Contents

Part 1 Stability of Non-Linear Systems

1. Stability of Nonlinear Feedback Systems. By Sir James Lighthill and A. Mees 1
2. Stability and Controllability. By C. Storey 21
3. Statistical Analysis of Multi-Nonlinear Continuous Feedback Systems by Functional Series Expansions. By C. J. Harris 31
4. Some Control System Stability and Optimality Results obtained via Functional Analysis. By E. A. Freeman . . 45

Part II Optimal Control

5. Optimal Control. By J. H. Westcott 69
6. A Naive Approach to the Optimal Control of Nonlinear Stochastic Systems. By B. L. Joffe and R. W. H. Sargent . 83
7. The Numerical Solution of a Problem in the Calculus of Variations. By P. E. Gill and W. Murray 97
8. Singular Perturbations of Linear Time-optimal Control Problems. By W. D. Collins 123
9. Trajectory Sensitivity Reduction in the Optimal Linear Regulator. By P. J. Fleming and M. M. Newmann . . 137
10. Domains of Controllability. By M. J. Davies 153
11. The Optimal Synthesis of a Control Problem Defines a Stratification of the Phase Space. By Stefan Mirică . . 167
12. Improving the Conditioning of Optimal Control Problems Using Simple Models. By J. C. Allwright 173
13. Duality and Iterative Control Function Optimization for Differentially-described Dynamical Systems. By J. C. Allwright 193
14. Conditions for Compactness of the Time-phase Space in Control Problems. By D. A. Sánchez 211

Part III Filtering Theory

15. Two Recent Results in Nonlinear Filtering Theory. By J. M. C. Clark 213
16. On Time-dependent Linear Stochastic Control Systems. By T. Subba Rao and H. Tong 223
17. A Decentralized Filter for Certain Time Lag Systems. By M. G. Singh 231
18. Optimal Control of a Degenerate Markovian System. By M. H. A. Davis 255

Part IV Control of Systems Governed by Partial Differential Equations

19. On How to Shake a Piece of String to a Standstill. By P. C. Parks 267
20. The Infinite Dimensional Riccati Equation. By Ruth F. Curtain and A. J. Pritchard 289
21. Discrete Time Control of Distributed Parameter Systems. By M. J. E. Mayhew 299
22. A Maximum Principle for the Optimal Control of Distributed Parameter Systems. By M. J. Gregson 309

Part V Algebraic Systems Theory

23. Some Topics in Algebraic Systems Theory: A Survey. By Stephen Barnett 323
24. Multivariable Circle Theorems. By H. H. Rosenbrock . . 345
25. Modified Multivariable Circle Theorems. By P. A. Cook . 367
26. Numerical Comparison of Root-location Algorithms for Constant Linear Systems. By I. S. Pace and S. Barnett . . 373
27. Insensitivity of Constant Linear Systems of Finite Variations in Parameters. By Barbara A. Shane and S. Barnett . . 393
28. Extension of Existing Knowledge of the Theory of Multivariable Systems in the Z domain by Using the Theory of Multivariable Infinite Matrices. By M. A. Makhlouf . . 405
29. A Geometric Approach to the Decoupling of Linear Multivariable Systems by Output Feedback. By M. J. Denham . 421
