CHAPTER	PAGE
INTRODUCTION: THE NATURE OF PROBABILITY THEORY	1
1. The Background . . . . .	1
2. Procedure . . . . .	3
3. "Statistical" Probability . . . . .	4
4. Summary . . . . .	5
5. Historical Note . . . . .	6
I THE SAMPLE SPACE . . . . .	7
1. The Empirical Background . . . . .	7
2. Examples . . . . .	9
3. The Sample Space. Events . . . . .	13
4. Relations among Events . . . . .	15
5. Discrete Sample Spaces . . . . .	17
6. Probabilities in Discrete Sample Spaces: Preparations	19
7. The Basic Definitions and Rules . . . . .	22
8. Problems for Solution . . . . .	24
II ELEMENTS OF COMBINATORIAL ANALYSIS . . . . .	26
1. Preliminaries . . . . .	26
2. Ordered Samples . . . . .	28
3. Examples . . . . .	30
4. Subpopulations and Partitions . . . . .	32
*5. Application to Occupancy Problems . . . . .	36
*5a. Application to Runs . . . . .	40
6. The Hypergeometric Distribution . . . . .	41
7. Examples for Waiting Times . . . . .	45
8. Binomial Coefficients . . . . .	48
9. Stirling's Formula . . . . .	50
Problems for Solution:	
10. Exercises and Examples . . . . .	53

\* Starred sections are not required for the understanding of the sequel and should be omitted at first reading.

CHAPTER	PAGE
11. Problems and Complements of a Theoretical Character . . . . .	57
12. Problems and Identities Involving Binomial Coefficients . . . . .	61
 *III FLUCTUATIONS IN COIN TOSSING AND RANDOM WALKS	 65
1. General Orientation . . . . .	66
2. Problems of Arrangements . . . . .	69
3. Random Walks and Coin Tossing . . . . .	73
4. Reformulation of the Combinatorial Theorems . . . . .	74
5. Probability of Long Leads: The First Arc Sine Law . . . . .	77
6. The Number of Returns to the Origin . . . . .	81
7. An Experimental Illustration . . . . .	83
8. Miscellaneous Complements . . . . .	85
 *IV COMBINATION OF EVENTS . . . . .	 88
1. Union of Events . . . . .	88
2. Application to the Classical Occupancy Problem . . . . .	91
3. The Realization of $m$ among $N$ Events . . . . .	96
4. Application to Matching and Guessing . . . . .	97
5. Miscellany . . . . .	99
6. Problems for Solution . . . . .	101
 V CONDITIONAL PROBABILITY. STOCHASTIC INDEPENDENCE	 104
1. Conditional Probability . . . . .	104
2. Probabilities Defined by Conditional Probabilities. Urn Models . . . . .	108
3. Stochastic Independence . . . . .	114
4. Repeated Trials . . . . .	118
*5. Applications to Genetics . . . . .	121
*6. Sex-Linked Characters . . . . .	125
*7. Selection . . . . .	128
8. Problems for Solution . . . . .	129
 VI THE BINOMIAL AND THE POISSON DISTRIBUTIONS . . . . .	 135
1. Bernoulli Trials . . . . .	135
2. The Binomial Distribution . . . . .	136
3. The Central Term and the Tails . . . . .	139
4. The Law of Large Numbers . . . . .	141
5. The Poisson Approximation . . . . .	142
6. The Poisson Distribution . . . . .	146
7. Observations Fitting the Poisson Distribution . . . . .	149

