## Chapter 1. Limit and Decomposition Theorems

	<i>Page</i>
0. Preliminaries ... ..	1
1. Transition Probability Densities ... ..	4
2. Existence of C-sets... ..	7
3. Cycles ... ..	11
4. Invariant and Tail $\sigma$ -fields... ..	15
5. Tail $\sigma$ -fields of $\varphi$ -recurrent Markov Chains ...	22
6. Uniform $\varphi$ -recurrence ... ..	26
7. Invariant Measures for $\varphi$ -recurrent Chains ...	30
8. Normal and Anormal Chains ... ..	36
9. $\varphi$ -non-singular Chains ... ..	42

Chapter 2. Sums of Transition Probabilities ... ..	49
--	----

## Chapter 3. Individual Ratio Limit Theorems

1. Introduction and First Results ... ..	65
2. Probabilistic Conditions for SLRP ... ..	83
3. Necessary and Sufficient Conditions for $u_{n+1} \sim u_n$ ...	88
4. Conditions on the $f_k$ implying $u_{n+1} \sim u_n$ ... ..	93
Notes ... ..	99
Bibliography ... ..	103
Index ... ..	107
