

## CONTENTS

Contributors	v
Preface	vii

### PROPELLANT TECHNOLOGY

Application of the Density Ratio Method for the Interpretation of Radiographic Film of Large Solid Propellant Rockets . . . . .	3
Richard J. Mascis	
Soviet Rocket Propulsion . . . . .	55
Donald J. Ritchie	
A Discussion of Several Criteria for Determining the Propellant Bias for Optimum Performance of Liquid Propellant Stages . . . . .	87
A. H. MacPherson	
Precision Determination of Vacuum Specific Impulse from Trajectory Data . . . . .	111
C. S. Powers	

### ION PROPULSION

Charged Metal Droplets for Propulsion . . . . .	129
V. E. Krohn and H. Shelton	
A Versatile Ion Source for Propulsion . . . . .	137
Stanley Singer	
Electrodynamic Analysis of Ion Jet Neutralization . . . . .	159
H. M. DeGroff, W. D. Halverson and R. A. Holmes	
A Pulsed Plasma Accelerator Employing Electrodes . . . . .	183
S. Georgiev, R. Feinberg and G. S. Janes	
Electrostatic Lift for Space Vehicles . . . . .	203
John C. Cook	

FIFTH SYMPOSIUM ON BALLISTIC MISSILE AND SPACE TECHNOLOGY

Parametric Performance Studies of Electrical Thrust Generators for Space Applications . . . . . 243  
A. V. LaRocca

HEAT TRANSFER AND MATERIALS

Experimental Determination of Solid Rocket Nozzle Heat Transfer Coefficient . . . . . 303  
S. E. Colucci

AUXILIARY POWER SYSTEMS

Nuclear Space Power - SNAP II . . . . . 347  
F. D. Anderson, D. J. Cockeram  
H. M. Dieckamp and J. R. Wetch

A One-Megawatt Nuclear Electrical Power Plant for Space Applications . . . . . 373  
D. P. Ross, E. Ray, E. G. Rapp  
and J. E. Taylor

Bleed Gas from a Solid Propellant Rocket Engine to Power an Auxiliary Power Supply . . . . . 383  
C. W. Shoun

Isotopic Fueled Thermionic Generators . . . . . 409  
Robert J. Harvey and G. N. Hatsopoulos
