## Foreword

### Automatic identification technologies

<b>New families of identification systems feature modularity and growing standardisation</b>	3
J.M. Hill, Logisticon Inc., USA	
<b>Encoding information</b>	7
RJS Enterprises Inc., USA	
<b>Decoding information</b>	17
D.J. Czaplicki, Intermec Corporation, USA	

### Planning and implementing automatic identification systems

<b>The human factors in an automatic identification project</b>	25
L.A. Klaisner, Intermec Corporation, USA	
<b>Improving data collection through optical scanning systems</b>	29
B.J. Armstrong, Data Composition Inc., USA	
<b>Development of successful automatic identification systems</b>	33
R. Bravman, Symbol Technologies Inc., USA	
<b>Integrating bar code data collection with shop floor control systems</b>	41
W. Ford, Computer Identics Corporation, USA	
<b>A bar code system for improving inventory control and customer service in a random manufacturing environment</b>	47
D. Castle, Hybritech Inc., USA, and A. Dahi, Signet-Armorlite Inc., USA	

## Bar coding

<b>Bar code technology</b>	55
R.C. Palmer, Intermec Corporation, USA	
<b>The economic benefits of bar coding</b>	63
M. Aston, Arthur Andersen & Co., UK	
<b>Bar codes in harsh manufacturing environments</b>	71
B.R. Wray, Computype Inc., USA	
<b>Data collection from production workers provides a basis for better decision making</b>	79
G.A. Twedt, Data Collection Systems Inc., USA	
<b>Introduction of bar codes for automatic printed circuit board manufacture</b>	87
A. Krupp, Siemens AG, Federal Republic of Germany	
<b>The use of automatic data retrieval for order assembly using bar codes</b>	93
S.J. Robinson, Avon Cosmetics Ltd, UK	

## **Radio frequency tagging**

<b>Radio frequency transponder technology</b> S. Curtis, Eureka Systems, UK	101
<b>Automatic identification systems using radio frequency coded tags: an international perspective</b> S.M. Evans, Cotag International Ltd, UK	105
<b>Automatic identification and information systems</b> K. Murphy and J. Kay, Cranfield Institute of Technology, UK	111
<b>A flexible manufacturing system user's application of intelligent code tags</b> P.G. Hudson and S. Webb, AMECAS, UK	117
<b>PREMID: the key to the automation concept adopted by BMW in Munich</b> N.V. Philips Nederland B.V., The Netherlands	123

## **Magnetic, IC and optical card technologies**

<b>Magnetic, IC and optical cards: data storage in your wallet</b> Y. Kageyama, Omron Tateisi Electronics Co., Japan	133
<b>Technical trends and applications of the IC card</b> S. Asano, National Centre for Science Information Systems, University of Tokyo, Japan	137
<b>Smart cards: a critical decision point</b> J. Svigals, Jerome Svigals Inc., USA	143
<b>Optical memory cards: the ultimate identification and security documents</b> R.B. Barnes, Drexler Technology Corporation, USA	155

## **Glossary of terms**

<b>A glossary of automatic identification terminology</b> AIM Europe, UK	163
