Preface *vii*

part one: survey of probability theory

Chapter 1. INTRODUCTION 3

Chapter 2. EXPERIMENTS, SAMPLE SPACES, AND PROBABILITY 6

2.1 Experiments and Sample Spaces 6

2.2 Set Theory 7

2.3 Events and Probability 9

2.4 Conditional Probability 11

2.5 Binomial Coefficients 12

Exercises 13

**Chapter 3. RANDOM VARIABLES, RANDOM VECTORS,
AND DISTRIBUTION FUNCTIONS 16**

3.1 Random Variables and Their Distributions 16

3.2 Multivariate Distributions 17

3.3 Sums and Integrals 19

3.4 Marginal Distributions and Independence 20

3.5 Vectors and Matrices 21

3.6	Expectations, Moments, and Characteristic Functions	23
3.7	Transformations of Random Variables	26
3.8	Conditional Distributions	28
	Exercises	30

Chapter 4. SOME SPECIAL UNIVARIATE DISTRIBUTIONS 33

4.1	Introduction	33
4.2	The Bernoulli Distribution	34
4.3	The Binomial Distribution	34
4.4	The Poisson Distribution	35
4.5	The Negative Binomial Distribution	35
4.6	The Hypergeometric Distribution	36
4.7	The Normal Distribution	37
4.8	The Gamma Distribution	39
4.9	The Beta Distribution	40
4.10	The Uniform Distribution	40
4.11	The Pareto Distribution	41
4.12	The t Distribution	41
4.13	The F Distribution	42
	Exercises	43

Chapter 5. SOME SPECIAL MULTIVARIATE DISTRIBUTIONS 48

5.1	Introduction	48
5.2	The Multinomial Distribution	48
5.3	The Dirichlet Distribution	49
5.4	The Multivariate Normal Distribution	51
5.5	The Wishart Distribution	56
5.6	The Multivariate t Distribution	59
5.7	The Bilateral Bivariate Pareto Distribution	62
	Exercises	63

part two: subjective probability and utility

Chapter 6. SUBJECTIVE PROBABILITY 69

6.1	Introduction	69
6.2	Relative Likelihood	70
6.3	The Auxiliary Experiment	75
6.4	Construction of the Probability Distribution	77
6.5	Verification of the Properties of a Probability Distribution	78
6.6	Conditional Likelihoods	81
	Exercises	82

Chapter 7. UTILITY 86

- 7.1 Preferences among Rewards 86
- 7.2 Preferences among Probability Distributions 88
- 7.3 The Definition of a Utility Function 90
- 7.4 Some Properties of Utility Functions 92
- 7.5 The Utility of Monetary Rewards 95
- 7.6 Convex and Concave Utility Functions 97
- 7.7 The Axiomatic Development of Utility 101
- 7.8 Construction of the Utility Function 103
- 7.9 Verification of the Properties of a Utility Function 106
- 7.10 Extension of the Properties of a Utility Function to the
Class \mathcal{P}_E 110
Exercises 115

part three: statistical decision problems**Chapter 8. DECISION PROBLEMS 121**

- 8.1 Elements of a Decision Problem 121
- 8.2 Bayes Risk and Bayes Decisions 123
- 8.3 Nonnegative Loss Functions 124
- 8.4 Concavity of the Bayes Risk 125
- 8.5 Randomization and Mixed Decisions 128
- 8.6 Convex Sets 130
- 8.7 Decision Problems in Which Ω and D Are Finite 132
- 8.8 Decision Problems with Observations 136
- 8.9 Construction of Bayes Decision Functions 138
- 8.10 The Cost of Observation 142
- 8.11 Statistical Decision Problems in Which Both
 Ω and D Contain Two Points 146
- 8.12 Computation of the Posterior Distribution When the
Observations Are Made in More Than One Stage 147
Exercises 149

Chapter 9. CONJUGATE PRIOR DISTRIBUTIONS 155

- 9.1 Sufficient Statistics 155
- 9.2 Conjugate Families of Distributions 159
- 9.3 Construction of the Conjugate Family 161
- 9.4 Conjugate Families for Samples from Various
Standard Distributions 164
- 9.5 Conjugate Families for Samples from a Normal Distribution 166
- 9.6 Sampling from a Normal Distribution with Unknown
Mean and Unknown Precision 168

