## KEYNOTE ADDRESS

- Nuclear energy sources of stars and their human implications—  
G. GAMOW (*U.S.A.*) 1

## I: RECENT DEVELOPMENTS IN HIGH TEMPERATURE MEASUREMENTS AND DEVICES

- High temperature measurements and standards: 1000–3000°—  
R. F. WALKER (*U.S.A.*) 7
- Dielectric and electronic measurements at high temperatures—  
J. L. PENTECOST (*U.S.A.*) 39
- R-F generation of thermal plasmas—C. W. MARYNOWSKI and A. G.  
MONROE (*U.S.A. and U.K.*) 67
- The hyperthermal supersonic aerodynamic tunnel—H. A. STINE  
(*U.S.A.*) 85

## II: CHEMISTRY OF MATERIALS AT HIGH TEMPERATURES

- Underdeveloped areas in high temperature chemistry—A. W. SEARCY  
(*U.S.A.*) 105
- High temperature thermodynamics and kinetics—J. L. MARGRAVE  
(*U.S.A.*) 129
- Chemical bonding from high temperature studies; sublimation of re-  
fractory compounds—R. J. ACKERMANN and R. J. THORN (*U.S.A.*) 141
- Gas-metal reactions at high temperatures—P. KOFSTAD (*Norway*) 161

## III: PHYSICS OF MATERIALS AT HIGH TEMPERATURES

- Parametric effects governing the mechanics of ceramic materials—  
N. A. WEIL (*U.S.A.*) 189
- Recent data on high temperature-high pressure phase transforma-  
tions—R. ROY and W. B. WHITE (*U.S.A.*) 235
- Diffusion and thermal defects in solids—A. E. LECLAIRE (*U.K.*) 255
- Consequence of non-stoichiometric behaviour of refractory materials  
at high temperatures—J. S. ANDERSON (*U.K.*) 285

## IV: RECENT MATERIALS DEVELOPMENTS

- Refractory pyrolytic materials—R. J. DIEFENDORF (*U.S.A.*) 313
- Mechanical properties of two-phase crystalline materials—G. S.  
ANSELL (*U.S.A.*) 325
- Controlled microstructure of refractory bodies—R. M. FULRATH  
(*U.S.A.*) 351

## CONTENTS

	Page
<b>V: MATERIALS SYSTEMS AT HIGH TEMPERATURES</b>	
Design of high temperature structural systems—H. P. KERFOOT and M. A. STEINBERG ( <i>U.S.A.</i> )	363
Emitter materials for high temperature energy conversion—W. B. NOTTINGHAM ( <i>U.S.A.</i> )	389
Materials requirements for space propulsion—H. HESSING ( <i>U.S.A.</i> )	405
Protective coating requirements and recent developments—O. O. SRP and N. M. GEYER ( <i>U.S.A.</i> )	421
New materials and physical constructions for ablative use—H. S. SCHWARTZ ( <i>U.S.A.</i> )	447

## VI: SOME SOVIET INVESTIGATIONS IN THE REGIONS OF HIGH TEMPERATURE

(Presented in written form by A. E. Sheindlin and E. I. Asinovsky who represented the Academy of Sciences, U.S.S.R.)

Enthalpy and heat capacity of some solid materials at extremely high temperatures—V. A. KIRILLIN, A. E. SHEINDLIN and V. Ya. CHEKHOVSKY ( <i>U.S.S.R.</i> )	471
Interaction between graphite and various chemically active gases at high temperatures—L. N. KHITRIN and E. S. GOLOVINA ( <i>U.S.S.R.</i> )	485
High-velocity non-isothermal plasma flows—M. F. SHIROKOV and E. P. VAULIN ( <i>U.S.S.R.</i> )	497

## VII: COMMENTS AND DISCUSSION

A report on the feasibility of establishing a high purity experimental substances bank—H. M. BURTE ( <i>U.S.A.</i> )	513
Session I	519
Session II	553
Session III	565
Session IV	581
Session V	595
