Techniques of Building Good Interfaces	82
5.5	Rules for Good Menus	84
5.5.1	Menu choices	84
5.5.2	Menu size	86
5.5.3	Selection in menus	87
5.5.4	Navigation through menus	88
5.5.5	Summary of menu topics	90
5.6	Command Languages	90
5.7	Display of Output Results	91

5.8	Colors	92
5.9	Summary	93
Chapter 6 The Dissemination of Technical Databases		95
6.1	Dissemination Overview	95
6.2	Personnel Computer Packages	95
6.3	Packages for Midsize and Large Computers	96
6.4	Online Systems	96
6.5	Databases Integrated into Other Programs and Instruments	98
6.5.1	Databases as part of a software package	98
6.5.2	Databases for instruments	98
6.6	Summary of Dissemination Types	99
6.7	Practical Considerations in Disseminating Databases	99
6.7.1	Copyright	99
6.7.2	Liability	101
6.7.3	Leasing and sale agreements	101
6.7.4	Downloading from technical databases	101
6.7.5	Pricing of technical databases	102
6.7.6	Updating	102
6.7.7	User support	102
6.7.8	Documentation	103
6.8	Access to Technical Data Sources	104
6.9	Awareness of Technical Databases	104
6.10	Acquisition of Technical Databases	105
6.11	Summary	106
Chapter 7 Data Structures		107
7.1	Storage Media	107
7.1.1	Magnetic disks	107
7.1.2	Optical disks	109
7.1.3	Magnetic tapes	112
7.1.4	Addressing data on a disk	113
7.2	Records and Fields	114
7.2.1	Fixed length records	117
7.2.2	Variable length records	118
7.2.3	Variant records	119
7.3	File Organization	119
7.3.1	Serial file	120
7.3.2	Sequential file	120
7.3.3	Indexed sequential file	122
7.3.4	B-tree	122
7.3.5	Hierarchical tree	127
7.3.6	Chains and rings	128

7.3.7	Hashed file	130
7.3.8	Inverted file	133
7.4	Diagrams, Images, Continuous Signals	133
7.5	Continuous Variables	134
7.6	Formulas, Subroutines, Code, Rules	134
7.6.1	Formulae	134
7.6.2	Rules	135
7.6.3	Implicit code	135
7.6.4	Explicit code	135
7.7	Conclusion	136
Chapter 8	Architecture of a Database	138
8.1	Schemas or Views	138
8.1.1	The physical schema	139
8.1.2	The internal schema	141
8.1.3	The conceptual schema	142
8.1.4	The user view	142
8.1.5	User interface	143
8.2	Database Management System	144
8.2.1	Operating system	144
8.2.2	Data languages	146
8.2.3	Security, privacy, statistics	148
8.3	Data Dictionary	149
8.4	Data Thesaurus	150
8.5	Database Administrator	150
8.6	Example	152
Chapter 9	Data Models	156
9.1	Relational Model	157
9.1.1	Definitions	157
9.1.2	Matrices and relations	159
9.1.3	Primary and alternate keys	161
9.1.4	Operations on a relational database	162
9.1.5	Retrieval from a database	165
9.1.6	Good relations	172
9.2	Hierarchical Model	172
9.2.1	Tree structure	172
9.2.2	Searches	173
9.2.3	Hierarchical database management systems	178
9.2.4	A hierarchical atomic database	178
9.3	Network Model	181
9.3.1	Background	181
9.3.2	Network data structure	182

9.3.3	Properties of materials	184
9.3.4	Relational interface	186
9.3.5	Conclusion	187
9.4	Inverted List Model	189
9.4.1	Indexed files	189
9.4.2	Inverted list	190
9.4.3	Searching	190
9.4.4	Join	191
9.4.5	Conclusion	192
9.5	Text Model	193
9.5.1	Text files	193
9.5.2	Records stored as text	193
9.5.3	Index	195
9.5.4	Text database management system	196
9.5.5	Information retrieval	198
9.6	Object-Oriented Model	199
9.6.1	Object-oriented programming	199
9.6.2	Object-oriented databases	201
9.6.3	Implementation	202
9.7	Comparison of Models	202
Chapter 10 Database Planning		205
10.1	Introduction	205
10.1.1	Division of problem into parts	206
10.1.1	Systems approach	208
10.1.3	Development cycle	209
10.1.4	Prototyping	211
10.1.5	Configuration management	212
10.1.6	Renewed planning	212
10.1.7	Conclusion	212
10.2	The Overall Plan	213
10.3	The User Requirements	213
10.3.1	Data requirement	213
10.3.2	User community	215
10.3.3	Visit to users	216
10.3.4	Visit to other centres	217
10.3.5	Storing the user's data	217
10.3.6	Knowledge rather than data	217
10.3.7	Data manipulation	220
10.3.8	Archiving	221
10.4	The Working Environment	221
10.5	The Cost	222
10.5.1	Data	223

10.5.2	Hardware	224
10.5.3	Software	225
10.5.4	In-house system	225
10.5.5	User liason	226
10.5.6	Management	226
10.6	The Alternatives	227
10.6.1	Example: plan for a new database	227
10.6.2	Documentation	229
10.7	Continuous Planning	230
10.8	Conclusion	231
Chapter 11 Database Design		232
11.1	Introduction	232
11.2	Entity–Relationship Diagram	233
11.2.1	Entities	233
11.2.2	Relationships	234
11.2.3	School database example	234
11.2.4	Reduction of relationships	236
11.2.5	1:1 Relationship	237
11.2.6	1:N Relationship	237
11.2.7	N:M Relationship	238
11.2.8	Removing redundant relationships	239
11.2.9	Realistic example	246
11.3	Relational Model	247
11.3.1	Forming relations from the entity-relationship diagram	247
11.3.2	Good relations—normalization	248
11.4	Hierarchical Model	249
11.5	Network Model	250
11.6	Inverted List Model	251
11.7	Prototyping	251
11.8	Simulation	252
11.9	Data Dictionary and Thesaurus	252
11.10	Measurement and Feedback	253
Chapter 12 Expert Systems		254
12.1	Introduction	254
12.2	Production Rules	255
12.3	Inference Engine	258
12.4	Chaining	259
12.4.1	Backward chaining	259
12.4.2	Forward chaining	261
12.5	Explanation	262
12.6	Probability or Certainty	263

12.7	Bayes' Theorem	266
12.8	Numbers of Combinations of Rules	268
12.9	Testing	268
12.10	The Expert	269
12.11	Support for the Expert	270
12.12	Expert Systems	271
12.13	Expert System Shells	272
12.14	Successful Small Expert Systems	273
12.15	Programming Languages	274
12.16	Knowledge Base Management Systems	274
12.17	Object-oriented Knowledge Base Systems	275

Index