9.7	Sampling from a Uniform Distribution	172
9.8	A Conjugate Family for Multinomial Observations	174
9.9	Conjugate Families for Samples from a Multivariate Normal Distribution	175
9.10	Multivariate Normal Distributions with Unknown Mean Vector and Unknown Precision Matrix	177
9.11	The Marginal Distribution of the Mean Vector	179
9.12	The Distribution of a Correlation	180
9.13	Precision Matrices Having an Unknown Factor	182
	Exercises	183
Chapter 10. LIMITING POSTERIOR DISTRIBUTIONS		
		190
10.1	Improper Prior Distributions	190
10.2	Improper Prior Distributions for Samples from a Normal Distribution	194
10.3	Improper Prior Distributions for Samples from a Multivariate Normal Distribution	196
10.4	Precise Measurement	198
10.5	Convergence of Posterior Distributions	201
10.6	Supercontinuity	204
10.7	Solutions of the Likelihood Equation	208
10.8	Convergence of Supercontinuous Functions	210
10.9	Limiting Properties of the Likelihood Function	212
10.10	Normal Approximation to the Posterior Distribution	215
10.11	Approximations for Vector Parameters	216
10.12	Posterior Ratios	220
	Exercises	222
Chapter 11. ESTIMATION, TESTING HYPOTHESES, AND LINEAR STATISTICAL MODELS		
		226
11.1	Estimation	226
11.2	Quadratic Loss	227
11.3	Loss Proportional to the Absolute Value of the Error	231
11.4	Estimation of a Vector	233
11.5	Problems of Testing Hypotheses	237
11.6	Testing a Simple Hypothesis about the Mean of a Normal Distribution	239
11.7	Testing Hypotheses about the Mean of a Normal Distribution When the Precision Is Unknown	241
11.8	Deciding Whether a Parameter Is Smaller or Larger Than a Specified Value	244
11.9	Deciding Whether the Mean of a Normal Distribution Is Smaller or Larger Than a Specified Value	247

- 11.10 Linear Models 249
- 11.11 Testing Hypotheses in Linear Models 253
- 11.12 Investigating the Hypothesis That Certain Regression
Coefficients Vanish 256
- 11.13 One-way Analysis of Variance 257
Exercises 260

part four: sequential decisions

Chapter 12. SEQUENTIAL SAMPLING 267

- 12.1 Gains from Sequential Sampling 267
- 12.2 Sequential Decision Procedures 272
- 12.3 The Risk of a Sequential Decision Procedure 275
- 12.4 Backward Induction 277
- 12.5 Optimal Bounded Sequential Decision Procedures 278
- 12.6 Illustrative Examples 280
- 12.7 Unbounded Sequential Decision Procedures 287
- 12.8 Regular Sequential Decision Procedures 289
- 12.9 Existence of an Optimal Procedure 290
- 12.10 Approximating an Optimal Procedure by Bounded Procedures 294
- 12.11 Regions for Continuing or Terminating Sampling 297
- 12.12 The Functional Equation 300
- 12.13 Approximations and Bounds for the Bayes Risk 302
- 12.14 The Sequential Probability-ratio Test 306
- 12.15 Characteristics of Sequential Probability-ratio Tests 309
- 12.16 Approximating the Expected Number of Observations 313
Exercises 317

Chapter 13. OPTIMAL STOPPING 324

- 13.1 Introduction 324
- 13.2 The Statistician's Reward 325
- 13.3 Choice of the Utility Function 327
- 13.4 Sampling without Recall 331
- 13.5 Further Problems of Sampling with Recall and
Sampling without Recall 333
- 13.6 Sampling without Recall from a Normal Distribution with
Unknown Mean 336
- 13.7 Sampling with Recall from a Normal Distribution with
Unknown Mean 341
- 13.8 Existence of Optimal Stopping Rules 345
- 13.9 Existence of Optimal Stopping Rules for Problems of Sampling
with Recall and Sampling without Recall 349

13.10	Martingales	353	
13.11	Stopping Rules for Martingales	356	
13.12	Uniformly Integrable Sequences of Random Variables		359
13.13	Martingales Formed from Sums and Products of Random Variables	361	
13.14	Regular Supermartingales	365	
13.15	Supermartingales and General Problems of Optimal Stopping		368
13.16	Markov Processes	369	
13.17	Stationary Stopping Rules for Markov Processes	372	
13.18	Entrance-fee Problems	376	
13.19	The Functional Equation for a Markov Process	377	
	Exercises	379	
Chapter 14. SEQUENTIAL CHOICE OF EXPERIMENTS			
			385
14.1	Introduction	385	
14.2	Markovian Decision Processes with a Finite Number of Stages		386
14.3	Markovian Decision Processes with an Infinite Number of Stages	388	
14.4	Some Betting Problems	391	
14.5	Two-armed-bandit Problems	394	
14.6	Two-armed-bandit Problems When the Value of One Parameter Is Known	396	
14.7	Two-armed-bandit Problems When the Parameters Are Dependent	399	
14.8	Inventory Problems	405	
14.9	Inventory Problems with an Infinite Number of Stages		408
14.10	Control Problems	411	
14.11	Optimal Control When the Process Cannot Be Observed without Error	414	
14.12	Multidimensional Control Problems	418	
14.13	Control Problems with Actuation Errors	421	
14.14	Search Problems	423	
14.15	Search Problems with Equal Costs	427	
14.16	Uncertainty Functions and Statistical Decision Problems		429
14.17	Sufficient Experiments	433	
14.18	Examples of Sufficient Experiments	437	
	Exercises	439	
	<i>References</i>	447	
	<i>Supplementary Bibliography</i>	465	
	<i>Name Index</i>	475	
	<i>Subject Index</i>	481
