

# CONTENTS

---

<b>1. INTRODUCTION</b>	<b>1</b>
<b>2. ELEMENTARY ASPECTS OF SOME STOCHASTIC PROCESSES</b>	<b>19</b>
2.1. Poisson Process, 19	
2.2. Markoff Processes, 30	
2.3. Markoff Chains, 33	
<i>Appendix A</i>	
A.1. Characteristic and Generating Functions, 43	
A.2. Examples and Illustrations, 50	
<i>Appendix B. Elements of Reliability</i>	
B.1. Time to Failure, 58	
B.2. Failure Rate or Hazard Functions, 60	
<b>3. B-MODELS OF CUMULATIVE DAMAGE</b>	<b>63</b>
3.1. Qualitative Aspects of CD Processes, 63	
3.2. Simple Version of a Stationary Phenomenological Stochastic CD Model, 73	
3.3. Some Extensions of the Simple Model, 99	
3.4. Nonstationary Models, 114	

3.5. Continuous Time Version of *B*-Model, 150

**4. CONFRONTATION WITH LIFE DATA** **163**

- 4.1. Parameter Estimation, 165
- 4.2. Life Data Description and Analysis Using a Stationary Unit-Jump *B*-Model with  $\pi_1 = 1$  and  $\rho_b = 1$ , 168
- 4.3. Life Data Description and Analysis Using a Stationary Unit-Jump *B*-Model with  $\pi_1 \neq 1$  and  $\rho_b = 1$ , 203
- 4.4. Life Data Description and Analysis Using a Nonstationary Unit-Jump *B*-Model, 228
- 4.5. Fatigue Crack Growth, 240

**5. USES OF *B*-MODELS** **257**

- 5.1. Spectrum Loading, 258
- 5.2. Accelerated Life Testing, 278
- 5.3. *B*-Model Construction Employing SN Diagrams and Similar Information, 286
- 5.4. Reliability and Maintainability, 295
- 5.5. Use of *B*-Models in Design, 305
- 5.6. Tolerance Limits, 316

*Appendix C*

- C.1. A Generalization of Glivenko's Theorem, 330

**AUTHOR INDEX** **335**

**SUBJECT INDEX** **337**