CHAPTER		PAGE
	8. Waiting Times. The Negative Binomial Distribution . . . . .	155
	9. The Multinomial Distribution . . . . .	157
	10. Problems for Solution . . . . .	158
VII	<b>THE NORMAL APPROXIMATION TO THE BINOMIAL DISTRIBUTION</b> . . . . .	164
	1. The Normal Distribution . . . . .	164
	2. The DeMoivre-Laplace Limit Theorem . . . . .	168
	3. Examples . . . . .	174
	4. Relation to the Poisson Approximation . . . . .	176
	5. Large Deviations . . . . .	178
	6. Problems for Solution . . . . .	179
*VIII	<b>UNLIMITED SEQUENCES OF BERNOUILLI TRIALS</b> . . . . .	183
	1. Infinite Sequences of Trials . . . . .	183
	2. Systems of Gambling . . . . .	185
	3. The Borel-Cantelli Lemmas . . . . .	188
	4. The Strong Law of Large Numbers . . . . .	189
	5. The Law of the Iterated Logarithm . . . . .	191
	6. Interpretation in Number Theory Language . . . . .	195
	7. Problems for Solution . . . . .	197
IX	<b>RANDOM VARIABLES; EXPECTATION</b> . . . . .	199
	1. Random Variables . . . . .	199
	2. Expectations . . . . .	207
	3. Examples and Applications . . . . .	209
	4. The Variance . . . . .	213
	5. Covariance; Variance of a Sum . . . . .	215
	6. Chebyshev's Inequality . . . . .	219
	*7. Kolmogorov's Inequality . . . . .	220
	*8. The Correlation Coefficient . . . . .	221
	9. Problems for Solution . . . . .	223
X	<b>LAWS OF LARGE NUMBERS</b> . . . . .	228
	1. Identically Distributed Variables . . . . .	228
	*2. Proof of the Law of Large Numbers . . . . .	231
	3. The Theory of "Fair" Games . . . . .	233
	*4. The Petersburg Game . . . . .	235
	5. Variable Distributions . . . . .	238
	*6. Applications to Combinatorial Analysis . . . . .	241
	*7. The Strong Law of Large Numbers . . . . .	243
	8. Problems for Solution . . . . .	245

<b>XI INTEGRAL VALUED VARIABLES. GENERATING FUNCTIONS</b>		<b>248</b>
1. Generalities . . . . .		248
2. Convolutions . . . . .		250
3. Application to First Passage and Recurrence Times in Bernoulli Trials . . . . .		254
4. Partial Fraction Expansions . . . . .		257
5. Bivariate Generating Functions . . . . .		261
*6. The Continuity Theorem . . . . .		262
7. Problems for Solution . . . . .		264
<b>*XII COMPOUND DISTRIBUTIONS. BRANCHING PROCESSES</b>		<b>268</b>
1. Sums of a Random Number of Variables . . . . .		268
2. The Compound Poisson Distribution . . . . .		270
3. Infinitely Divisible Distributions . . . . .		271
4. Examples for Branching Processes . . . . .		272
5. Extinction Probabilities in Branching Processes . .		274
6. Problems for Solution . . . . .		276
<b>XIII RECURRENT EVENTS. THE RENEWAL EQUATION</b>		<b>278</b>
1. Informal Preparations and Examples . . . . .		278
2. Definitions . . . . .		281
3. The Basic Relations . . . . .		285
4. The Renewal Equation . . . . .		290
5. Delayed Recurrent Events . . . . .		293
6. The Number of Occurrences of $\varepsilon$ . . . . .		296
*7. Application to the Theory of Success Runs . . . .		299
*8. More General Patterns . . . . .		303
9. Lack of Memory of Geometric Waiting Times . .		304
*10. Proof of Theorem 3 of Section 3 . . . . .		306
11. Problems for Solution . . . . .		308
<b>XIV RANDOM WALK AND RUIN PROBLEMS</b>		<b>311</b>
1. General Orientation . . . . .		311
2. The Classical Ruin Problem . . . . .		313
3. Expected Duration of the Game . . . . .		317
*4. Generating Functions for the Duration of the Game and for the First-Passage Times . . . . .		318
*5. Explicit Expressions . . . . .		321
6. Passage to the Limit; Diffusion Processes . . . .		323
*7. Random Walks in the Plane and Space . . . . .		327
