Contents

Preface ix

Chapter 1 Introduction 1
1.1 Difference equations and blowflies 1
1.2 Systems 6
1.3 Feedback 9
1.4 What the book is about 14
1.5 Facts and definitions 17

Chapter 2 Qualitative theory of ordinary differential equations 22
2.1 Why bother? 22
2.2 Flows 24
2.3 Limit points and nonwandering points 34
2.4 Robustness and genericity 38
2.5 Gradient systems on $\mathbb{R}^n$ 43
2.6 Periodic orbits 49
2.7 Deterministic chaos 51

Chapter 3 The feedback system viewpoint 61
3.1 Introduction 61
3.2 Linear systems: basic properties 62
3.3 Linear systems in feedback loops 69
3.4 Input–output systems 77

Chapter 4 Stability of feedback systems 88
4.1 Introduction 88
4.2 Small-gain theorems 90
4.3 Numerical ranges 103
4.4 Implementing stability criteria 111
4.5 Eventual boundedness 118

Chapter 5 Periodic solutions and the method of harmonic balance 126
5.1 Introduction 126
5.2 Harmonic balancing 128
5.3 Using harmonic balance: the describing function method 138
5.4 Characteristic exponents and harmonic balance 149
5.5 Stability of periodic solutions 157

Chapter 6 The Hopf bifurcation 160
6.1 Introduction 160
6.2 Lyapunov functions and the Hopf bifurcation 166
6.3 Harmonic balance and the Hopf bifurcation 172
6.4 Algebraic versions of the graphical results 179
6.5 Examples of applications of the Hopf bifurcation theorem 181
6.6 Higher-order bifurcation formulae 187
Appendix 6.6A Hopf bifurcation formulae for z_1 and z_2 193
Appendix 6.6B Hopf bifurcation formulae of any order 194
6.7 Higher-order approximations and error bounds 195
