PREFACE v

CHAPTER 1 INTRODUCTION: VARIANCE AND COVARIANCE

1.1 Introduction 1
1.2 Variance 4
1.3 Estimation of the variance of observables . . . 5
1.4 Covariance and the correlation coefficient . . . 7
1.5 Estimation of the correlation coefficient of observables . 10
1.6 Estimation of standard deviation and correlation coefficient: example 11
1.7 Partial derivatives: availability and use 13
1.8 The linear assumption 14

CHAPTER 2 ERROR PROPAGATION FROM TWO OBSERVABLES TO TWO PARAMETERS

2.1 Linear relationships 16
2.2 Two uncorrelated observables 17
2.3 The error ellipse 21
2.4 The conditional standard deviation 26
2.5 Uncorrelated observables: an example 27
2.6 Two correlated observables 29
2.7 Errors in many predicted observables obtained from two parameters 33
2.8 Propagation of errors to non-independent parameters . 36

CHAPTER 3 ERRORS IN TWO PARAMETERS OBTAINED FROM SEVERAL OBSERVABLES

3.1 Introduction 37
3.2 Propagation versus calculation 37
3.3 Weighting 38
3.4 Least-squares equations and refinement 39
3.5 General error equations 44
3.6 Equations for error propagation 47
3.7 Example: the Arrhenius parameters 48
3.8 Equations for error calculation 53
3.9 Error calculation: example 57
3.10 Error equations for the slope and intercept 58

CHAPTER 4 ERROR PROPAGATION FROM SEVERAL OBSERVABLES TO THE SAME NUMBER OF PARAMETERS

4.1 Linear transformations 60
4.2 The variance–covariance matrix 62
4.3 Error propagation equations 63
4.4 Propagation of errors from three observables to three parameters: example 65
4.5 Errors in predicted observables 67
4.6 Propagation to fewer or more parameters 67
4.7 Errors in the transformation matrix 68

CHAPTER 5 ERRORS IN SEVERAL PARAMETERS OBTAINED FROM MANY OBSERVABLES

5.1 Introduction 71
5.2 Weight matrices 71
5.3 Least-squares equations and refinement 73
5.4 General error equations 76
5.5 Equations for error propagation 77
5.6 Procedure for error calculation 78
5.7 Error calculation: an example 80
5.8 Errors in the transformation matrix 81

APPENDIX A BIBLIOGRAPHY 83

APPENDIX B COMPUTER PROCEDURES

B.1 Introduction 84
B.2 Errprop: user's notes 85
B.3 Errprop: Algol listing 86
B.4 Errprop: Fortran listing 91
B.5 Errcalc: user's notes 96
B.6 Errcalc: Algol listing 98
B.7 Errcalc: Fortran listing 104
