PREFACE	v
PART I: PROBABILITY AND RANDOM VARIABLES	1
CHAPTER 1 THE MEANING OF PROBABILITY	3
1-1. Preliminary Remarks	4
1-2. The Various Definitions of Probability	7
1-3. Determinism versus Probability	15
CHAPTER 2 THE AXIOMS OF PROBABILITY	18
2-1. Set Theory	18
2-2. Probability Space	24
2-3. Conditional Probabilities and Independent Events	33
2-4. Summary	44
CHAPTER 3 REPEATED TRIALS	47
3-1. Combined Experiments	47
3-2. Bernoulli Trials	57
3-3. Asymptotic Theorems	63
3-4. Generalized Bernoulli Trials	74
3-5. Bayes' Theorem in Statistics	78
CHAPTER 4 THE CONCEPT OF A RANDOM VARIABLE	83
4-1. Random Variables; Distributions; Densities	83
4-2. Examples of Distribution and Density Functions	98
4-3. Conditional Distributions and Densities	105
4-4. Bayes' Theorem in Statistics (Reexamined)	112
CHAPTER 5 FUNCTIONS OF ONE RANDOM VARIABLE	116
5-1. The Concept of a Function of One Random Variable	116
5-2. Determination of the Distribution and Density of $y = g(x)$	118
5-3. Applications	127
	ix

x Contents

5-4. Expected Value; Dispersion; Moments	138
5-5. Characteristic Functions	153
CHAPTER 6 TWO RANDOM VARIABLES	165
6-1. Joint Distribution and Density Functions	165
6-2. Conditional Distributions and Densities	174
6-3. Independent Random Variables	179
6-4. Jointly Normal Random Variables	182
CHAPTER 7 FUNCTIONS OF TWO RANDOM VARIABLES	187
7-1. One Function of Two Random Variables	187
7-2. Two Functions of Two Random Variables	199
7-3. Expected Value; Moments; Characteristic Functions	206
7-4. Mean-square Estimation; The Orthogonality Principle	215
7-5. More on Normal Random Variables	220
CHAPTER 8 SEQUENCES OF RANDOM VARIABLES	233
8-1. General Concepts	233
8-2. Mean; Mean-square Estimation; Moments; Characteristic Functions	239
8-3. Applications	245
8-4. Normal Random Variables	250
8-5. Convergence Concepts and the Law of Large Numbers	258
8-6. The Central-limit Theorem	266
PART II: STOCHASTIC PROCESSES 277	
CHAPTER 9 GENERAL CONCEPTS	279
9-1. Introductory Remarks	279
9-2. Special Processes	284
9-3. Definitions	296
9-4. Stationary Processes	300
9-5. Transformation of Stochastic Processes (Systems)	304
9-6. Stochastic Continuity and Differentiation	312
9-7. Stochastic Differential Equations	320
9-8. Stochastic Integrals; Time Averages; Ergodicity	323
CHAPTER 10 CORRELATION AND POWER SPECTRUM OF STATIONARY PROCESSES	336
10-1. Correlation	336
10-2. Power Spectrum	338
10-3. Linear Systems	344
10-4. Hilbert Transforms; Shot Noise; Thermal Noise	355
10-5. Mean-square Periodicity and Fourier Series	367
10-6. Band-limited Processes	369
10-7. An Estimate of the Variation of a Band-limited Process	378
CHAPTER 11 LINEAR MEAN-SQUARE ESTIMATION	385
11-1. Introductory Remarks	386
11-2. The Orthogonality Principle in Linear Mean-square Estimation	390

11-3. The Wiener-Kolmogoroff Theory	400
11-4. The Filtering Problem	403
11-5. The Prediction Problem	408
11-6. Wide-sense Markoff Sequences and Recursive Filtering	418
CHAPTER 12 NONSTATIONARY PROCESSES; TRANSIENTS IN LINEAR SYSTEMS WITH STOCHASTIC INPUTS	430
12-1. Transients in Linear Systems with Stochastic Inputs	430
12-2. Two-dimensional Fourier Transforms	440
12-3. Time Averages	447
CHAPTER 13 HARMONIC ANALYSIS OF STOCHASTIC PROCESSES	453
13-1. Series Expansions	453
13-2. Approximate Fourier Expansion with Uncorrelated Coefficients	461
13-3. Fourier Transforms of Stochastic Processes	465
13-4. Generalized Harmonic Analysis	468
CHAPTER 14 STATIONARY AND NONSTATIONARY NORMAL PROCESSES	474
14-1. General Remarks	474
14-2. Stationary Processes	478
14-3. Detection	481
14-4. The Zero-crossing Problem	485
14-5. Conditional Densities and Mean-square Estimation	495
14-6. Bandpass Processes	498
14-7. The Wiener-Lévy Process	502
CHAPTER 15 BROWNIAN MOVEMENT AND MARKOFF PROCESSES	515
15-1. Langevin's Equation	516
15-2. Motion of a Harmonically Bound Particle	524
15-3. Markoff Sequences	528
15-4. Markoff Processes	535
CHAPTER 16 POISSON PROCESS AND SHOT NOISE	554
16-1. Poisson Distributions	554
16-2. Random Points in Time	556
16-3. Shot Noise	560
16-4. Densities and Characteristic Functions	562
16-5. High-density Shot Noise	570
16-6. Square-law Detection of Shot Noise	571
INDEX	577
