

TABLE OF CONTENTS

Ultraprecise Measurement of Thermal Expansion Coefficients - Recent Progress	1
S. F. Jacobs, J. W. Berthold III, J. Osmundsen	
Thermal Expansion of Fused Silica from 80 to 1000K Standard Reference Material 739	13
T. A. Hahn and R. K. Kirby	
Cooperative Measurement of the Thermal Expansion Behavior of Different Materials up to 1000°C by Pushrod Dilatometers	25
E. Fitzer and S. Weisenburger	
Thermal Expansion Measurements to 130° by Laser Interferometry	36
W. A. Plummer	
An Electrical Method for the Measurement of Coefficient of Linear Expansion	44
R. S. Shrivastava and D. S. Joshi	
Economy Considerations for Pushrod-Type Dilatometers	51
G. R. Clusener	
Expansion Coefficient of Coppers at 283K and Low Temperatures	59
G. K. White	
Thermal Expansion of the N. B. S. Standard Copper below 30K	65
F. N. D. D. Periera and G. M. Graham	
Low Temperature Thermal Expansion of Pure Zinc and a Dilute Zinc Manganese Alloy	72
H. W. Willemsen, E. Vittoratos, P. P. M. Meincke	
The Thermal Expansion of Tellurium at Low Temperatures	77
S. Ahmed and S. Weintraub	
Thermal Expansion of Platinum from 293 to 1900 K	87
T. A. Hahn and R. K. Kirby	
The Determination of the Thermal Expansion of Platinum by X-Ray Diffraction	97
D. L. Evans and G. R. Fischer	
High Pressure Equations of State for Solid Xenon and Neon as Models for Solids in the Classical and Low Temperature Limits	105
C. A. Swenson and M. S. Anderson	
The Variation of Lattice Parameter of UC-ZrC Solid Solutions with Temperature and Composition	119
A. L. Bowman, N. H. Krikorian, N. G. Nereson	
Anisotropy of Compressibility and Thermal Expansion of Hexagonal Selenium	131
D. McCann and L. Cartz	
Thermal Expansion of Some Azides by a Single Crystal X-Ray Method	139
F. A. Mauer and T. A. Hahn	
The Low Temperature Thermal Expansion of Solid Methane and Deuterated Methanes	151
F. W. Sheard	
Spectroscopic Applications of Low Temperature Thermal Expansion	155
F. W. Sheard	

Thermal Vacancies and Thermal Expansion	169
W. E. Schoknecht and R. O. Simmons	
Thermal Expansion Coefficients for	183
Alkali Halides Containing Defects	
C. R. Case, K. O. McLean, C. A. Swenson	
Influence of Cobalt on Invar Characteristics	188
of Iron-Nickel Alloys	
D. A. Colling	
Low Temperature Invar Anomalies in Fe-Ni-Co Alloys	195
W. F. Schlosser, E. Latal, P. P. M. Meincke, G. M. Graham	
Structural Inhomogeneity and Thermal Expansion	203
of Iron-Nickel Invar Alloys	
G. Hausch and H. Warlimont	
Shell Model Calculation of Second Grueneisenparameters and of	211
Pressure Dependence of First Grueneisenparameter for Alkali Halides	
G. R. Barsch and B. N. N. Achar	
The Thermal Expansion of Sodium Chloride by the Shell Model	231
M. Lagu and B. Dayal	
Comparison of Various Lattice Dynamical Models for	237
the Calculation of Thermal Expansion of Solids	
K. V. Namjoshi, S. S. Mitra, J. F. Vetelino	
The Role of Transverse Oxygen Vibrations in Thermal	244
Expansion Behavior of Glasses and Crystals	
H. T. Smyth	
Thermal Expansion of Ribbon-Reinforced Composites	257
S. T. Gulati and W. A. Plummer	
Effects of Thermal Expansion on the Mechanical Properties	269
of Single Phase Ceramics and Oxide Single Crystals	
H. P. Kirchner	
Thermal Expansion of Carbon-Carbon Composites	279
as a Function of Temperature and Orientation	
R. G. Naum, C. K. Jun, P. T. B. Shaffer	
Prediction of Thermal Expansion in Simple Solids and	287
Its Control in Structural Composites	
S. W. Bradstreet and L. W. Davis	
The Volume and Thermal Relaxation of Chlorinated	295
Polyethylenes near Their Glass-Rubber Transition	
D. L. Shelley	
Thermal Expansion Measurements of Simulated Lunar Rocks	302
R. E. Griffin and S. G. Demou
